Artificial Intelligence and the Future of Human Relations Yanto Chandra, Ruiping Fan, 2025-09-26 This book stimulates new conversations around the ethical and policy considerations stemming from the influence of artificial intelligence AI on human relationships within a cross cultural perspective With chapters from distinguished scholars from Eastern and Western backgrounds it delves into the fundamental aspects of human connections and good governance examining them through the perspectives of both Eastern and Western values while addressing the implications of AI While the recognition of AI s substantial challenges to human values and effective governance is widespread there exists a notable lack of focus on its impact on the essential human relationships that embody these values and encompass human identity within Eastern and

Western traditions By centering attention on this aspect the book highlights a critical concern for the development of AI that is suitable for the future of human relationships and good governance Specifically the book seeks to examine the influence of AI on essential human relationships such as those between parent and child spouses the elderly and the young physician and patient as well as relations between friends citizens and nations It is an essential resource relevant to academics in
