The Evolution of Paleolithic Technologies Steven L. Kuhn, 2020-09-14 The Evolution of Paleolithic Technologies provides a novel perspective on long term trajectories of evolutionary change in Paleolithic tools and tool makers Members of the human lineage have been producing stone tools for more than 3 million years These artefacts provide key evidence for important evolutionary developments in hominin behaviour and cognition Avoiding conventional approaches based on progressive stages of development this book instead examines global trends in six separate dimensions of technological behaviour between 2.6 million and 10 000 years ago Combining these independent trends results in both a broader and a more finely punctuated perspective on key intervals of change in hominin behaviour To draw this picture together the concluding section explores behavioural cognitive and demographic implications of developments in material culture and technological procedures at seven key intervals during the Pleistocene Researchers interested in Paleolithic archaeology will find this book invaluable It will also be of interest to archaeologists researching stone tool technology and to students of human evolution and behavioural change in prehistory

Osseous Projectile Weaponry Michelle C.

Langley, 2017-01-27 This volume presents the current state of knowledge on the osseous projectile weaponry that was produced by Pleistocene cultures across the globe Through cross cultural and temporal comparison of manufacturing methods design use methods and associated technology chapters in this volume identify and discuss differences and similarities between these Pleistocene cultures The central research questions addressed in this volume include a how did osseous weaponry technology develop and change through time and can these changes be tied to environmental and or social influences b how did different Pleistocene cultures design and adapt their osseous weaponry technology to their environment as well as changes in that environment and c can we identify cultural interaction between neighboring groups through the analysis of osseous weapons technology and if so can we use these items to track the movement of peoples and or ideas

across the landscape Through addressing these three central research questions this volume creates an integrated understanding of osseous technology during a vital period in Modern Human cultural development which will be useful for students and advanced researchers alike **A Global History of The Earlier Palaeolithic** Mark J. White,2022-10-10 This book tells the story of both the ancient humans who made handaxes and the thoughts and ideas of scholars who have spent their lives trying to understand them Beginning with the earliest known finds this volume provides a linear and thematic account of the history of the Old Stone Age or Palaeolithic period covering major discoveries interpretations and debates worldwide a story that takes us from the embers of the Great Fire of London to the beginning of the Covid 19 pandemic It offers a comprehensive and unique history of archaeological theory and interpretation seeking to explain how we know what we know about the deep past and how ideas about it have changed over time reflecting both scientific and societal change At its heart lies the quest for an answer to a most curious and sometimes beautiful tool ever made the handaxe While focused on the Earlier Palaeolithic period the book provides a readable account of how ideas about the prehistoric past generally were formed and altered showing how the wider discipline came to be dominated by a succession of different theoretical paradigms each seeking different answers from the same data set Serving a dual purpose as a historical narrative and as a reference source this book will be of interest to all students and researchers interested in deep human prehistory and evolution archaeological theory and the history of archaeology Archaeology and World Prehistory Christopher R. DeCorse,2025-11-06 Archaeology and World Prehistory Unearthing Our Past emphasizes the interdisciplinary nature of the field and its interconnectedness with the four fields of anthropology sciences humanities and beyond Students new to archaeology will learn key theories and methodologies through rich examples from field work and prehistory Christopher R DeCorse challenges ethnocentrism and essentialism by highlighting the differences and similarities across cultures encouraging critical thinking cultural appreciation and global awareness *PaleoAmerican Archaeology in Virginia* Wm Jack Hranicky,2017-10-10 This book is a full color study of over 500 pre Clovis stone artifacts of Virginia With the 22K year date of the Cinmar bipoint in Virginia there is ample evidence of artifact classes that are older than Clovis Over 50 tool types are illustrated and discussed Artifact single site collections are documented The book argues the differences between Holocene biface technology with the blade and core technology of the Pleistocene era The requirements for identifying Pleistocene artifacts is presented such as platforms remaining cortex and invasive retouch They are presented in a tool model Major stones namely jasper are discussed as a lithic determinism The east coast distribution is presented for various tool types Additionally as a major focus cross Atlantic flake blade identical tools from Europe are illustrated with Middle Atlantic artifacts Artifact ergonomics such as right left handed tools hypothetical tool center are argued Structural and functional axis are shown and described on how to identify them on tools Overall this book presents an initiating view of the archaeology needed to study Pleistocene era artifacts on the American east coast *Neanderthal Language* Rudolf Botha,2020-05-21 Did

Neanderthals have language and if so what was it like Scientists agree overall that the behaviour and cognition of Neanderthals resemble that of early modern humans in important ways However the existence and nature of Neanderthal language remains a controversial topic The first in depth treatment of this intriguing subject this book comes to the unique conclusion that collective hunting is a better window on Neanderthal language than other behaviours It argues that Neanderthal hunters employed linguistic signs akin to those of modern language but lacked complex grammar Rudolf Botha unpacks and appraises important inferences drawn by researchers working in relevant branches of archaeology and other prehistorical fields and uses a large range of multidisciplinary literature to bolster his arguments An important contribution to this lively field this book will become a landmark book for students and scholars alike in essence illuminating Neanderthals linguistic powers

Biolinguistic Investigations and the Formal Language Hierarchy

Juan Uriagereka, 2018-06-14 This volume collects some of Juan Uriagereka's previously published pieces and presentations on biolinguistics in recent years in one comprehensive volume. The book's introduction lays the foundation for the field of biolinguistics which looks to integrate concepts from the natural sciences in the analysis of natural language situating the discussion within the minimalist framework. The volume then highlights eight of the author's key papers from the literature some co-authored representative of both the architectural and evolutionary considerations to be taken into account within biolinguistic research. The book culminates in a final chapter showcasing the body of work being done on biolinguistics within the research program at the University of Maryland and their implications for interdisciplinary research and future directions for the field. This volume is essential reading for students and scholars interested in the interface between language and the natural sciences including linguistics syntax biology archaeology and anthropology.

The Emergence of Pressure Blade Making Pierre M. Desrosiers, 2012-03-13 Human development is a long and steady process that began with stone tool making. Because of this skill humans were able to adapt to climate changes discover new territories and invent new technologies. Pressure knapping is the common term for one method of creating stone tools where a larger device or blade specifically made for this purpose is used to press out the stone tool. Pressure knapping was invented in different locations and at different points in time representing the adoption of the Neolithic way of life in the Old world. Recent research on pressure knapping has led for the first time to a global thesis on this technique. The contributors to this seminal work combine research findings on pressure knapping from different cultures around the globe to develop a cohesive theory. This contribution to this volume represents a significant development to research on pressure knapping as well as the field of lithic studies in general. This work will be an important reference for anyone studying the Paleolithic Mesolithic and Neolithic periods lithic studies technologies and more generally cultural transmission.

Quaternary Geoarchaeology of India Nupur Tiwari, Vivek Kumar Singh, S. Mehra, 2023-03-29 The Quaternary Period in South Asia has a very prolonged and diverse history. Within this region India represents various technological and cultural phases of hominin occupation adapting to different ecological zones throughout the Quaternary Period. The earliest records of this occupation can be traced back to 1.5 Ma ago and possibly to c. 2 Ma ago. Archaeological evidence has been reported from all known phases in India showing a continuous record of occupation from the Early Pleistocene onwards and reflecting adaptation by multiple hominin species over time. This book aims to highlight recent advances in the Quaternary geoarchaeology by showcasing diverse methods such as archaeology geology palaeoclimatology sedimentology GIS remote sensing and taphonomy. It presents a collection of papers that address various geoarchaeological aspects from different regions in India within the time frame of the Early Pleistocene to Anthropocene. This volume provides an opportunity for new data to be disseminated particularly by young researchers and within the framework of worldwide research issues it promotes new geoarchaeological perspectives from India.
