Rodríguez,2022-08-08 In A Kiss across the Ocean Richard T. Rodríguez examines the relationship between British post punk musicians and their Latinx audiences in the United States since the 1980s Melding memoir with cultural criticism Rodríguez spotlights a host of influential bands and performers including Siouxsie and the Banshees Adam Ant Bauhaus Soft Cell Frankie Goes to Hollywood and Pet Shop Boys He recounts these bands importance for him and other Latinx kids and discusses their frequent identification with these bands glamorous performance of difference Whether it was Siouxsie Sioux drawing inspiration from Latinx contemporaries and cultural practices or how Soft Cell singer Marc Almond's lyrics were attuned to the vibrancy of queer Latinidad Rodríguez shows how Latinx culture helped shape British post punk He traces the fandom networks that link these groups across space and time to illuminate how popular music establishes and facilitates intimate relations across the Atlantic In so doing he demonstrates how the music and styles that have come to define the 1980s hold significant sway over younger generations equally enthused by their matchlessly pleasurable and political reverberations **Fire and Flood** Thomas Princen,2025-05-20 How extreme events paradoxically sow the seeds of positive response and create opportunities for becoming adaptive to place Throughout our history we have dealt with extreme events sometimes adaptively by coping or even thriving with them and sometimes disastrously by repeatedly ignoring their lessons Now extreme events and disasters are increasing in frequency and severity and their signals are difficult to read In Fire and Flood Thomas Princen argues that the most useful signals may be those coming from fires and floods both historically and today This book looks to these past and present events to imagine and to construct a regenerative future Extreme events are much more than just confirmation of climate change Princen's in depth investigation of disaster response including our long term societal response goes beyond the harm and destruction the cries for better prevention and

protection and the simplistic formula that with mere awareness of extreme events the world will finally combat climate change We must learn to read extreme events as signals indicating how adaptive or maladaptive our patterns of extraction consumption settlement and transport are and more generally how sustainable and just our economies are Understanding these signals will allow us to become adaptive to place and plan for a future living with fires and floods **Joel Whitburn**

The Science of Racism Keon West, 2025-02-18 In this frank funny and meticulous book a leading social scientist lays out the striking facts we know about racism how we have uncovered them and how we can start to fix them Studies and surveys show time and again that about 50 percent of people believe that racism is no longer an issue today The other half would disagree vehemently And much of the writing on the subject of race and racism is equally divisive in large part because so much of it is based on opinion and personal experience It's not grounded in empiricism It's not science In The Science of Racism social psychologist Keon West corrects that idea moving this urgent conversation beyond anecdote and polemic in search of conclusive answers and solutions Starting with a fascinating look at experiments around race in hiring Dr West brilliantly and methodically walks readers through our comprehensive understanding of this controversial topic He looks at how racism impacts every stage and all facets of life from birth to death in education work and business friendships and relationships police and the justice system and healthcare He also looks at the challenges around studying these questions and the ways we can uncover the truth and then where we go from here why unconscious bias training can actually make things worse and what systems and techniques can lead us to a more equitable future
