Mega-Events and Legacies in Post-Metropolitan Spaces Stefano Di Vita, Corinna Morandi, 2017-11-29 This book offers new perspectives through which to observe and interpret mega events. Using the specific case studies of World's Fairs, Di Vita and Morandi present a report of the Milan Expo 2015 and its trans scalar legacies. While the event and post event have been affected by the world crisis, the locations of exhibition areas have greatly expanded encompassing regional as well as post metropolitan spaces. The two main aims of comparing Milan to previous expos such as Lisbon 1998, Zaragoza 2008 and Shanghai 2010 were to demonstrate the contribution of the 2015 World's Fair to the urban innovation process and to the debate surrounding a new urban agenda, as well as to examine empirically and theoretically the international discussion regarding the growth of regional and macro regional scales of contemporary cities in order to offer suggestions for future urban agendas through mega events. This book will be of great value to students, researchers and policy makers in the area of urban planning and the urban studies, more broadly geography and spatial politics.

The Adoption of Frozen Embryos Rev. Fr. Dr. Anthony Okechukwu Nnadi, 2020-09-16 This book discusses the ethical dilemmas relating to the use of frozen human embryos. During an IVF process, after fertilization of the eggs, the embryos that are not needed immediately can be placed in the freezer to be preserved for future use. Regarding the fate of frozen human embryos, the possibilities include: i) donating them for stem cell research or for treatment of disease; ii) using them as a means for treatment of infertility; iii) permitting their destruction; iv) allowing them to thaw and die; v) allowing them to continue to stay in the freezer; and vi) utilizing them in a form of prenatal adoption. As the book reveals, it is only the proposal to adopt the embryos that can be considered in terms of moral permissibility, because the rest do not respect and protect the dignity, integrity and life of the human embryo. The book focuses on the proposal for prenatal adoption. The

anthropological dimension of adoption reveals that the ethics of adoption is based on gift and acceptance and that adoption is a concrete manner of expressing love and solidarity Thus an abandoned child is received with love to be permanently a member of the adoptive family The husband and wife who did not beget the abandoned child generate him her through the intrinsic generative power of their love With this it was demonstrated in this book that prenatal adoption is compatible with the dynamic of adoption Prenatal adoption as Dignitas personae reveals is praiseworthy because it protects and saves human lives but it presents various problems Based on the declarations of the Catholic Magisterium there is a prolific Catholic debate on the morality of prenatal adoption Some agree it is morally permissible while others disagree Most arguments in the Catholic debate are centred on whether prenatal adoption separates the unitive and procreative meanings of marriage This book proposes a reconsideration of prenatal adoption sticking strictly to the Magisterial prudential judgement
