Middup,2016-03-03 The Vietnam War is one of the longest and most controversial in US history This book seeks to explore what lessons the US military took from that conflict as to how and when it was appropriate for the United States to use the enormous military force at its disposal and how these lessons have come to influence and shape US foreign policy in subsequent decades In particular this book will focus on the evolution of the so called Powell Doctrine and the intellectual climate that lead to it The book will do this by examining a series of case studies from the mid 1970s to the present war in Afghanistan War of Necessity, War of Choice Richard N. Haass,2009-05-05 Richard Haass a member of the National Security Council staff in the George H W Bush administration and the State Department director of policy planning for George W Bush reviews the causes and strategies of the first and second Iraq wars while providing a thoughtful examination of the means and ends of U S foreign policy War of Necessity War of Choice part history part memoir provides invaluable insight into some of the most important recent events in the world Additionally this book provides a much needed compass for how the United States can apply the lessons learned from the two Iraq wars so that it is better positioned to put into practice what worked and avoid repeating what so clearly did not In this compelling honest and challenging book by one of the country s most respected voices on foreign policy Haass s assessments are critical yet fair and carry tremendous weight

The Thin Blue Line Conor Foley, 2010-06-15 The idea that we should do something to help those suffering in far off places is the main impulse driving those who care about human rights Yet from Kosovo to Iraq military interventions have gone disastrously wrong The Thin Blue Line describes how in the last twenty years humanitarianism has emerged as a multibillion dollar industry that has played a leading role in defining humanitarian crises and shaping the foreign policy of Western governments and the United Nations Drawing on his own experience of working in over a dozen conflict and post conflict zones Foley shows how the growing influence of international law has been used to override the sovereignty of the poorest countries in the world

Risk and Resolution R. Greg Brown, 2019-05-20 America repeatedly finds itself mired in military interventions long after public buy in to the national interest has waned Why is the timely disengagement of military forces so difficult to achieve Traditional international relations theories diminish the role of the individual leader in favor of the state or international institutions Behavioral science theories have in recent years experienced a resurgence However the dominant behavioral explanation of foreign policy decision making prospect theory while it focuses on how people tend to make decisions under risk still minimizes the influence of the individual president Decisions to disengage military forces are presidential decisions just like the decisions to commit forces to foreign interventions If we accept this then it is important to understand if and if so why some presidents inherently are more or less acceptant of the risks disengagement presents This book operationalizes a competing personality based model of decision making under risk Referred to here as the trait based model it is assessed using disengagement opportunities in three varied levels of military intervention across four presidencies humanitarian relief turned nation building under George H W Bush and Bill Clinton in Somalia compelling air campaigns turned peace making keeping in Bosnia and Kosovo under Clinton and major combat operations turned irregular warfare in Iraq under George W Bush and Barack Obama Data for the model predominantly comes from existing presidential personality profiles based on the dominant model of personality theory the five factor model augmented by Myers Briggs Type Inventory data from public sources This study aims to explain the roughly 30 percent of cases which defy prospect theory s predictions and to better explain those cases where prospect theory might heretofore have sufficed The results suggest specific personality traits do in fact point to presidents predispositions toward risk which in turn help explain their disengagement decisions This work may be only the second to apply the five factor model to presidential foreign policy

decision making and is the first to do so in the context of disengagement decisions Hopefully it will foster further work in both areas
