Globalisation, Criminal Law and Criminal Justice Valsamis Mitsilegas, Peter Alldridge, Leonidas Cheliotis, 2015-01-22 The book consists of the keynote papers delivered at the 2012 WG Hart Workshop on Globalisation Criminal Law and Criminal Justice organised by the Queen Mary Criminal Justice Centre The volume addresses from a cross disciplinary perspective the multifarious relationship between globalisation on the one hand and criminal law and justice on the other hand At a time when economic political and cultural systems across different jurisdictions are increasingly becoming or are perceived to be parts of a coherent global whole it appears that the study of crime and criminal justice policies and practices can no longer be restricted within the boundaries of individual nation states or even particular transnational regions But in which specific fields to what extent and in what ways does globalisation influence crime and criminal justice in disparate jurisdictions Which are the factors that facilitate or prevent such influence at a domestic and or regional level And how does or should scholarly inquiry explore these themes These are all key questions which are addressed by the contributors to the volume In addition to contributions focusing on theoretical and comparative dimensions of globalisation in criminal law and justice the volume includes sections focusing on the role of evidence in the development

of criminal justice policy the development of European criminal law and its relationship with national and transnational legal orders and the influence of globalisation on the interplay between criminal and administrative law

Turkey's Accession to the European Union Constantine Arvanitopoulos, 2008-12-28 European views on Turkey's membership in the EU have been split between those in support of its full integration and those advocating a privileged partnership To the extent that many of the latter proposals imply that Turkey will be partially integrated within Europe in certain areas the question of Turkey's accession is probably not about if but about how much integration there will be within the Union's structures The purpose of this book is not to offer a definitive response to this question The book aims instead to examine the complexity of the issues pertaining to Turkey's prospective EU membership by presenting several often divergent accounts of the political security and socio-economic dimensions of the entire process The book provides a forum for an exchange of views among distinguished scholars and researchers from different national backgrounds in order to contribute to the ongoing public discussion of Turkey's accession Sophisticated informative and refreshing in its argumentation the book provides an excellent overview of the complexities of Turkey's accession to the EU membership Professor Mustafa Aydin TOBB University of Economics and Technology A refreshing view from the European periphery an original mirror of the Union's central challenges Professor Georges Prevelakis University of Paris 1 Panthéon Sorbonne

Immigration, Integration, and Security Ariane Chebel D'Appollonia, Simon Reich, 2008-05-01 Recent acts of terrorism in Britain and Europe and the events of 9/11 in the United States have greatly influenced immigration security and integration policies in these countries Yet many of the current practices surrounding these issues were developed decades ago and are ill suited to the dynamics of today's global economies and immigration patterns At the core of much policy debate is the inherent paradox whereby immigrant populations are frequently perceived as posing a potential security threat yet bolster economies by providing an inexpensive workforce Strict attention to border controls and immigration quotas has diverted focus away from perhaps the most significant dilemma the integration of existing immigrant groups Often restricted in their civil and political rights and targets of xenophobia racial profiling and discrimination immigrants are unable or unwilling to integrate into the population These factors breed distrust disenfranchisement and hatred factors that potentially engender radicalization and can even threaten internal security The contributors compare policies on these issues at three relational levels between individual EU nations and the U.S. between the EU and U.S. and among EU nations What emerges is a timely and critical examination of the variations and contradictions in policy at each level of interaction and how different agencies and different nations often work in opposition to each other with self-defeating results While the contributors differ on courses of action they offer fresh perspectives some examining significant case studies and laying the groundwork for future debate on these crucial issues

The Routledge International Handbook of the Crimes of the Powerful Gregg Barak, 2015-06-05 Across the world most people are well aware of ordinary criminal harms to person and property Often committed by the powerless and poor

these individualized crimes are catalogued in the statistics collected annually by the FBI and by similar agencies in other developed nations. In contrast, the more harmful and systemic forms of injury to person and property committed by powerful and wealthy individuals, groups, and national states are neither calculated by governmental agencies nor annually reported by the mass media. As a result, most citizens of the world are unaware of the routinized crimes of the powerful, even though they are more likely to experience harms and injuries from these types of organized offenses than they are from the atomized offenses of the powerless. Research on the crimes of the powerful brings together several areas of criminological focus involving organizational and institutional networks of powerful people that commit crimes against workers, marketplaces, taxpayers, and political systems, as well as acts of torture, terrorism, and genocide. This international handbook offers a comprehensive authoritative and structural synthesis of these interrelated topics of criminological concern. It also explains why the crimes of the powerful are so difficult to control. Edited by internationally acclaimed criminologist Gregg Barak, this book reflects the state of the art of scholarly research covering all the key areas, including corporate, global, environmental, and state crimes. The handbook is a perfect resource for students and researchers engaged with explaining and controlling the crimes of the powerful domestically and internationally.

Contagion Bruce Magnusson, Zahi Zalloua, 2012-09-01 Over many decades, contagion has been a metaphor of choice for everything from global terrorism, suicide bombings, poverty, immigration, global financial crises, human rights, fast food, obesity, divorce, and homosexuality. Essays examine the language of epidemiology used in the war on terror, the repressive effects of global disease surveillance, and films and novels that enact the perplexities of contagion in a global context. Fear of microbial disaster becomes a framework for larger questions about the nature and location of sovereignty and the related questions of contact and hygienic isolation, fear and invisibility, the hazards of sociability, the security of surveillance, and what a healthy security might mean. Utilizing the cross-disciplinary approach of global studies, contagion emerges as a vexed trope for globalization itself.

Globalisation, Migration, and the Future of Europe Leila Simona Talani, 2012-02-06 Showcasing an original interdisciplinary approach, this text examines the effect of migration on the domestic politics of individual states and how they are eroding the distinctions between the domestic and foreign policy, the inside and outside components of politics and law. During the twentieth century, the context in which migrants negotiate their integration within legal, social, cultural, economic, and political spaces changed significantly. Drawing upon varied perspectives from the US, UK, France, Germany, Switzerland, Russia, and Italy, among others, this work develops a comprehensive understanding of the impact migratory networks are having on European societies. It investigates the strategies of integration or discrimination which are developed in Europe by state institutions, legal codes, political movements, and even immigrant communities themselves when confronted with the growing influence of migratory networks. The result is a highly topical exploration of the political and legal dimensions of migration in the EU that develops new approaches to the issue of social integration and the exclusion of migrants and migrant communities.
