extreme weather events the heat wave in Delhi in May 2022 and the unusually heavy rains in September 2022 become more
frequent fulfilling the predictions of climate change experts reducing the emissions of greenhouse gases that drive the
climate change becomes increasingly urgent Next to coal fired power stations and the industrial sector it is transport that
accounts for a major share in these emissions which makes Clean Transport in India a particularly timely publication The
book not only presents all the relevant statistics but more important explains the implications of those numbers and the
interconnections between different facets of transport for example the greater number of vehicles on roads may seem to
favour mobility but in fact makes roads more congested and the congestion makes air pollution more severe thereby
aggravating its impact on health At the same time the book is not a prophet of doom but also touches upon electric vehicles
hydrogen fuel cells drones and even flying cars Instead of fretting and fuming when you are caught in a traffic jam read this
book it will not only calm you but who knows may inspire you to be a green commuter Contents Foreword Introduction
