An Introduction to the Spaceport Industry Janet K. Tinoco, Chunyan Yu, Diane Howard, Ruth E. Stilwell, 2020-05-26 This book provides a contemporary look at spaceports not only from relevant technological drivers policies and legal perspectives but also from impacts associated with airspace use and aviation stakeholders Economic business financial and environmental considerations issues facing airports transitioning to air and space ports and spaceport planning are discussed Through case and event studies research and analysis along with information obtained through professional experience this book provides an overview of the many benefits unique challenges and issues facing commercial spaceports and spaceport operators Each chapter is a standalone key topic such that the reader can focus on the most compelling issues relevant for them or can view the book as an integrated whole for a full perspective While examples and case studies come largely from the United States the reader can draw conclusions that are independent of country and situation Information on other nation state policies and advancements among other topics is provided to give a global perspective further expanding the relevancy and benefits of the book to both domestic and international audiences An Introduction to the Spaceport Industry Runways to Space fills a gap in the literature providing professionals government officials researchers professors and students deep insights into the fast growing commercial spaceport industry *Air Force Civil Engineer*, 1963

Draft Supplemental Environmental Impact Statement: Chapters 1 through 9 United States. Department of the Air Force, 1999 [Lady Astronauts, Lady Engineers, and Naked Ladies](#) Karin Hilck, 2019-07-08 The book Lady Astronauts Lady Engineers and Naked Ladies is a gender history of the American space community and by extension a social history of American society in the twentieth century during the Cold War In order to expand and differentiate the prevalent postwar narrative about gender relations and cultural structures in the United States the book analyzes several different groups of women interacting in different social spaces within the space community It therewith grants insight into the several layers of female participation and agency in the community and the gender and race based obstacles and hurdles the female prospective astronauts scientists engineers artists administrators writers hostesses secretaries and wives were faced with at NASA and in the space industry In each chapter a different social space within the space community is analyzed The spaces where the women lived and worked are researched from a media individual and institutional angle ultimately revealing the differing gender philosophies communicated in the public sphere and the space community workplaces by government and space community officials While women were publicly encouraged to participate in the American space effort to beat the Soviet Union in the race to the moon women had to deal with gender

based barriers which were integral to the structures of the space community just as they were an intrinsic component of all societal structures in the United States in the 1960s The female space workers who were often perceived as disrupters of the prevalent social order in the space community and discriminated by some of their male colleagues and bosses on a personal basis still managed to assert themselves They molded pockets of agency in the space community workspaces without the facilitation of regulations on the part of NASA that might have provided them with easier access or more agency Thus the space community a place of technological innovation was not necessarily also a place of social innovation but a community with a government agency at its center that mainly mirrored the current changing social order conventions and policies in the 1960s as well as in the 1970s and 1980s Nevertheless the women presented in this book were instrumental in advancing and consolidating the social transformation that happened within the space community and the United States and therefore make intriguing subjects of research Thus this systematic analysis of the connection between gender space and the Cold War adds a new dimension to space history as well as expands the discourse in American history about gender relations and the opportunities of women in the twentieth century

The People's Spaceship Amy Paige Kaminski, 2025-07-15 When the Apollo 11 astronauts returned from humanity's first voyage to the moon in 1969 NASA officials advocated for more ambitious missions But with the civil rights movement environmental concerns the Vietnam War and other social crises taking up much of the public's attention they lacked the support to make those ambitions a reality Instead the space agency had to think more modestly and pragmatically crafting a program that could leverage the excitement of Apollo while promising relevance for average Americans The resulting initiative the space shuttle would become the centerpiece of NASA human space flight activity for forty years opening opportunities for the public to engage with and participate in space projects in new ways The People's Spaceship traces how and why NASA painstakingly connected the vehicle to so many segments of society Underscoring the successes and challenges endured in the process Amy Paige Kaminski shares the story of how the space shuttle became an American technological icon

The funding of science and discovery centres Great Britain: Parliament: House of Commons: Science and Technology Committee, 2007-10-22 Examines the role and effectiveness of science centres how science centres are co-ordinated and organised and how they are funded This report also welcomes the offer by the Department for Innovation Universities and Skills to take responsibility for science centres
