The Nebra Sky Disc English Edition:

Footmarks Jim Leary, 2023-06-01 Lucid poetic and fascinating ALICE ROBERTS Engaging authoritative and full of fascinating stories of the past RAY MEARS A gentle personal and very readable book JULIA BLACKBURN AUTHOR OF TIME SONG A triumph JAMES CANTON AUTHOR OF THE OAK PAPERS I loved this book FRANCIS PRYOR On paths roads seas in the air and in space there has never been so much human movement In contrast we think of the past as static frozen in time But archaeologists have in fact always found evidence for humanity's irrepressible restlessness Now latest developments in science and archaeology are transforming this evidence and overturning how we understand the past movement of humankind In this book archaeologist Jim Leary traces the past 3.5 million years to reveal how people have always been moving how travel has historically been enforced or prohibited by people with power and how our forebears showed incredible bravery and ingenuity to journey across continents and oceans With Leary to show the way you'll follow the footsteps of early hunter gatherers preserved in mud and tread ancient trackways hollowed by feet over time Passing drovers wayfarers and pilgrims you'll see who got to move and how people moved And you'll go on long distance journeys and migrations to see how movement has shaped our world

Pre-Astronautics versus Science Ryan Elbwood, 2024-10-10 Pre Astronautics versus Science allows a daring look through a state of the art lens at archaeological finds and modern theories This book is an invitation to think beyond the textbook and explore the hidden chapters of our history It is for the curious the skeptics and the visionaries for all who are ready to delve into the mysteries of our existence Step into another world where the inexplicable meets the quest for truth and the paths of facts and speculation cross As Horst Kaltenhauser said Speculation is the spark that ignites the fire of research Join us on an exciting journey and discover a world full of fascinating possibilities

Without Copyrights Robert Spoo, 2016 Tells the story of how the clashes between authors publishers and literary pirates influenced both American copyright law and literature itself Dust jacket flap

From Cave Art to Hubble Jonathan Powell, 2019-11-20 Since ancient times humans have been engaged in a continual quest to find meaning in and make sense of sights and events in the night sky Cultures spread around the world recorded their earliest efforts in artwork made directly on the natural landscapes around them and from there they developed more and more sophisticated techniques for observing and documenting astronomy This book brings readers on an astronomical journey through the ages offering a history of how our species has recorded and interpreted the night sky over time From cave art to parchment scribe to modern X ray mapping of the sky it chronicles the ever quickening development of tools that informed and at times entirely toppled our understanding of the natural world Our documentation and recording techniques formed the bedrock for increasingly complex forays into astronomy and celestial mechanics which are addressed within these chapters Additionally the book explores how nature itself has recorded the skies in its own way which can be unraveled through ongoing geological and archaeological studies This tale of human discovery and ingenuity over the ages will appeal

to anybody interested in the field of astronomy and its rich cultural history **My European Family** Karin Bojs,2017-03-23 The story of Europe and its people told through its genetic legacy An extraordinary book part travel narrative part family history part scientific study Financial Times Karin Bojs grew up in a small broken family At her mother's funeral she felt this more keenly than ever As a science journalist she was eager to learn more about herself her family and the interconnectedness of society After all we're all related And in a sense we are all family My European Family tells the story of Europe and its people through its genetic legacy from the first wave of immigration to the present day weaving in the latest archaeological findings Karin goes deep in search of her genealogy by having her DNA sequenced she was able to trace the path of her ancestors back through the Viking and Bronze ages to the Neolithic and beyond into prehistory even back to a time when Neanderthals ran the European show Travelling to dozens of countries to follow the story she learns about early farmers in the Middle East and flute playing cavemen in Germany and France along with a whole host of other fascinating characters This book looks at genetics from a uniquely pan European perspective with the author meeting dozens of geneticists historians and archaeologists in the course of her research The genes of this seemingly ordinary modern European woman have a truly fascinating story to tell and in many ways it is the true story of Europe At a time when politics is pushing nations apart this book shows that ultimately our genes will always bind us together Winner of the 2015 Swedish August Prize A History of Geochemistry and Cosmochemistry, from Prehistory to the End of the Classical Period Robert W. Boyle,2024-05-01 Since Mendeleev outlined the modern periodic table in 1869 many new uses have been found for the 92 naturally occurring elements This book travels back in time to describe the utilization of materials familiar gold copper iron and arcane arsenic boron red ochre and their practical history mining metallurgy and crafts with evidence from archaeology and geology Together with the technological developments author Robert Boyle portrays the advances in our understanding of materials science which led to modern geological and environmental sciences It is a source book valuable to students of history and archaeology mining and metallurgy as well as to geologists mineralogists and geochemists everywhere

have been unearthed either by archaeologists or by lucky individuals who stumbled across them by chance Prehistoric Europe 50 Great Discoveries examines a small but carefully chosen selection of sites and artefacts from among this abundance of archaeological evidence all of which are remarkable and provides fascinating insights into Europe's distant past and its long lost prehistoric societies These 50 discoveries cover some sixty thousand years of European prehistory beginning in the Middle Paleolithic Old Stone Age the time of our enigmatic ancient cousins the Neanderthals and ending in the Iron Age the time of Celtic society and marking the last chapter in the remarkable story of prehistoric Europe Lying between the Middle Paleolithic and the Iron Age discoveries are those from Mesolithic Middle Stone Age Neolithic New Stone Age Chalcolithic Copper Age and Bronze Age Europe The Mesolithic Neolithic Chalcolithic and Bronze Age mark the time of Europe's final hunter gatherer societies its first farming communities and the emergence of metalworking respectively

Stonehenge Clive Ruggles, Amanda Chadburn, 2024-04-03 Stonehenge is one of the most famous ancient monuments in the world and its solar alignment is one of its most important features Yet although archaeologists have learned a huge amount about this iconic monument and its development a sense of mystery continues about its purpose This helps fuel numerous theories and common misconceptions particularly concerning its relationship to the sky and the heavenly bodies A desire to cut through this confusion was the inspiration for this book and it fills a gaping hole in the existing literature The book provides both an introduction to Stonehenge and its landscape and an introduction to archaeoastronomy the study of how ancient peoples understood phenomena in the sky and what role the sky played in their cultures Archaeoastronomy is a specialism critical to explaining the relationship of Stonehenge and nearby monuments to the heavens but interpreting archaeoastronomical evidence has often proved highly controversial in the past Stonehenge Sighting the Sun explains why It makes clear which ideas about Stonehenge are generally accepted and which are not with clear graphics to explain complicated concepts This beautifully illustrated book shines new light on this most famous of ancient monuments and is the first in depth study of this fascinating topic suitable both for specialists and for anyone with a general interest The volume includes a Foreword by British archaeologist and academic Professor Sir Barry Cunliffe
