Space Planning And Design Future Megacities:

Space, Planning, and Design Elke Pahl-Weber, Frank Schwartz, 2014 The book focuses on five emerging megacities and mega urban regions across the globe Located in different climatic areas determined by different economic development conditions and political frameworks each city has to address different local challenges Based on various case studies and pilot projects the book shows the early conceptualisation and the further organisation of integrative spatial planning and urban design for sustainable and more energy efficient urban structures and the adaptation of cities to climate change

Urban Planning and Design for Megacities in the Global South Mohammed Firoz C, Bharat Dahiya, Lakshmi Priya Rajendran, Lalit Kumar Dashora, Uday Chatterjee, 2025-01-31 This anthology Urban Planning and Design for Megacities in the Global South Smart and Sustainable Development sheds light on the intricate dynamics of megacity growth in the Global South It has compiled a rich and diverse array of evidence based case studies fostering discussions on emerging issues strategies and solutions for the enhanced planning and development of megacities in the Global South By delving into the underlying factors propelling this rapid urban expansion such as economic opportunities rural to urban migration and natural population growth this volume analyzes the complex interplay of socio economic environmental and political forces shaping city regional landscapes Examining the growth of megacities offers invaluable insights into the challenges and opportunities associated with urbanization in the 21st century Furthermore some cities that have not yet achieved megacity status have also been included in this book to provide a comprehensive understanding of urban growth dynamics and the related factors influencing this growth By studying these rapidly expanding cities their challenges in urban planning and policy implementation can be identified These challenges often include inadequate infrastructure insufficient public services environmental degradation and socio economic disparities In response using case studies the book presents conceptual and empirical strategies to tackle the various problems faced by megacities of the Global South

Urban Landscapes in High-Density Cities Bianca Maria Rinaldi, Puay Yok Tan, 2019-06-04 The positive effects of urban green spaces are well known ranging from the promotion of health support of biodiversity to climate regulation However the practical implementation of urban landscapes is less discussed How can we make these spaces functional economically feasible and inclusive especially as cities become more diverse The publication explores strategies to reconcile the various demands such as food production resilience and nature conservation Indeed urban landscapes have to be restorative ecological and aesthetically pleasing at the same time This is a particular challenge in high density cities like Singapore Seoul or New York where space is a scarce commodity The continuing growth of the worldwide urban population imbues the topic with a special urgency

Sustainable Ho Chi Minh City: Climate Policies for Emerging Mega Cities Antje Katzschner, Michael Waibel, Dirk Schwede, Lutz Katzschner, Michael Schmidt, Harry Storch, 2015-12-01 As climate change and urban development are closely interlinked and often interact negatively this edited volume takes Ho Chi Minh City HCMC Vietnam s first mega urban region

as a case study to analyse its vulnerability to climate change and to suggest measures towards a more sustainable urban development. The book offers an overview on land use planning regarding the aspects of urban flooding, urban climate, urban energy and urban mobility as well as spatial views from the angle of urban planning such as the metropolitan level, the city, the neighbourhood and building level. It shows that to a significant degree measures dealing with climate change can be taken from the toolbox of sustainable urban development and reflects how institutional structures need to change to enhance chances for implementation given socio cultural and economic constraints. This is merged and integrated into a holistic perspective of planning recommendations supporting the municipal government to increase its adaptive capacity. The authors are members of a German government funded research project on how to support HCMC's municipal government to adapt to risks related to climate change.

Megacities Steef Buijs, Wendy Wanyin Tan, Devisari Tunas, 2010. World cities are reaching previously inconceivable sizes and populations. For the last fifteen years The Megacities Foundation has encouraged public debate on this development uniting practitioners from the fields of architecture, economics, geography, sociology and urban planning. This book offers a compilation of the Foundation's best lectures defining megacities and their processes and systems.

Bioregional Planning and Design: Volume I David Fanfani, Alberto Matarán Ruiz, 2020-07-20. This book provides a review of the bioregionalist theory in the field of spatial planning and design as a suitable approach to cope with the growing concerns about the negative effects of metropolization processes and the need for a sustainable transition. The book starts out with a section on rethinking places for community life and discusses the reframing of regional governance and development as well as social justice in spatial planning. It introduces the concept of the urban bioregion, a pivotal concept that underpins balanced polycentric spatial patterns and supports self-reliant and fair local development. The second part of the book focuses on planning and particularly on the issues that arise from the circular recovery of the relation between city and agro ecosystems for integrated planning and resilience of settlements and discusses topics such as foodshed planning, biophilic urbanism and the integration of rural development and spatial planning. This volume sets out the reference framework for Volume II which deals with more specific and operational issues related to spatial policies and settlement design.

The City Uwe Prell, 2022-09-05. In diesem Buch wird der aktuelle Stand der Stadtforschung in den relevanten Disziplinen verständlich dargestellt. Der Autor bietet Einblicke in die Sichtweisen der wichtigsten Disziplinen, die sich mit Stadt-Thematiken beschäftigen wie Soziologie, Geographie, Raum und Stadtplanung, Geschichte, Philosophie und Politikwissenschaft. Dabei berücksichtigt er auch die Sprachphilosophie und zeigt die unterschiedlichen Bedeutungen von stadtbezogenen Begriffen in einem Dutzend Wortsprachen auf. Ein Überblick über die zentralen Ansätze und Theorien sowie deren praktische Anwendung ermöglicht es den Lesern und Leserinnen ein vertrautes Thema aus neuen Perspektiven zu betrachten.
