Feature Films in English Language Teaching Britta Viebrock, 2016-07-11 *Feature Films in English Language Teaching* deals with the use of motion pictures in the advanced EFL English as a foreign language classroom. It provides a general introduction to film literacy and explains the rationale, methods and objectives of working with feature films. In addition, the book contains in-depth considerations on sixteen selected films which are grouped regionally: Australia, New Zealand, South Africa, USA, Great Britain. Each chapter describes the topical focus of the film and its central theme and provides background information on social, historical, political and geographical issues. A profound analysis of selected scenes lays the foundation for considerations on the teaching potential of the film. In a download section, the chapters are complemented with ready-to-use teaching materials on film-specific aspects: narrative, dramatic and cinematographic dimensions, which are organised as pre-while-post viewing activities. A glossary on technical terms for film analysis completes the volume. *Leonard Maltin's 2013 Movie Guide* Leonard Maltin, 2012-09-04 NEW More than 16 000 capsule movie reviews with more than 300 new entries NEW More than 13 000 DVD and 13 000 video listings NEW Up-to-date list of mail order and online sources for buying and renting DVDs and videos NEW Completely updated index of leading performers MORE Official motion picture code ratings from G to NC 17 MORE Old and new theatrical and video releases rated to BOMB MORE Exact running times an invaluable guide for recording and for discovering which movies have been edited MORE Reviews of little-known sleepers, foreign films, rarities and classics AND Leonard's personal list of fifty notable debut features, Summer blockbusters and independent sleepers, masterworks of Alfred Hitchcock, Billy Wilder and Martin Scorsese, the timeless comedy of the Marx Brothers and Buster Keaton, animated classics from Walt Disney and Pixar, the finest foreign films ever made. Brammer, Gongqiang Yu, Thomas Schenk, Fabian Haas, 2017-09-01 ISO 5349 developed by ISO Technical Committee ISO TC 108. Mechanical vibration and shock is the generic standard for the measurement and assessment of human vibration exposure. Ever since it was originally published in 1986, this standard has been unclear in its assessment of repeated isolated shocks. The current version of ISO 5349-1:2001 states in its scope that the time dependency for human response to repeated shocks is not fully known. Caution is therefore advised in the application of this part of ISO 5349 to such vibration, isolated

shocks In response to an initiative on the part of the ISO TC 108 Technical Committee a workshop was held at the 13th International Conference on Hand Arm Vibration in Beijing in 2015 for the purpose of determining the current state of knowledge concerning exposure to repeated isolated shock vibration caused by machinery and tools and its pathophysiological and epidemiological assessment and evaluating gaps in knowledge in the interests of future research activity This report contains the papers presented at the workshop Part I provides an overview of the results of the workshop and of details of two papers Part II contains a research report containing background information on two further papers presented at the workshop

moment of Jonathan Field's hospitality before tragedy strikes. A niece ventures into old Jonathan's study at night to ask him a question and finds him stone cold with a revolver by his hand. An obvious suicide it seems, but Inspector Abbott is not so sure. He asks his friend Maud Silver, the brilliant detective, for assistance. She agrees it must be murder. But who is the killer? Assisting their investigation is the dead man's strange habit of fingerprinting all who come to visit. But there are fingerprints all over the house, and solving this murder will require Miss Silver's particularly delicate touch.

Surgery of Complex Abdominal Wall Defects Rifat Latifi, 2017-05-31. As with the first edition, the second edition of this book covers the surgical anatomy of the abdominal wall, pathology of abdominal wall defects such as hernias, enterocutaneous or entero-atmospheric fistulae, and indications for and surgical techniques used to reconstruct the abdominal wall from the practical standpoint. In addition, through a number of illustrations, the placement of mesh in the abdominal wall reconstruction, as well as manipulations of patient's tissue including lateral compartment release techniques and other tissue transfer techniques, are described in detail. The text also covers reconstruction of complex contaminated abdominal wall defects in patients with complex enteric fistulae, stomas, defects created after the excision of previously placed infected prosthetic mesh, and defects associated with acute tissue loss after severe trauma or necrosis of abdominal wall such as necrotizing soft tissue infections. Complex abdominal wall defects in the pediatric population and long-term outcomes and durability of these repairs are also addressed. The second edition of *Surgery of Complex Abdominal Wall Defects* is written by experts in their respective areas from around the world and has been updated thoroughly. As with the first edition, it will continue to serve as a guide for current practice for surgeons, including general trauma, acute care plastic, and reconstructive surgeons.
