Rethinking Humanitarian Intervention in the 21st Century Aiden Warren, 2017-06-02 Since

the end of the Cold War humanitarian interventions have continued to evolve and respond to a wide range of political crises. These insightful essays focus on the challenges associated with interventions when facing conflict and human rights violations, unmitigated systematic violence, state rebuilding, human mobility and dislocation. Each chapter is linked to the rest through three defining themes that permeate the book: the evolution of humanitarian interventions in a global era, the limits of sovereignty and the ethics of interventions, and the politics of post-intervention rebuilding and humanitarian engagement. The authors incorporate a variety of case studies including Kosovo, Timor-Leste, Syria, Libya, and Iraq, and examine the complexity of interventions across their different dimensions, including relevant doctrines such as R2P, Use of Force, and Human Security.

Researching the Military Helena Carreiras, Celso Castro, Sabina Frederic, 2016-03-02. *Researching the Military* focuses on the experiences of researchers who study the military around the world. It explores the historical, social, institutional, and personal factors that frame research and scrutinize the way knowledge in this area impacts society and policy. More than merely analyzing research experiences, yet necessarily including them, it is also about the experiences of researchers, their position with regard to the object of their studies, the institutional context where they work, and the way their research impacts the academic and policy-making fields in the respective countries. The common theme to the various chapters is reflexivity, a conscious effort at addressing the conditions of research and the position of the researcher and the research participants in that interface. By collecting diverse experiences of researchers from across the world, this volume aims to enhance reflexivity in the field of military studies and to encourage the exchange of knowledge between the academic field and the military arena. This book will be of much interest to students of military studies, research methods, sociology, social anthropology, and security studies in general.

Transnational Histories of Southern Africa's Liberation Movements Jocelyn Alexander, JoAnn McGregor, Blessing-Miles Tendi, 2020-05-21. *Transnational Histories of Southern Africa's Liberation Movements* offers new perspectives on southern Africa's wars of national liberation, drawing on extensive oral, historical, and archival research. Assuming neither the primacy of nationalist loyalties as they exist today nor any single path to liberation, the book unpicks any notion of a straightforward imposition of Cold War ideologies or strategic interests on liberation wars. This approach adds new dimensions to the rich literatures on the Global Cold War and on solidarity movements. The contributors trace the ways that ideas and practices were made, adopted, and circulated through time and space through a focus on African soldiers, politicians, and diplomats. The book also asks what motivated the men and women who crossed borders to join liberation movements, how Cold War influences were acted upon, interpreted, and used, and why certain moments, venues, and relations took on exaggerated importance. The connections among liberation movements, between them and their hosts, and across an extraordinarily diverse set of external actors reveal surprising exchanges and lasting legacies that have too often been obscured by the assertion of monolithic national histories. Tracing an extraordinarily diverse set of interactions and exchanges, *Transnational Histories of Southern Africa's Liberation Movements* will be of great

interest to scholars of Southern Africa Transnational History the Cold War and African Politics The chapters were originally published as a special issue of the Journal of Southern African Studies **Special Operations Success** James D. Kiras, 2024-10-24 Special Operations Success establishes a new benchmark in military theory in this deeply analytic and innovative work It answers several pressing questions How successful have American special operations been over the past quarter century Are special forces fated to cycles of expansion and misuse Will special forces invariably exceed the authorities granted to them because of they are Is a general theory of special operations feasible given the range of activities and conditions that fall under the category Kiras work is based on two decades of practical teaching and consulting experience within different special operations communities and its analysis and conclusions are designed to inform practitioners policymakers educators and the general public The book develops a framework in the form of a theory comprising capabilities and control for the comprehensively evaluating special operations success and is divided into three parts Part I lays the foundation for a general theory of special operations Part II explores the two component parts of theory capabilities and control and Part III uses various aspects of the theory depending on available information to assess the success of special operations over a twenty year period in the United Kingdom South Africa and the United States

Rivers of ink have dealt with the end goals of transitional justice but victims require us to take the quest for human rights beyond the normative realm of theorizing justice and into the practical realm of engaging how to implement justice initiatives.
