The Painting Within English Edition:

The Dawn of Christian Art in Panel Paintings and Icons Thomas F. Mathews, Norman E. Muller, 2017-02-01 Staking out new territory in the history of art this book presents a compelling argument for a lost link between the panel painting tradition of Greek antiquity and Christian paintings of Byzantium and the Renaissance While art historians place the origin of icons in the seventh century Thomas F Mathews finds strong evidence as early as the second century in the texts of Irenaeus and the Acts of John that describe private Christian worship In closely studying an obscure set of sixty neglected panel paintings from Egypt in Roman times the author explains how these paintings of the Egyptian gods offer the missing link in the long history of religious painting Christian panel paintings and icons are for the first time placed in a continuum with the pagan paintings that preceded them sharing elements of iconography technology and religious usages as votive offerings Exciting discoveries punctuate the narrative the technology of the triptych enormously popular in Europe traced by the authors to the construction of Egyptian portable shrines such as the Isis and Serapis of the J Paul Getty Museum the discovery that the egg tempera painting medium usually credited to Renaissance artist Cimabue has been identified in Egyptian panels a millennium earlier and the reconstruction of a ring of icons on the chancel of Saint Sophia in Istanbul This book will be a vital addition to the fields of Egyptian Graeco Roman and late antique art history and more generally to the history of painting

Rembrandt: The Painter Thinking Ernst van de Wetering, 2016-04-18 Throughout his life Rembrandt van Rijn 1606 1669 was considered an exceptional artist by contemporary art lovers In this highly original book Ernst van de Wetering investigates why Rembrandt from a very early age was praised by high placed connoisseurs like Constantijn Huygens It turns out that Rembrandt from his first endeavours in painting on had embarked on a journey past all the foundations of the art of painting which were considered essential in the seventeenth century In his systematic exploration of these foundations Rembrandt achieved mastery in all of them thus becoming the pittore famoso that count Cosimo the Medici visited at the end

of his life Rembrandt never stopped searching for ever better solutions to the pictorial problems he saw himself confronted with this sometimes led to radical decisions and alterations in his way of working which cannot simply be explained by attributing them to a change in style or a natural development In a quest as rigorous and novel as Rembrandt's Van de Wetering shows us how Rembrandt dealt with the foundations of his art and used them to try and become the best painter the world had ever seen His book sheds new light both on Rembrandt's exceptional accomplishments and on the practice of painting in the Dutch Golden Age at large *Dictionary of Untranslatables* Barbara Cassin, Emily Apter, Jacques

Greek Art and Aesthetics in the Fourth Century B.C. William A. P. Childs, 2018-04-10 Greek Art and Aesthetics in the Fourth Century B.C. analyzes the broad character of art produced during this period providing in depth analysis of and commentary on many of its most notable examples of sculpture and painting Taking into consideration developments in style and subject matter and elucidating political religious and intellectual context William A.P. Childs argues that Greek art in this era was a natural outgrowth of the high classical period and focused on developing the rudiments of individual expression that became the hallmark of the classical in the fifth century As Childs shows in many respects the art of this period corresponds with the philosophical inquiry by Plato and his contemporaries into the nature of art and speaks to the contemporaneous sense of insecurity and renewed religious devotion Delving into formal and iconographic developments in sculpture and painting Childs examines how the sensitive expressive quality of these

works seamlessly links the classical and Hellenistic periods with no appreciable rupture in the continuous exploration of the human condition Another overarching theme concerns the nature of style as a concept of expression an issue that becomes more important given the increasingly multiple styles and functions of fourth century Greek art Childs also shows how the color and form of works suggested the unseen and revealed the profound character of individuals and the physical world
