The Onestraw Revolution An Introduction To Natural Farming:

The One-Straw Revolution Masanobu Fukuoka, 2010-09-08 Call it Zen and the Art of Farming or a Little Green Book Masanobu Fukuoka's manifesto about farming eating and the limits of human knowledge presents a radical challenge to the global systems we rely on for our food At the same time it is a spiritual memoir of a man whose innovative system of cultivating the earth reflects a deep faith in the wholeness and balance of the natural world As Wendell Berry writes in his preface the book is valuable to us because it is at once practical and philosophical It is an inspiring necessary book about agriculture because it is not just about agriculture Trained as a scientist Fukuoka rejected both modern agribusiness and centuries of agricultural practice deciding instead that the best forms of cultivation mirror nature's own laws Over the next three decades he perfected his so called do nothing technique commonsense sustainable practices that all but eliminate the use of pesticides fertilizer tillage and perhaps most significantly wasteful effort Whether you're a guerrilla gardener or a kitchen gardener dedicated to slow food or simply looking to live a healthier life you will find something here you may even be moved to start a revolution of your own

Chinese Environmental Aesthetics Gerald Cipriani, 2015-05-15 China is currently afflicted by enormous environmental problems This book drawing on ancient and modern Chinese environmental thinking considers what it is that makes an environment a desirable place for living The book emphasises ideas of beauty and discusses how these ideas can be applied in natural agricultural and urban environments in order to produce desirable environments The book argues that environment is both a product of nature and of human beings and as such is potentially alterable by culture The book explores the three aspects of environmental beauty whereby such alteration might be beneficially made integrated and holistic ecological and man made and authentic and everyday This book addresses environmental issues by distinctively suggesting that an aesthetic approach inspired from ancient Chinese tradition could help us overcome the many problems that human beings have created at local and global levels Although its main focus is the traditional and current contexts of the People s Republic of China the book transcends national borders A typical example is the ancient Chinese thought system and cultural practice of Feng Shui that sought to negotiate how the natural environment and human constructions can cohabit without destructing each other The author evokes that sought after harmony through the powerful image of gardens of life whose environmental beauty can be found in traditional Chinese gardens and palaces as well as historically and culturally preserved cities
