Into the Great Emptiness David Roberts,2022-12-13 A Library Journal Best Book of 2022 in Science and Technology A gripping saga and one of Roberts s finest books Jon Krakauer The riveting story of one of the greatest but least known sagas in the history of exploration By 1930 no place in the world was less well explored than Greenland The native Inuit had occupied the relatively accessible west coast for centuries The east coast however was another story In August 1930 Henry George Watkins nicknamed Gino a twenty three year old British explorer led thirteen scientists and explorers on an ambitious expedition to the east coast of Greenland and into its vast and forbidding interior to set up a permanent meteorological base on the icecap 8 200 feet above sea level The Ice Cap Station was to be the anchor of a transpolar route of air travel from Europe to North America The weather on the ice cap was appalling Fierce storms Temperatures plunging lower than 50 Fahrenheit in the winter Watkins s scheme called for rotating teams of two men each to monitor the station for two months at a time No one had ever tried to winter over in that hostile landscape let alone manage a weather station through twelve continuous months Watkins was younger than anyone under his command But he had several daring trips to the Arctic under his belt and no one doubted his judgement The first crisis came in the fall when a snowstorm stranded a resupply mission halfway to the top for many weeks When they arrived at the ice cap there were not enough provisions and fuel for another two man shift so the station would have to be abandoned Then team member August Courtauld made an astonishing offer To enable the mission to go forward he would monitor the station solo through the winter When a team went up in March to relieve Courtauld after weeks of brutal effort to make the 130 mile journey they could find no trace of him or the station By the end of March Courtauld s situation was desperate He was buried under an immovable load of frozen snow and was disastrously short on supplies On April 21 four months after Courtauld began his solitary vigil Gino Watkins set out inland with two companions to find and rescue him David Roberts veteran mountain climber and chronicler of adventures Washington Post draws on firsthand accounts and archival materials to tell the story of this daring expedition and of the epic survival ordeal that ensued

The Measure of a Mountain Bruce Barcott, 2011-02-01 A provocative highly original profile of Mount Rainier capturing the majestic beauty and deadly allure of one of the largest active volcanoes in the U S Jon Krakauer author of Into Thin Air Mount Rainier is one of the largest and most dangerous volcanoes in the country both an awesome natural monument and a formidable presence of peril In *The Measure of a Mountain* Seattle writer Bruce Barcott sets out to grasp the spirit of Rainier through an exploratory meandering and deeply personal journey along its massive flanks From forest to precipice thinning air to fractured glaciers he explores not only the physique of Rainier but the psychology and meaning of all mountains and the deep connection that exists between humans and landscape What he finds is a complex of moss bearded hemlocks and old growth firs high meadows that blossom according to a precise natural timeclock sheets of crumbling pumice fractured glaciers and unsteady magma Rainier s snow fields bristle with bug life and its marmots chew rocks to keep their teeth from overgrowing The mountain rumbles with seismic twitches and jerks seeing one hundred thirty earthquakes annually Rainier is an obsession a temple that attracts its own passionate acolytes from scientists and priests to rangers and mountain guides as well as a monument to death Referred to by locals as simply the mountain it is the single largest feature of the Pacific Northwest landscape provided it isn t hidden in clouds Visible or not though Rainer s presence is undeniable Filled with adventure poignant personal reflections and fascinating mountain lore told by Indian chiefs professional guides priests and scientists *The Measure of a Mountain* is one man s stirring quest to reconcile with a dazzling creation of nature at once

alluring and sometimes deadly **Mountain Heroes** Huw Lewis-Jones, 2011-11-22 A fascinating view of the personalities that make up the world of mountaineering from world famous explorers to native sherpas *High Crimes* Michael Kudas, 2008-02-05 High Crimes is journalist Michael Kudas's gripping account of life on top of the world where man is every bit as deadly as Mother Nature In the years following the publication of Into Thin Air much has changed on Mount Everest Among all the books documenting the glorious adventures in mountains around the world none details how the recent infusion of wealthy climbers is drawing crime to the highest place on the planet The change is caused both by a tremendous boom in traffic and a new class of parasitic and predatory adventurer It's likely that Jon Krakauer would not recognize the camps that he visited on Mount Everest almost a decade ago This book takes readers on a harrowing tour of the criminal underworld on the slopes of the world's most majestic mountain High Crimes describes two major expeditions the tragic story of Nils Antezana a climber who died on Everest after he was abandoned by his guide as well as the author's own story of his participation in the Connecticut Everest Expedition guided by George Dijmarescu and his wife and climbing partner Lhakpa Sherpa Dijmarescu who at first seemed well intentioned and charming turned increasingly hostile to his own wife as well as to the author and the other women on the team By the end of the expedition the three women could not travel unaccompanied in base camp due to the threat of violence Those that tried to stand against the violence and theft found that the worst of the intimidation had followed them home to Connecticut Beatings thefts drugs prostitution coercion threats and abandonment on the highest slopes of Everest and other mountains have become the rule rather than the exception Kudas describes many such experiences and explores the larger issues these stories raise with thriller like intensity **The Making of a Mountaineer** George Ingle Finch, 1927 **No Magic Helicopter** Carol Masheter, 2013-05-22 When the bottom fell out of Carol Masheter's life at age 50 she took up mountaineering to cope with her grief and anger Little did she know that mountaineering would lead her to try Everest when she was 61 in 2008 No Magic Helicopter An Aging Amazon's Climb of Mount Everest chronicles her preparation for the climb the struggle to the summit and the blind descent that nearly cost her life Currently Dr Masheter is the second oldest woman in the world to summit Everest and return home alive

Take Two Aspirin and Call Me at 20,000 Feet Michael J. Manyak, MD, 2024-09-17 In his own words modern day explorer Dr Michael Manyak transports thrill seekers to the farthest reaches of the earth from the dense forests of the Congo Basin to the icy expanses of Antarctica While many may crave adventures around the globe they are unlikely to experience anywhere near the many escapades that Dr Michael Manyak has had during his prolific career From his tropical medical training in the Philippines to his stints as the expedition doctor on hikes deep in the Andes and in a submersible to the Titanic wreck site the author has made the combination of medicine and adventure the dominant theme throughout his life His travels have taken him to nearly every continent where he has encountered endangered and rare species including camels snakes elephants and more He has operated on rhinos rare big cats gorillas and even a huge boar hog Some of his

encounters were dangerous to himself and others He orchestrated evacuations from battle zones in Iraq and was caught in a coup in a dangerous third world country He helped rescue nearly 100 victims from a sinking ship On occasion Manyak has been afforded a ringside seat for historical events and other times he has been thrust into unusual circumstances by chance He witnessed the Pentagon attack on 9 11 He managed the healthcare of high ranking government officials in the United States and other countries Along the way he encounters quite a cast of characters some of them household names and others better left in the dusty corners of history Take Two Aspirin and Call Me at 20 000 Feet encapsulates the incredible quests the author experienced on the road to becoming an academic cancer surgeon and explorer in the lab and the field Explorer Travellers and Adventure Tourism Jennifer Laing, Warwick Frost, 2014-08-04 This book examines the nexus between exploring and tourism and argues that exploration travel based heavily on explorer narratives and the promises of personal challenges and change is a major trend in future tourism In particular it analyses how romanticised myths of explorers form a foundation for how modern day tourists view travel and themselves Its scope ranges from the Golden Age of imperial explorers in the 19th and early 20th centuries through the growth of adventure and extreme tourism to possible future trends including space travel The volume should appeal to researchers and students across a variety of disciplines including tourism studies sociology geography and history
