Alexander Ludeke,2017-11-30 The Soviet Union had already begun building an armored industry as early as the 1920s Although initially limited to reconstructing and developing Western European armored vehicles an independent line of powerful and easy to produce models had been established by 1939 Even after the Second World War the USSR expanded its armament force considerably even planning to cross western Europe in a massive armoured wave in the event of any conflict with NATO In this book Alexander Ludeke looks at all the important Soviet tanks that were built from 1917 up until the end of the Second World War **Modern Soviet Armor** Steve Zaloga,1979 **Soviet Cold War Weaponry** Anthony

Tucker-Jones,2015-05-20 The T 54 T 62 and T 72 main battle tanks along with the personnel carriers assault guns self propelled guns and anti tank missiles that are illustrated in this photographic history represent the high point in the design and manufacture of armoured vehicles by the Soviet Union during the Cold War Although the superpowers never came to blows the Cold War was far from cold as numerous hot proxy wars were fought in Africa and the Middle East and these conflicts employed the Soviet weaponry that is shown in action in the colour and black and white photographs selected for this book Between the 1950s and 1980s Soviet and Warsaw Pact countries produced thousands of tanks and armoured vehicles ready for the Third World War They embarked on a technological arms race with the NATO allies in an attempt to counter each new piece of equipment as it appeared in service Much of this Soviet weaponry has achieved almost iconic status and despite its age remains in service with armies guerrilla forces and terrorist organizations around the world today It is also of enduring interest to collectors re enactors and modellers who are fascinated by the military equipment of the late twentieth century **Soviet Cold War Weaponry** Anthony Tucker-Jones,2015 US Cold War Tanks and Armoured

Fighting Vehicles Michael Green,2020-11-12 This expert study of the U S military s armored vehicles deployed during the Cold War features rare photographs from the wartime archives To counter the Soviet threat and that of their client States during the Cold War years 1949 1991 the American military deployed an impressive range of main battle tanks and armored fighting vehicles Expert author Michael Green presents a detailed study of these vehicles and their variants in this informative volume of stunning wartime photographs The Patton series of medium main battle tanks including the M46 M47 and M48 supplemented by the M103s Heavy Tank initially formed the core of the US tank fleet In 1960 the M60 MBT entered service and in turn was replaced by the M1 Abrams in 1980 In support were armored reconnaissance vehicles progressively the M41 bull dog 1951 the M114 1961 the M551 Sheridan 1967 and M3 Bradley Cavalry Fighting Vehicle 1981 The armored personnel carrier range included the ubiquitous M113 and its replacement the M2 Bradley cousin of the M3 All of these vehicles are covered in this highly detailed volume in the Images of War series Soviet Tank Company Tactics Defense Intelligence Agency,2019-07-25 Soviet Tank Company Tactics May 1976 We were surprised to find there were no

clean copies in print so we decided to reconstitute the report as best we could Unfortunately the photos are not very good and the originals are nowhere to be found so we did not replace them Rather than change the document we decided to add a new document at the end that would show current 2019 Russian tanks and include what little information is available As far as tactics go not really sure how the new tanks such as the T 14 will cause changes to Russian tank tactics but some of the information is still valid today such as the use of snorkel night vision and the effects of poor weather conditions You will note that we added some additional information regarding Russian New Generation Warfare RNGW 4th Generation Warfare Hybrid War and new Russian weapons at the end including 1K17 Szhatie 1 17 Russian Stiletto Laser Tank Combat Laser System Peresvet Russian Laser Cannon T 14 Armata Main Battle Tank T 15 Heavy Infantry Combat Vehicle Kurganets 25 Light Tracked Armored Vehicle 2S35 Koalitsiya SV 152 mm Self Propelled Howitzer VPK 7829 Bumerang Modular Infantry Wheeled Fighting Vehicle Why buy a book you can download for free We print the paperback book so you don t have to First you gotta find a good clean legible copy and make sure it s the latest version not always easy Some documents found on the web are missing some pages or the image quality is so poor they are difficult to read If you find a good copy you could print it using a network printer you share with 100 other people typically its either out of paper or toner If it s just a 10 page document no problem but if it s 250 pages you will need to punch 3 holes in all those pages and put it in a 3 ring binder Takes at least an hour It s much more cost effective to just order the bound paperback from Amazon com This book includes original commentary which is copyright material Note that government documents are in the public domain We print these paperbacks as a service so you don t have to The books are compact tightly bound paperback full size 8 1 2 by 11 inches with large text and glossy covers 4th Watch Publishing Co is a HUBZONE SDVOSB <https://usgovpub.com>

Red Army Auxiliary Armoured Vehicles, 1930-1945 Alexey Tarasov, 2021-07-07 During the 1930s in the Soviet Union a remarkable range of auxiliary armoured vehicles were produced for the Red Army which have rarely had the attention they deserve and Alexey Tarasov s photographic history is the ideal guide to them These innovative designs demonstrate the diversity and innovation of the Soviet arms industry Among them were armoured flails ambulances bridge layers flame throwers and amphibious cars which prefigure similar designs made by western engineers during the Second World War As this selection of rare photographs shows Soviet designers were in many ways ahead of their time and it was short sighted internal policy and the shortcomings of Soviet industry which led to the cancellation or postponement of many of these promising projects As a result when faced with Operation Barbarossa in 1941 the Red Army lacked the auxiliary armour that would have helped to stem the German advance Alexey Tarasov s in depth research and the rare photographs he has assembled give a fascinating insight into a little known aspect of the history of Soviet armoured vehicles

Russian Tanks and Armored Fighting Vehicles, 1917-1945 Wolfgang Fleischer, 1999 This book describes in excellent detail and striking photos many unpublished the development and amassing of Russias armored vehicles from World War I through World War II Included in this text are

those models that did not make it to production and also the history behind Russias tank development including the numerous foreign models that it based its designs on This book is a superb reference for historians and modellers *Tanks of the USSR 1917-1945* Alexander Ludeke,2018-01-23 The Soviet Union had already begun building an armored industry as early as the 1920s Although initially limited to reconstructing and developing Western European armored vehicles an independent line of powerful and easy to produce models had been established by 1939 Even after the Second World War the USSR expanded its armament force considerably even planning to cross western Europe in a massive armored wave in the event of any conflict with NATO In this book Alexander L deke looks at all the important Soviet tanks that were built from 1917 up until the end of the Second World War *Russian Tanks of World War II* Tim Bean,Will Fowler,2002 At the start of the campaign on the Eastern Front in the earliest days of Operation Barbarossa it was the German armour that swept all in front of it as the Wehrmacht drove eastwards in an unrelenting advance on Leningrad Moscow and Stalingrad The ill prepared and under resourced Russian forces were forced to retreat Gradually the balance of the war swung in favour of the Russian forces whose strength both in numbers and equipment proved decisive in the ultimate defeat of the German forces in the east Critical in the Soviet victory was its armour tanks such as the T 34 proving the equal if not better than some of the tanks available to the Germans This authoritative history of the Soviet forces before and during World War 2 reveals the development of their tactics in the early post revolutionary era right through to the ultimate victory in Berlin in May 1945 The dramatic struggle of the tank crews against the German advance is told through some 200 contemporary photographs many of which have never been seen before The photographs include images of tank training in the 1920s and 1930s on active service and many compelling pictures from some of the major tank battles of the day Over the past five years aided by the opening up of archives in Russia previously closed to western experts there has been a massive growth in interest in the events that occurred on the Eastern Front Russian Tanks is an important addition to the literature currently available exploring as it does the vitally important Soviet armour of the period *Russian and Soviet Tanks 1914-1941* Maximino Argüelles Martinez,2014-02-17 About the evolution of the Soviet offensive doctrine during World War II Where did this doctrine and armored formations that takes practice arise Why was the USSR as a nation which in 1940 developed a tank as advanced as the T 34 100 pages trying to answer these and other questions with a description of the principal armored vehicles and the formations in which were integrated from its beginnings in the Russian Empire until June 22 1941 **The Tanks of Operation Barbarossa** Boris Kavalerchik,2020-01-31 An absorbing study of the tanks and the tank tactics of the Red Army and the Wehrmacht during the Axis invasion of the Soviet Union in World War II When the Germans invaded the Soviet Union in 1941 the Red Army had four times as many tanks as the Wehrmacht and their tanks were seemingly superior yet the Wehrmacht won the border battles with extraordinary ease The Red Army s tank force was pushed aside and for the most part annihilated How was this victory achieved and were the Soviet tanks really as well designed as is often believed

These are the basic questions Boris Kavalerchik answers in this compelling study of tank warfare on the Eastern Front. Drawing on technical and operational documents from Russian archives many of which were classified until recently and are unknown to Western readers he compares the strengths and weakness of the tanks and the different ways in which they were used by the opposing armies. His work will be essential reading for military historians who are interested in the development of armored warfare and in this aspect of the struggle on the Eastern Front. So much has been written on this subject and yet this book dispels myths and offers fresh insights in a study of Soviet and German tanks at the beginning of the war on the Eastern Front. A fascinating selection of images. Firetrench. This book is highly recommended due to the excellent use of data, the organization of the book established by the author and thoughtful and comprehensive coverage of the subject. IPMS USA
