After the war the ship became the SS *Excambion* one of the Four Aces of American Export Lines the only fully air conditioned ships in the world at the time. In 1965 the versatile *Excambion* underwent yet another transformation into a floating classroom. Recommissioned as the USTS *Texas Clipper* the ship began a third life as a merchant marine training vessel with its home port in Galveston. For the next three decades the *Texas Clipper* would be home to merchant marine cadets and by the time it was retired in 1996 it was the oldest active ship in the U.S. merchant marine fleet. Finally the *Texas Clipper* after protracted bureaucratic wrangling was designated to be sunk in the Gulf of Mexico as an artificial reef to provide habitat for marine life. In 2007 the ship was towed to its final resting place seventeen nautical miles off the coast of South Padre Island. Now 136 feet below the surface the venerable *Texas Clipper* lives on as the home to a wide variety of underwater species. Filled not only with meticulously researched technical and historical data about the ship's construction, service record, crew procedures, and voyages [The Ship That Would Not Die](#) also features lively anecdotes from crew members, passengers, and officers. More than 140 color and black and white photos illustrate the ship's construction, its wide variety of shipboard life, the exacting process of making the *Texas Clipper* ready to become an artificial reef, and its final sinking in the Gulf of Mexico. *Popular Mechanics*, 1980-08 *Popular Mechanics* inspires, instructs, and influences readers to help them master the modern world.
