Wiersma, 2014-06-27 This book analyses Early Helladic III Middle Helladic and Late Helladic I domestic architecture with reference to social organization and social change The study covers domestic architecture from the southern and central Greek mainland up to southern Thessaly **The Oxford History of the Ancient Near East** Karen Radner, Nadine

Moeller, Daniel T. Potts, 2022 The Oxford History of Ancient Near East Volume 3 covers broadly the period from 1600 to 1100 BC or in archaeological terms the Late Bronze Age Twelve chapters present the history of the Near East from the Hyksos state of Lower Egypt to the to the Elamites in southwestern Iran examining the Hittites in Central Anatolia the kingdom of Mittani in Northern Mesopotamia the Kassites in southern Iraq and the Mycenaeans in the Aegean **1177 B.C.** Eric H.

Cline, 2015-09-22 A bold reassessment of what caused the Late Bronze Age collapse In 1177 B C marauding groups known only as the Sea Peoples invaded Egypt The pharaoh's army and navy managed to defeat them but the victory so weakened Egypt that it soon slid into decline as did most of the surrounding civilizations After centuries of brilliance the civilized world of the Bronze Age came to an abrupt and cataclysmic end Kingdoms fell like dominoes over the course of just a few decades No more Minoans or Mycenaeans No more Trojans Hittites or Babylonians The thriving economy and cultures of the late second millennium B C which had stretched from Greece to Egypt and Mesopotamia suddenly ceased to exist along with writing systems technology and monumental architecture But the Sea Peoples alone could not have caused such widespread breakdown How did it happen In this major new account of the causes of this First Dark Ages Eric Cline tells the gripping story of how the end was brought about by multiple interconnected failures ranging from invasion and revolt to earthquakes drought and the cutting of international trade routes Bringing to life the vibrant multicultural world of these great civilizations he draws a sweeping panorama of the empires and globalized peoples of the Late Bronze Age and shows that it was their very interdependence that hastened their dramatic collapse and ushered in a dark age that lasted centuries A compelling combination of narrative and the latest scholarship 1177 B C sheds new light on the complex ties that gave rise to and ultimately destroyed the flourishing civilizations of the Late Bronze Age and that set the stage for the emergence of classical Greece *Communication Uneven* Jan Driessen, Alessandro Vanzetti, 2021-01-07 The aim of this volume is to

measure acceptance of and resistance to outside influences within Mediterranean coastal settlements and their immediate hinterlands with a particular focus on the processes not reflecting simple commercial routes but taking place at an intercultural level in situations of developed connectedness Ashlar Maud Devolder,Igor Kreimerman,2020-06-25 This volume focusses on ashlar masonry probably the most elaborate construction technique of the Eastern Mediterranean Bronze Age from a cross regional perspective The building practices and the uses of cutstone components and masonries in Egypt Syria the Aegean Anatolia Cyprus and the Levant in the 3rd and 2nd millennium BC are examined through a series of case studies and topical essays The topics addressed include the terminology of ashlar building components and the typologies of its masonries technical studies on the procurement dressing tool kits and construction techniques pertaining to cut stone investigations into the place of ashlar in inter regional exchanges and craft dissemination the extent and significance of the use of cut stone within the communities and regions and the visual effects social meanings and symbolic and ideological values of ashlar *Sacred Darkness* Holley Moyes,2012-09-01 Caves have been used in various ways across human society but despite the persistence within popular culture of the iconic caveman deep caves were never used primarily as habitation sites for early humans Rather in both ancient and contemporary contexts caves have served primarily as ritual spaces In *Sacred Darkness* contributors use archaeological evidence as well as ethnographic studies of modern ritual practices to envision the cave as place of spiritual and ideological power and a potent venue for ritual practice Covering the ritual use of caves in Europe Asia Australia Africa Mesoamerica and the US Southwest and Eastern woodlands this book brings together case studies by prominent scholars whose research spans from the Paleolithic period to the present day These contributions demonstrate that cave sites are as fruitful as surface contexts in promoting the understanding of both ancient and modern religious beliefs and practices This state of the art survey of ritual cave use will be one of the most valuable resources for understanding the role of caves in studies of religion sacred landscape or cosmology and a must read for any archaeologist interested in caves **Metallurgy** Philip P. Betancourt,Susan C. Ferrence,2011-12-31 Prof James D Muhly has enjoyed a distinguished career in the study of ancient history archaeology and metallurgy that includes an emeritus professorship at the University of Pennsylvania and a term as director of the American School of Classical Studies at Athens as well as receiving the Archaeological Institute of America's Pomeroy Award for Scientific Contributions to Archaeology In Muhly's honor a total of 38 eminent scholars have contributed 30 articles that include topics on Bronze and Iron Age metallurgy around the Eastern Mediterranean in such places as Crete the Cyclades Cyprus and Turkey Societies in Transition in Early Greece Alex R. Knodell,2021-05-25 A free open access ebook is available upon publication Learn more at www.luminosoa.org Situated at the disciplinary boundary between prehistory and history this book presents a new synthesis of Late Bronze Age and Early Iron Age Greece from the rise and fall of Mycenaean civilization through the Dark Age and up to the emergence of city states in the Archaic period This period saw the growth and decline of varied political systems and the

development of networks that would eventually expand to nearly all shores of the Middle Sea Alex R Knodell argues that in order to understand how ancient Greece changed over time one must analyze how Greek societies constituted and reconstituted themselves across multiple scales from the local to the regional to the Mediterranean Knodell employs innovative network and spatial analyses to understand the regional diversity and connectivity that drove the growth of early Greek polities As a groundbreaking study of landscape interaction and sociopolitical change *Societies in Transition in Early Greece* systematically bridges the divide between the Mycenaean period and the Archaic Greek world to shed new light on an often overlooked period of world history *The Cambridge World Prehistory* Colin Renfrew,Paul Bahn,2014-06-09 The Cambridge World Prehistory provides a systematic and authoritative examination of the prehistory of every region around the world from the early days of human origins in Africa two million years ago to the beginnings of written history which in some areas started only two centuries ago Written by a team of leading international scholars the volumes include both traditional topics and cutting edge approaches such as archaeolinguistics and molecular genetics and examine the essential questions of human development around the world The volumes are organised geographically exploring the evolution of hominins and their expansion from Africa as well as the formation of states and development in each region of different technologies such as seafaring metallurgy and food production The Cambridge World Prehistory reveals a rich and complex history of the world It will be an invaluable resource for any student or scholar of archaeology and related disciplines looking to research a particular topic tradition region or period within prehistory **Cycladic Archaeology and Research: New Approaches and Discoveries** Erica Angliker,John Tully,2018-04-30 Recent excavations and new theoretical approaches are changing our view of the Cyclades This volume aims to share these recent developments with a broader international audience Essays have been carefully selected as representing some of the most important recent work and include significant previously unpublished material **The Collapse of the Mycenaean Economy** Sarah C. Murray,2017-04-24 In this book Sarah Murray provides a comprehensive treatment of textual and archaeological evidence for the long distance trade economy of Greece across 600 years during the transition from the Late Bronze to the Early Iron Age Analyzing the finished objects that sustained this kind of trade she also situates these artifacts within the broader context of the ancient Mediterranean economy including evidence for the import and export of commodities as well as demographic change Murray argues that our current model of exchange during the Late Bronze Age is in need of a thoroughgoing reformulation She demonstrates that the association of imported objects with elite self fashioning is not supported by the evidence from any period in early Greek history Moreover the notional decline in trade during Greece s purported Dark Age appears to be the result of severe economic contraction rather than a severance of access to trade routes *A Companion to the Archaeology of Early Greece and the Mediterranean, 2 Volume Set* Irene S. Lemos,Antonis Kotsonas,2020-01-09 A Companion that examines together two pivotal periods of Greek archaeology and offers a rich analysis of early Greek culture A Companion to

the Archaeology of Early Greece and the Mediterranean offers an original and inclusive review of two key periods of Greek archaeology which are typically treated separately the Late Bronze Age and the Early Iron Age It presents an in depth exploration of the society and material culture of Greece and the Mediterranean from the 14th to the early 7th centuries BC The two volume companion sets Aegean developments within their broader geographic and cultural context and presents the wide ranging interactions with the Mediterranean The companion bridges the gap that typically exists between Prehistoric and Classical Archaeology and examines material culture and social practice across Greece and the Mediterranean A number of specialists examine the environment and demography and analyze a range of textual and archaeological evidence to shed light on socio political and cultural developments The companion also emphasizes regionalism in the archaeology of early Greece and examines the responses of different regions to major phenomena such as state formation literacy migration and colonization Comprehensive in scope this important companion Outlines major developments in the two key phases of early Greece the Late Bronze Age and the Early Iron Age Includes studies of the geography chronology and demography of early Greece Explores the development of early Greek state and society and examines economy religion art and material culture Sets Aegean developments within their Mediterranean context Written for students and scholars interested in the material culture of the era A Companion to the Archaeology of Early Greece and the Mediterranean offers a comprehensive and authoritative guide that bridges the gap between the Late Bronze Age and the Early Iron Age 2020 CHOICE Outstanding Academic Title Winner
