

Epic Tip Sheet: Ambulatory Handoff Smart Text

Purpose: The handoff smart text is a tool available in EPIC to assist staff in documenting information about the patient that will be helpful in patient movement or transition to next level of care.

Step #1: Click On Rooming tab within your patient's chart and then Click on Sending Handoff, complete in this field the nurse you are calling to complete your handoff. This would need to be done first if you want it to pull into your handoff note OR you could "refresh" your handoff note before signing.

The screenshot shows the 'Rooming' tab selected in the top navigation bar. Below it, a grid of options is displayed. The 'Sending Handoff' option is highlighted with a red box, and a red arrow points to it from the right.

The 'Sending Handoff' dialog box is shown. The 'Report Given To' field is highlighted with a red box, and the text 'Fill in nurses name you are giving report to' is visible inside the field.

Step #2: Open a new progress note

Step #3: Click on Insert SmartText box at the top of the progress note

The screenshot shows the 'My Note Progress Notes' interface. The 'Insert SmartText' button is highlighted with a red arrow.

Data-Based Radiation Oncology - Design of Clinical Trials Kerstin A. Kessel, Anne W. Lee, Søren M. Bentzen, Bhadrasain Vikram, Fridtjof Nüeschlin, Stephanie E. Combs, 2018-04-12 In radiation oncology as in many other specialties clinical trials are essential to investigate new therapy approaches Usually preparation for a prospective clinical trial is extremely time consuming until ethics approval is obtained To test a new treatment usually many years pass before it can be implemented in the routine care During that time already new interventions emerge new drugs appear on the market technical physical innovations are being implemented novel biology driven concepts are translated into clinical approaches while we are still investigating the ones from years ago Another problem is associated with molecular diagnostics and the growing amount of tumor specific biomarkers which allows for a better stratification of patient subgroups On the other side this may result in a much longer time for patient recruiting and consequently in larger multicenter trials Moreover all of the relevant data must be readily available for treatment decision making treatment as well as follow up and ultimately for trial evaluation This challenges even more for agreed standards in data acquisition quality and management How could we change the way currently clinical trials are performed in a way they are safe and ethically justifiable and speed up the initiation process so

we can provide new and better treatments faster for our patients Further while we rely on various quantitative information handling distributed large heterogeneous amounts of data efficiently is very important Thus data management becomes a strong focus A good infrastructure helps to plan tailor and conduct clinical trials in a way they are easy and quickly analyzable In this research topic we want to discuss new ideas for intelligent trial designs and concepts for data management

AARCTimes ,2003 *Personal Names in a Medieval Context* Valéria Tóth,2022-11-17 The book studies general name theoretical questions and universal features of personal name giving and also provides a description of the personal name system of the medieval Kingdom of Hungary The chapters on name theory introduce a cognitive pragmatic model that is suitable for the characterization of the anthroponym system of any language in any of its historical eras In the chapters discussing the features of old Hungarian personal name giving and usage we can find a specific application of the theoretical model The medieval Carpathian Basin provides an excellent opportunity for such an analysis for several reasons On the one

hand because this region was at the crossroads of languages and cultures in the Middle Ages and this also clearly influenced its anthroponym systems. On the other hand, the time period under scrutiny, the Middle Ages and more precisely the Old Hungarian Era between 895 and 1526, witnessed the restructuring of the name system on multiple levels, including the appearance and ensuing dominance of personal names of a Latin origin as a result of the country becoming a Christian nation and the emergence of family names as a new personal name category. The book also provides a detailed overview of the historical process in which personal name categories and personal name types were built and relied on one another. Dieses Buch behandelt einerseits allgemeine namenstheoretische Fragen und universelle Charakteristika der Personennamengebung und Personennamenverwendung, andererseits bietet es eine Beschreibung des Personennamensystems des Ungarischen Königreichs im Mittelalter. In den namenstheoretischen Kapiteln wird ein kognitiv-pragmatisches Beschreibungsmodell vorgestellt, das für die Darstellung des Personennamensystems jedweder Sprache in all ihrer Epochen geeignet ist. In den weiteren Kapiteln zu den Besonderheiten der alten ungarischen Personennamengebung und Personennamenverwendung ist die konkrete Anwendung des Beschreibungsmodells zu finden. Das mittelalterliche Karpatenbecken bietet für eine solche Analyse ein ausgezeichnetes Untersuchungsfeld. Zum einen galt diese Region als Sammelstelle von Sprachen und Kulturen im Mittelalter, was natürlich auch in den Personennamensystemen seine Spur hinterlassen hat. Zum anderen ist die untersuchte Epoche, das Mittelalter, genauer die sogenannte altungarische Zeit 895–1526, als das Zeitalter zu betrachten, in dem die Restrukturierung des Namensystems auf mehreren Ebenen zu sehen ist. Die Erscheinung und das rasche Dominantwerden der Personennamen lateinischen Ursprungs als Ergebnis der Einbindung in den christlichen Kulturkreis ist als einer dieser Prozesse anzusehen, während die andere große Veränderung, die Entstehung der Familiennamen als neuer Personennamentyp darstellt. Im Buch wird auch der historische Prozess der Aufeinanderschichtung der Personennamenkategorien und Personennamentypen detailliert vorgestellt.

Health Informatics on FHIR: How HL7's API is Transforming Healthcare Mark L. Braunstein, 2022-02-10. This extensively revised textbook describes and defines the US healthcare delivery system, its many systemic challenges, and the prior efforts to develop and deploy informatics tools to help overcome these problems. Now that electronic health record systems are widely deployed, the HL7 Fast Healthcare Interoperability standard is being rapidly accepted as the means to access and share the data stored in those systems, and analytics is increasing, being used to gain new knowledge from that aggregated clinical data. This book goes on to discuss health informatics from an historical perspective, its current state, and likely future state. It then turns to some of the important and evolving areas of informatics, including electronic health records, clinical decision support, population and public health, mHealth, and analytics. Numerous use cases and case studies are employed in all of these discussions to help readers connect the technologies to real-world challenges.

Health Informatics on FHIR: How HL7's API is Transforming Healthcare is for introductory health informatics courses for health sciences students, e.g., doctors, nurses, PhDs.
