From City Space to Cyberspace Amanda Wasielewski, 2025-10-01 The narrative of the birth of internet culture often focuses on the achievements of American entrepreneurs in Silicon Valley but there is an alternative history of internet pioneers in Europe who developed their own model of network culture in the early 1990s Drawing from their experiences in the leftist and anarchist movements of the 80s they built DIY networks that give us a glimpse into what internet culture could have been if it were in the hands of squatters hackers punks artists and activists In the Dutch scene the early internet was intimately tied to the aesthetics and politics of squatting Untethered from profit motives these artists and activists aimed to create a decentralized tool that would democratize culture and promote open and free exchange of information [Living Law](#) Sandro Chignola, 2024-07-12 This book offers a radical new understanding of law beyond the confines of its formalization by the state The book takes off from the late work of Gilles Deleuze and Michel Foucault for whom law and its institutions came to be liberated from an ideological perspective that had treated them as sterile instruments for the reproduction of domination Engaging its continental history it addresses the concept of law not merely as a command but as the result of a much more complex legal operation aimed at dynamically stabilizing the social relations of a community The book thus sidesteps the usual legal political focus on those from Hobbes to Schmitt who have contributed to the categorical scheme of the modern state and with it questions of political representation sovereignty the rigid distinction between public law and private law and so on as it pursues an alternative theoretical trajectory through Ravaissou Tarde and Hauriou Politics the book maintains can no longer be treated simply through the state form And relatedly the law must be seen as a living law a law that cannot be treated exclusively in formal terms but must be taken as a grammar capable of articulating a politics of

process relationality and innovation Reconceived as such law can then circumvent the aporias that arise when society is viewed as a private company and the state seen as the bearer of the only possible means of formalizing its relationships At the intersection of law and political theory this book will speak to scholars and others with interests in both these areas and especially those concerned with the limits of both conventional and critical approaches to law *Ancient Mythological Images and their Interpretation* Katharina Lorenz,2016-08-18 When we try to make sense of pictures what do we gain when we use a particular method and what might we be missing or even losing Empirical experimentation on three types of mythological imagery a Classical Greek pot a frieze from Hellenistic Pergamon and a second century CE Roman sarcophagus enables Katharina Lorenz to demonstrate how theoretical approaches to images specifically iconology semiotics and image studies impact the meanings we elicit from Greek and Roman art A guide to Classical images of myth and also a critical history of Classical archaeology s attempts to give meaning to pictures this book establishes a dialogue with the wider field of art history and proposes a new framework for the study of ancient visual culture It will be essential reading not just for students of classical art history and archaeology but for anyone interested in the possibilities and the history of studying visual culture **British Bee Journal, and Bee Keeper's Adviser** ,1883 British Bee Journal & Bee-keepers Adviser ,1883 **Les Transformateurs Duchamp/Duchamp's TRANS/formers** Jean-François Lyotard,2010 This collection of essays written between 1974 and 1977 in the midst of Duchamp s rediscovery in France was published by Editions Galil e Paris in 1977 and in English translation by the Lapis Press Los Angeles in 1990 *Real and Imaginary Spaces in Tom Stoppard's Plays* Nevin Gürbüz-Blaich,2025-06-02 This study benefits from the terminology of geocriticism a literary criticism that suggests an interdisciplinary approach to the exploration of literature in relation to space and place and refers to the spatial theories of Lefebvre Foucault Bakhtin Aug and Certeau as well as to Issacharoff s study of dramatic space Proposing a multidisciplinary perspective the book analyzes the mimetic and diegetic spaces in four of Tom Stoppard s plays *Rosencrantz and Guildenstern Are Dead* 1966 *Travesties* 1974 *Arcadia* 1993 and *Indian Ink* 1995 Stoppard s plays from the 1960s to the 2000s portray different spaces including urban spaces cities landscapes rooms and fictional sites thus serving as exceptional textual sources in spatial literary studies **Mathematical Reviews** ,2005 *Amigas y Amantes* Katie L. Acosta,2013-10-30 *Amigas y Amantes* Friends and Lovers explores the experiences of sexually nonconforming Latinas in the creation and maintenance of families It is based on forty two in depth ethnographic interviews with women who identify as lesbian bisexual or queer LBQ Additionally it draws from fourteen months of participant observation at LBQ Latina events that Katie L Acosta conducted in 2007 and 2008 in a major northeast city With this data Acosta examines how LBQ Latinas manage loving relationships with the families who raised them and with their partners their children and their friends Acosta investigates how sexually nonconforming Latinas negotiate cultural expectations combat compulsory heterosexuality and reconcile tensions with their families She offers a new way of thinking about the emotion work involved in everyday lives

which highlights the informal sometimes invisible labor required in preserving family ties Acosta contends that the work LBQ Latinas take on to preserve connections with biological families lovers and children results in a unique way of doing family

Paying particular attention to the negotiations that LBQ Latinas undertake in an effort to maintain familial order Amigas y Amantes explores how they understand femininity how they negotiate their religious faiths how they face the unique challenges of being in interracial interethnic relationships and how they raise their children while integrating their families of origin

Principia Amoris John Mordechai Gottman, 2014-10-10 Stereotypically science and emotion are diametric opposites one is cold and unfeeling the other soft and nebulous one is based on proven facts while the other is based on inexplicable feelings and never the twain shall meet until now John Gottman delves into the unquantifiable realm of love armed with science and logic and emerges with the knowledge that relationships can be not only understood but also predicted as well Based on research done at his Love Lab and other laboratories Gottman has discovered that the future of love relationships can be predicted with a startling 91% success rate These predictions can help couples to prevent disasters in their relationships recognize the signs of a promising relationship and perhaps more importantly recognize the signs of a doomed one *Principia Amoris* also introduces Love Equations a mathematical modeling of relationships that helps understand predictions Love Equations are powerful tools that can prevent relationship distress and heal ailing relationships Readers learn about the various research and studies that were done to discover the science behind love and are treated to a history of the people ideas and events that shaped our current understanding They also learn about The Four Horsemen of the Apocalypse 45 natural principles of love 5 couple types 5 recipes for good relationships And much more Just as science helped us to understand the physical world it is helping us to understand the emotional world as well Using the insights in this book mental health professionals can meaningfully help their distressed clients as well as better understand why a relationship is failing or succeeding Appropriate for the curious non mental health professional as well *Principia Amoris* is a must have on any bookshelf
