Ciro Discepolo, 2009 English speaking readers fond of Astrology already know the Author thanks to his previous works Transits and Solar Returns and Lunar Returns and Earth Returns which have also been translated into several other languages In a practice of almost forty years of astrological research the Author has studied and guided over twenty thousand aimed birthdays he has also published a dozen books specifically on Solar Returns and Lunar Returns This is his fifth work in English two of them can be downloaded free from his webpage www.cirodiscepolo.it In this volume Ciro Discepolo deals with the second resource on which his Active Astrology is based the first one being the aimed birthday the so called exorcism of symbols In these pages the Author suggests to the Reader about what can be done when you cannot aim i e actively relocate your birthday either your Solar or Lunar Return by a practical application of the notion of activating or constellating a symbol For example Ciro Discepolo claims that if you can not leave for an aimed birthday to avoid Saturn being placed in the 5th House of your next Solar Return during the twelve months covered by the SR you had better devote more time to your kids help them in their studies or in their sporting activities pay the fee to enrol them in a course perhaps abroad where they could learn new subjects and or nurture and improve their condition in a broad sense Planet by planet House by House this volume contains all the suggestions of the Author on the exorcism of symbols a useful practice also in the case you do relocate your Solar and or Lunar Returns for example if you have willingly left some dissonant position in your map of Aimed SR or of Aimed LR and you wish to lower the threshold of risk a little more The volume also explains the philosophical and psychological roots justifying the practice of the exorcism of symbols **From Old Revelation to New**

Population Policies and Programmes in Singapore (Second Edition) Saw Swee-Hock, 2016-06-23 The second edition of *Population Policies and Programmes in Singapore* presents an up to date and comprehensive account of the government's initiatives to influence the course of fertility and hence the rate of population growth in the island state of Singapore since the 1960s The varied population issues and consequences associated with the prolonged below replacement fertility are discussed in detail The strength of the book lies in the author's intimate familiarity with the subject acquired through some personal involvement in the formulation of population policies for the country **Unknown Lutsik Karaim Letters in Hebrew Script (19th-20th Centuries)** Michał Németh, 2013-05 The work presents as far as is now possible the language

Inequality in Financial Capitalism Pasquale Tridico,2017-03-16 Recently the issue of inequality has regained attention in the economic and political debate This is due to both an increase in income inequality in particular among rich countries and an increasing interest in this issue by researchers and politicians In the last three decades income inequality among rich countries increased This period also witnessed the growth of financial capitalism characterised by the strong dependency of economies on the financial sector by the globalisation and intensification of international trade and capital mobility and by the flexibilisation of labour markets and the reduction of wage shares From the 1980s to the present day this book considers the theoretical aspects of inequality its foundations definitions approaches and origins and examines empirical evidence of

income inequality in a wide range of advanced economies The key arguments in this volume are that income inequality increased during this period because labour and welfare became seen as costs to be compressed in financial capitalism rather than as a fundamental part of aggregate demand to be expanded However the welfare state is not a drain on economic performance and competitiveness nor is it a barrier to economic efficiency Instead it is demonstrated that in countries that adopt welfare capitalism welfare state expenditure not only contributes to a reduction in inequality but also fosters economic growth Inequality in Financial Capitalism is of great importance to those who study economics political economy labour economics and globalisation **Truth** ,1909 zaraθuštrōtəma ,2021-02-01 This Festschrift is a collection of articles dedicated to one of the most distinguished scholars of Iranian Studies and a most prolific teacher of Zoroastrian and Kurdish literatures and religions Philip G Kreyenbroek The volume consists of thirteen contributions brings together some of the best known experts in their fields to reflect the love and admiration of his students colleagues and friends and are representative of some of his wide ranging scholarly interests including Zoroastrian literature and rituals as well as Iranian philology and mythology This volume was previously published by the Jordan Center for Persian Studies University of California Irvine
