000 000 Ford cars of all types in use perhaps more Most of these cars have been sold to and are being operated by persons with but little mechanical knowledge and with no experience with the gas engine as an automobile power plant The maker s instruction book is excellent but it is necessarily brief as there is no opportunity for an extended exposition of principles involved Many operators desire to know the first principles before studying the operation and repair While considerable instruction is given in the writer s large work on motoring The Modern Gasoline Automobile it is not possible to cover any specific make of car completely in a general treatise Many requests have been received from motorists for a book on the Ford car that would enter into elementary exposition more than the manufacturer s instruction book does and cover some of the points involved in repair and maintenance more completely The writer has operated a Ford car of his own for nearly four years and has had many other cars of the same make under observation About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
