## **The Origin Of Species Th Anniversary Edition:**

**The Origin Of Species** Charles Darwin, 2003-09-02 Charles Darwin's classic that exploded into public controversy revolutionized the course of science and continues to transform our views of the world. Few other books have created such a lasting storm of controversy as *The Origin of Species*. Darwin's theory that species derive from other species by a gradual evolutionary process and that the average level of each species is heightened by the survival of the fittest stirred up popular debate to fever pitch. Its acceptance revolutionized the course of science. As Sir Julian Huxley, the noted biologist points out in his illuminating introduction, the importance of Darwin's contribution to modern scientific knowledge is almost impossible to evaluate. A truly great book, one which can still be read with profit by professional biologists. Includes an Introduction by Sir Julian Huxley. *The Oxford Magazine*, 1910. *Nature*, Sir Norman Lockyer, 1919. *Present Conflict of Science with the Christian Religion*, Herbert William Morris, 1876. *Scientific American*, 1895. **The Review of Reviews**, William Thomas Stead, 1902. **Encyclopædia Britannica: loo-mem**, Day Otis Kellogg, 1883. **Amphibian Declines**, Michael Lannoo, 2005-06-15. This benchmark volume documents in comprehensive detail a major environmental crisis: rapidly declining amphibian populations and the disturbing developmental problems that are increasingly prevalent within many amphibian species. Horror stories on this topic have been featured in the scientific and popular press over the past fifteen years, invariably asking what amphibian declines are telling us about the state of the environment. Are declines harbingers of devastated ecosystems or simply weird reflections of a peculiar amphibian world? This compendium, presenting new data, reviews of current literature, and comprehensive species accounts, reinforces what scientists have begun to suspect: that amphibians are a lens through which the state of the environment can be viewed more clearly. And that the view is alarming and presages serious concerns for all life, including that of our own species. The first part of this work consists of more than fifty essays covering topics from the causes of declines to conservation surveys and monitoring and education. The second part consists of species accounts describing the life history and natural history of every known amphibian species in the United States. *The Past, Present, and Future of Integrated History and Philosophy of Science*, Emily Herring, Kevin Jones, Konstantin Kiprijanov, Laura Sellers, 2019-05-14. Integrated History and Philosophy of Science (IHPS) is commonly understood as the study of science from a combined historical and philosophical perspective. Yet since its gradual formation as a research field, the question of how to suitably integrate both perspectives remains open. This volume presents cutting-edge research from junior IHPS scholars and, in doing so, provides a snapshot of current developments within the field, explores the connection between IHPS and other academic disciplines, and demonstrates some of the topics that are attracting the attention of scholars who will help define the future of IHPS. **Thinkers of the Twentieth Century**, Roland Turner, 1987. Major thinkers in various intellectual disciplines are featured in *Thinkers of the Twentieth Century*. Your patrons will find this guide a perfect start to their studies on 450 intellectuals from philosophy, theology, literary criticism, aesthetics,

history social sciences politics and the sciences Entries are divided into two parts Part One includes a biography complete bibliography and reading list of the major books and articles written about the entrant Part Two consists of an extended 1 000 to 3 000 word essay on the entrant These essays explain in clear comprehensible language the work of the entrant and his/her influence on the intellectual of the 20th century Galdós and Darwin T. E. Bell, 2006 Darwinian theory the big idea of the nineteenth century and its impact on the writing of Benito Pérez Galdós Despite the fact that Darwinian theory was perhaps the big idea of the nineteenth century most critics in the past have assumed that Benito Pérez Galdós would have remained unaffected by this scientific and philosophical revolution This work contends otherwise charting the influence of evolutionary theories on Galdós throughout his literary career From his adaptation of the early nineteenth century costumbristas depiction of social species into a more sophisticated portrayal of Madrid society to his treatment of shifting social forces at a time of major socio-economic change Galdós's outlook is shown to be deeply enmeshed in the Darwinian debate Attention is paid not only to the hypotheses of Darwin himself but also for instance to Ernst Haeckel's evolutionary thought to Herbert Spencer's social Darwinism and to the radical histology of Santiago Ramón y Cajal Galdós and Darwin discusses how Spain's greatest novelist since Cervantes imaginatively reworked these epoch-making theories and investigates the impact of science on culture as the Spanish nation approached the twentieth century T. E. BELL completed his Ph.D. under the supervision of Professor Nicholas Round at Sheffield University **The ^AEvolution of Atheism** Stephen LeDrew, 2015-10-01 In *The Evolution of Atheism* Stephen LeDrew argues that militant atheists have more in common with religious fundamentalists than they would care to admit advancing what LeDrew calls secular fundamentalism LeDrew draws on public relations campaigns publications podcasts and in-depth interviews to explore the belief systems internal logics and self-contradictions of atheists He argues that evolving understandings of what atheism means and how it should be put into action are threatening to irrevocably fragment the movement **The Canadian Naturalist and Quarterly Journal of Science** Elkanah Billings, Bernard James Harrington, James Thomas Donald, 1872 *The Academy*, 1871 **Advances in Genetics**, 1973-11-02 *Advances in Genetics* *Proceedings of the Royal Society of Victoria* Royal Society of Victoria (Melbourne, Vic.), 1968 List of members in each volume except v 6 new ser v 27 Luck, Or Cunning, as the Main Means of Organic Modification?
