

14 Labour Markets and Income Inequality

CHAPTER OUTLINE

14.1 WAGE DIFFERENTIALS

14.2 LABOUR UNIONS

14.3 INCOME INEQUALITY

LEARNING OBJECTIVES (LO)

After studying this chapter you will be able to:

- 1 explain wage differentials in both competitive and non-competitive labour markets.
- 2 analyze the possible effects of legislated minimum wages.
- 3 examine the tradeoff unions usually face between wages and employment.
- 4 understand some possible explanations for the recent trend toward rising income inequality.

THE theory of factor-price determination in Chapter 13 tells us a great deal about factor incomes and factor movements. In this chapter, we look specifically at the operation of labour markets. We begin by discussing why some workers get high wages and others get low wages, even in competitive labour markets. We then examine situations where either firms or workers have some market power. We also discuss the effects of legislated minimum wages, as well as the debate surrounding this contentious policy. The chapter then discusses labour unions and the tradeoff they face between increasing their membership and increasing their members' wages. Finally, we examine measures of the distribution of income within a country and discuss the rising

income inequality that has been occurring in many countries, including Canada.

Before getting to these topics, however, we set the stage by examining the broad patterns of employment in Canada over the past century, as shown in Figure 14-1. The share of total employment in agriculture (including fishing) fell from 45 percent in 1891 to about 1.7 percent today, while the share of total employment in services (including government) increased from 20 percent in 1891 to 79 percent today. The combined share for manufacturing, construction, and natural resources (forestry, mining, oil and gas, etc.) has been more stable over the last century, but has been on a gradual downward trend for the past 50 years, falling from about 35 percent in 1951 to about 19 percent today.
