Ryan, 2009 Assessment with the WAIS IV is designed as both a teaching text and a reference source for students and professionals The text provides an in depth analysis of a major instrument useful for the cognitive assessment of older adolescents and adults Preface *Structural Learning (Volume 1)* Joseph M. Scandura, 2017-09-13 Originally published in 1973 this book was published in two volumes In the first volume the author describes what he sees as the rudiments of three deterministic partial theories of structural learning The first involves competence partial theories which deal only with the problem of how to account for the various kinds of behavior of which people are typically capable Special attention is given to mathematical competence Nothing is said about learning or performance The second partial theory is concerned with motivation learning and performance under idealized conditions and is obtained from the first partial theory by imposing further structure on it This theory says nothing about memory of the limited capacity of human subjects to process information The final theory is obtained from the second by making additional assumptions which bring memory and finite information processing into the picture The theory is still partial however since no attempt is made to deal with certain ultra short term behavioral phenomena which appear to depend directly on particular physiological characteristics *Algebra and Trigonometry* Cynthia Y.
