MIND IN THE MAKING JAMES HARVEY. ROBINSON,2018 **The Mind in the Making by James Harvey Robinson** James Harvey Robinson,1924 **The Mind in the Making** James Harvey Robinson,2014-03 This is a reproduction of a book published before 1923 This book may have occasional imperfections such as missing or blurred pages poor pictures errant marks etc that were either part of the original artifact or were introduced by the scanning process We believe this work is culturally important and despite the imperfections have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide We appreciate your understanding of the imperfections in the preservation process and hope you enjoy this valuable book **Minds in Motion** Anne M. Thell,2017-08-31 The central claim of Minds in Motion is that British travel writing of the long eighteenth century functions as an epistemological playing field where authors test empiricist models of engagement with the world while simultaneously seeking out the role of the self and the imagination in producing knowledge Whether exploring the relationship between the senses and the mind the narrative viability of experimental detachment or the literary dynamics of virtual witnessing eighteenth century travel

authors persistently confront their positionality and raise difficult questions about the nature and value of first hand experience In one way or another they also complicate empiricist ideals by exploring the limits of individual perception and the role of the imagination in generating and relating knowledge While the genre is often viewed as either numbingly documentary or non literary and commercial travel literature actually operates at the front line of the period s intellectual developments illustrating both how individual writers grapple with philosophical ideals and how these ideals filter into the lives of ordinary people Indeed travel literature directly engages the scientific and philosophical concerns of the period while it is also widely avidly read as such it offers models for cognitive and rhetorical practices that are evaluated and either embraced or rejected by readers in a process of identification not unlike that which occurs in early English fiction Moreover because eighteenth century travel literature is so crucial to the development of so many fields from botany to the novel it illustrates vividly the divisive energies of discipline and genre formation while also archiving the shared aims and methods of what will become discrete fields of study Travelogues as diverse as Margaret Cavendish s *Blazing World* 1666 and Samuel Johnson s *Journey to the Western Islands of Scotland* 1775 reveal the epistemological circuitry of the eighteenth century and historicize the absorption of the philosophical tendencies that have come to define modernity

Technology and the Making of Experimental Film Culture John Powers, 2023 The Bolex camera 16mm reversal film stocks commercial film laboratories

and low budget optical printers were the small gauge media technologies that provided the infrastructure for experimental filmmaking at the height of its cultural impact Technology and the Making of Experimental Film Culture examines how the avant garde embraced these material resources and invested them with meanings and values adjacent to those of semiprofessional film culture By reasserting the physicality of the body in making time lapse and kinesthetic sequences with the Bolex filmmakers conversed with other art forms and integrated broader spheres of humanistic and scientific inquiry into their artistic process Drawing from the photographic qualities of stocks such as Tri X and Kodachrome they discovered pliant metaphors that allowed them to connect their artistic practice to metaphysics spiritualism and Hollywood excess By framing film labs as mystical or adversarial they cultivated an oppositionality that valorized control over the artistic process And by using the optical printer as a tool for excavating latent meaning out of found footage they posited the reworking of images as fundamental to the exploration of personal and cultural identity Providing a wealth of new detail about the making of canonized avant garde classics by such luminaries as Carolee Schneemann Jack Smith and Stan Brakhage as well as rediscovering works from overlooked artists such as Chick Strand Amy Halpern and Gunvor Nelson Technology and the Making of Experimental Film Culture uses technology as a lens for examining the process of making where ideas come from how they are put into practice and how arguments about those ideas foster cultural and artistic commitments and communities
