Cracking the SAT II. Theodore Silver, Princeton Review (Firm), 2001-03-15. The Princeton Review realizes that acing the SAT II Chemistry exam is very different from getting straight As in school. They don't try to teach students everything there is to know about chemistry; only what they'll need to score higher on the exam. There's a big difference. In *Cracking the SAT II Chemistry*, The Princeton Review will teach test takers how to think like the test makers and learn test-taking strategies that will help students outsmart the test and improve scores. Ace the exam by becoming familiar with the format. Use the Process of Elimination and the divide and conquer method to solve complicated problems. Perfect test-taking skills with practice questions and detailed answer explanations. This book includes 2 full-length simulated SAT II Chemistry exams. All of the sample test questions are just like the ones test takers will see on the actual exam, and every solution is fully explained.

Contents include: I Introduction, II Test Strategies, III Some Basic Stuff: Mass, Volume, Density, Pressure, Energy, Temperature, and Specific Heat, IV Elements, Atoms, and Ions, Atoms and Elements, V Chemical Reaction and Stoichiometry, Molecules, The Mole, Chemical Reactions, Reaction Stoichiometry, Entropy, Enthalpy, Spontaneity, and Gibbs Free Energy, VI Electron configurations and Radioactivity, Electrons and Orbitals, Radioactivity, VII The Periodic Table and Bonding, The Periodic Table, More About the Periodic Table, Some Important Trends, VIII Solids, Liquids, and Gases, Gases, Intermolecular Forces, Phase Changes, Energy and Phase Changes, IX Solutions, Solutions Concentrations, Solubility, and Saturation, X Kinetics and Equilibrium, Kinetics, Factors that Affect Reaction Rate, Reversible Reactions, and Chemical Equilibrium, Le Chatelier's Principle, XI Acids and Bases, Acids and Bases Titration, XII Redox and Electrochemistry, Oxidation and Reduction, Electrochemistry, XIII Organic Chemistry, Hydrocarbons, Functional Groups, XIV Laboratory Safety, Rules, Accuracy, Significant Figures, Lab Procedures, Laboratory Equipment, XV Practice Tests.

HOW TO USE THIS BOOK

What Do I Study First Remember that the SAT II Chemistry Subject Test is designed to test knowledge that has been acquired throughout your education Therefore the best way to prepare for the exam is to refresh yourself by thoroughly studying our review material and taking the sample tests provided in this book They will familiarize you with the types of questions directions and format of the SAT II Chemistry Subject Test To begin your studies read over the review and the suggestions for test taking take one of the practice tests to determine your areas of weakness and then restudy the review material focusing on your specific problem areas The course review includes the information you need to know when taking the exam Be sure to take the remaining practice tests to further test yourself and become familiar with the format of the SAT II Chemistry Subject Test

When Should I Start Studying It is never too early to start studying for the SAT II Chemistry test The earlier you begin the more time you will have to sharpen your skills Do not procrastinate Cramming is not an effective way to study since it does not allow you the time needed to learn the test material The sooner you learn the format of the exam the more comfortable you will be when you take the exam

FORMAT OF THE SAT II CHEMISTRY The SAT II Chemistry is a one hour exam consisting of 85 multiple choice questions The first part of the exam consists of classification questions This question type presents a list of statements or questions that you must match up with a group of choices lettered A through E Each choice may be used once more than once or not at all The exam then shifts to relationship analysis questions which you will answer in a specially numbered section of your answer sheet You will have to determine if each of two statements is true or false and if the second statement is a correct explanation of the first The last section is composed strictly of multiple choice questions with choices lettered A through E

Material Tested The following chart summarizes the distribution of topics covered on the SAT II Chemistry Subject Test

Topic	Percentage	Number of Questions
Atomic	however do not review too much at any one time	
Concentrate on one problem area at a time by reviewing the questions and explanations and by studying our review		

until you are confident you completely understand the material. Keep track of your scores. By doing so you will be able to gauge your progress and discover general weaknesses in particular sections. You should carefully study the reviews that cover your areas of difficulty as this will build your skills in those areas.

TEST TAKING TIPS

Although you may be unfamiliar with standardized tests such as the SAT II Chemistry Subject Test, there are many ways to acquaint yourself with this type of examination and help alleviate your test-taking anxieties. Become comfortable with the format of the exam. When you are practicing to take the SAT II Chemistry Subject Test, simulate the conditions under which you will be taking the actual test. Stay calm and pace yourself. After simulating the test only a couple of times, you will boost your chances of doing well and you will be able to sit down for the actual exam with much more confidence. Know the directions and format for each section of the test. Familiarizing yourself with the directions and format of the exam will not only save you time but will also ensure that you are familiar enough with the SAT II Chemistry Subject Test to avoid nervousness and the mistakes caused by being nervous. Do your scratchwork in the margins of the test booklet. You will not be given scrap paper during the exam and you may not perform scratchwork on your answer sheet. Space is provided in your test booklet to do any necessary work or draw diagrams. If you are unsure of an answer, guess. However, if you do guess, guess wisely. Use the process of elimination by going through each answer to a question and ruling out as many of the answer choices as possible. By eliminating three answer choices, you give yourself a fifty-fifty chance of answering correctly since there will only be two choices left from which to make your guess. Mark your answers in the appropriate spaces on the answer sheet. Fill in the oval that corresponds to your answer darkly, completely, and neatly. You can change your answer, but remember to completely erase your old answer. Any stray lines or unnecessary marks may cause the machine to score your answer incorrectly. When you have finished working on a section, you may want to go back and check to make sure your answers correspond to the correct questions. Marking one answer in the wrong space will throw off the rest of your test, whether it is graded by machine or by hand. You don't have to answer every question. You are not penalized if you do not answer every question. The only penalty results from answering a question incorrectly. Try to use the guessing strategy, but if you are truly stumped by a question, remember that you do not have to answer it. Work quickly and steadily. You have a limited amount of time to work on each section, so you need to work quickly and steadily. Avoid focusing on one problem for too long.

Before the Test

Make sure you know where your test center is well in advance of your test day so you do not get lost on the day of the test. On the night before the test, gather together the materials you will need the next day: Your admission ticket, Two forms of identification (e.g., driver's license, student identification card, or current alien registration card), Two No. 2 pencils with erasers, Directions to the test center. A watch if you wish, but not one that makes noise as it may disturb other test takers. On the day of the test, you should wake up early after a good night's rest and have breakfast. Dress comfortably so that you are not distracted by being too hot or too cold while taking the test. Also plan to arrive at the test center early. This will allow you to collect your thoughts and relax before

the test and will also spare you the stress of being late If you arrive after the test begins you will not be admitted to the test center and you will not receive a refund During the Test When you arrive at the test center try to find a seat where you feel most comfortable Follow all the rules and instructions given by the test supervisor If you do not you risk being dismissed from the test and having your scores canceled Once all the test materials are passed out the test instructor will give you directions for filling out your answer sheet Fill this sheet out carefully since this information will appear on your score report After the Test When you have completed the SAT II Chemistry Subject Test you may hand in your test materials and leave Then go home and relax When Will I Receive My Score Report and What Will It Look Like You should receive your score report about five weeks after you take the test This report will include your scores percentile ranks and interpretive information
