Electronic Medical Records Neil S. Skolnik, 2010-10-20 Physician adoption of electronic medical records EMRs has become a national priority It is said that EMRs have the potential to greatly improve patient care to

provide the data needed for more effective population management and quality assurance of both an individual practice's patients and well as patients of large health care systems and the potential to create efficiencies that allow physicians to provide this improved care at a far lower cost than at present. There is currently a strong U.S. government push for physicians to adopt EMR technology with the Obama administration emphasizing the use of EMRs as an important part of the future of health care and urging widespread adoption of this technology by 2014. This timely book for the primary care community offers a concise and easy to read guide for implementing an EMR system. Organized in six sections, this invaluable title details the general state of the EMR landscape, covering the government's incentive program, promises and pitfalls of EMR technology, issues related to standardization, and the range of EMR vendors from which a provider can choose. Importantly, chapter two provides a detailed and highly instructional account of the experiences that a range of primary care providers have had in implementing EMR systems. Chapter three discusses how to effectively choose an EMR system, while chapters four and five cover all of the vital pre-implementation and implementation issues in establishing an EMR system in the primary care environment. Finally, chapter six discusses how to optimize and maintain a new EMR system to achieve the full cost savings desired. Concise, direct, but above all, honest in recognizing the challenges in choosing and implementing an electronic health record in primary care.

Making Computerized Provider Order Entry Work Philip Smith, 2012-09-18 Despite all the jokes about the poor quality of physician handwriting physician adoption of computerized provider order entry CPOE in hospitals still lags behind other industries use of technology As of the end of 2010 less than 22% of hospitals had deployed CPOE Yet experts claim that this technology reduces over 80% of medication errors and could prevent an estimated 522 000 serious medication errors annually in the US Even though the federal government has offered 20 billion dollars in incentives to hospitals and health systems through the 2009 stimulus the ARRA HITECH section of the American Recovery and Reinvestment Act of 2009 many organizations are struggling to implement advanced clinical information systems including CPOE In addition industry experts estimate that the healthcare industry is lacking as many as 40 000 persons with expertise in clinical informatics necessary to make it all happen by the 2016 deadline for these incentives While the scientific literature contains numerous studies and stories about CPOE no one has written a comprehensive practical guide like Making CPOE Work While early adopters of CPOE were mainly academic hospitals community hospitals are now proceeding with CPOE projects and need a comprehensive guide Making CPOE Work is a book that will provide a concise guide to help both new and experienced health informatics teams

successfully plan and implement CPOE The book in a narrative style draws on the author s decade long experiences of implementing CPOE at a variety of academic pediatric and community hospitals across the United States **Paperless Medical Office for Billers and Coders** Virginia Busey Ferrari,2015 The Electronic Health Record for the Physician's Office Amy DeVore,2015
