Geeslin,Avizia Y.

Long,Megan Solon,2021-04-22 This volume offers an introduction to the field of second language acquisition with a particular focus on second language Spanish It connects key issues in the acquisition of Spanish as a second language to theoretical and empirical issues in the field of second language acquisition more generally by exemplifying central concepts in second language acquisition through the exploration of the most widely researched structures and most recent developments in the field of second language Spanish It is written for a non specialist audience making it suitable for advanced undergraduate and graduate courses and readers while its treatment of recent empirical developments also makes it of interest to researchers in second language Spanish as well as allied fields

Crosslinguistic Approaches to Language Analysis

Mihaela Tănase-Dogaru,Alina Tigău,Ioana Stoicescu,2023-11-28 This volume presents cutting edge linguistic research across the fields of syntax semantics morphology translation studies language acquisition and phonology It explores key topics such as bare partitives differential object marking the role of clitics the semantics of grammatical and situational aspect and existential quantifiers The data come from English Greek Hungarian Romanian and other Romance languages Several papers also focus on the issues posed by the translation of various challenging structures into Romanian and other European languages *Political Theory, History, and Modern Practice for the Common Good* Ocaña, Antonio Cortijo,Martines,

Vicent,2025-11-10 Political theory shapes the foundations of governance justice and civic life across cultures From

democratic ideals to social contract theories these ideas continue to influence modern political practices and institutions Historical developments reveal how struggles for power rights and representation evolve reflecting changing understandings of the common good In today s complex political landscape the application of these theories remains central to addressing issues of inequality public policy and collective responsibility Exploring the interplay between theory history and practice reveals how political thought can guide societies toward more just and inclusive futures **Political Theory History and Modern Practice for the Common Good** explores the evolution of political theory from historical foundations to its influence on contemporary governance and public policy It examines how classical and modern political ideas are applied in practice to promote justice democracy and the common good in today s societies This book covers topics such as ethics and law civil justice and public policy and is a useful resource for government officials policymakers educators academicians researchers and political scientists *Entrepreneurial Ecosystems* Allan O'Connor,Erik Stam,Fiona Sussan,David B.

Audretsch,2017-12-30 This book features latest research insights into the study of the entrepreneurial ecosystem The focus is on understanding its influence on the development of socially and physically defined places and how these factors are related with each other The book argues that regardless of how the concept of a place is defined be it cities regions nations or otherwise the impact of new technologies will influence much of our business social and economic landscapes Evidently there is an increasing pressure on places to embrace new opportunities for strategic development and confront complacency The solution may very well be in creating and sustaining entrepreneurial ecosystems where entrepreneurial action thrives and innovation drives the new economy **Differential Object Marking in Romance** Monica Alexandrina Irimia,Alexandru

Mardale,2023-12-15 Differential marking as applied to direct objects has long been discussed as one of the characterizing traits of many Romance languages There is however wide consensus that a detailed investigation into the nature of this phenomenon raises numerous challenges both at the empirical and theoretical level Many questions are still being raised regarding which precise morpho syntactic strategies count as differential object marking whether the data can be unified and subsequently how they are to be unified formally and theoretically Additionally a thorough investigation of this phenomenon is still needed for many Romance languages and especially at the micro variation level This volume brings together original papers addressing various aspects of differential object marking in Romance languages focusing on micro variation from both a descriptive and formal perspective touching on diachrony language contact synchrony and using a large set of methodologies **The Oxford Handbook of Banking** Allen N. The NHS Ellen Welch,2021-01-13 A history of Britain s healthcare system from the Victorian era to the post World War II beginnings of the NHS to the Coronavirus pandemic The Coronavirus pandemic in 2020 has changed life as we know it and thrust the NHS into the spotlight A nation in lockdown has adorned windows with rainbows and stepped onto doorsteps every Thursday to celebrate the people who are risking their lives by turning up to work But as the grim reports of deaths from the disease cumulate along with stories of insufficient protective equipment for staff there is hope that the crisis will raise awareness and bring change to the way the NHS and its people are treated At midnight on 5 July 1948 the National Health Service was born with the founding principal to be free at the point of use and based on clinical need rather than on a person s ability to pay Over seventy years since its formation these core principals still hold true but the world has changed Persistent underfunding has not kept pace with increased demand for healthcare leading to longer waiting times staffing shortages and low morale This book traces the history of our health service from Victorian healthcare and the early 20th century through a timeline of change to the current day comparing the problems and illnesses of 1948 to those we face today Politics and funding are demystified and the effects of the pandemic are discussed alongside personal stories from frontline staff and patients who have experienced our changing NHS Ellen s book takes us on an emotional journey through the history of our beloved NHS This should be compulsory reading for anyone who thinks the NHS is safe in the hands of anyone but the Labour Party Absolutely enthralling Books Monthly

How and Why Does Spatial-Hearing Ability Differ among Listeners? What Is the Role of Learning and Multisensory Interactions? Guillaume Andéol,Brian D. Simpson,Ewan A. Macpherson,2016-08-29 Spatial hearing ability has been found to vary widely across listeners A survey of the existing auditory space perception

literature suggests that three main types of factors may account for this variability physical factors e g acoustical characteristics related to sound localization cues perceptual factors e g sensory cognitive processing perceptual learning multisensory interactions and methodological factors e g differences in stimulus presentation methods across studies However the extent to which these and perhaps other still unidentified factors actually contribute to the observed variability in spatial hearing across individuals with normal hearing or within special populations e g hearing impaired listeners remains largely unknown Likewise the role of perceptual learning and multisensory interactions in the emergence of a multimodal but unified representation of auditory space is still an active topic of research A better characterization and understanding of the determinants of inter individual variability in spatial hearing and of its relationship with perceptual learning and multisensory interactions would have numerous benefits In particular it would enhance the design of rehabilitative devices and of human machine interfaces involving auditory or multimodal space perception such as virtual auditory multimodal displays in aeronautics or navigational aids for the visually impaired For this Research Topic we have considered manuscripts that present new methods or review existing methods for the study of inter individual differences present new data or review existing data concerning acoustical features relevant for explaining inter individual differences in sound localization performance present new or review existing psychophysical or neurophysiological findings concerning spatial hearing and or auditory perceptual learning and or multisensory interactions in humans normal or impaired young or older listeners or other species discuss the influence of inter individual differences on the design and use of assistive listening devices rehabilitation or human machine interfaces involving spatial hearing or multimodal perception of space ergonomics
