Educating for the Anthropocene Peter Sutoris, 2022-11-01 The work of environmental educators and activists in India and South Africa offers new models for schooling and environmental activism Education has never played as critical a role in determining humanity's future as it does in the Anthropocene an era marked by humankind's unprecedented control over the natural environment Drawing on a multisited ethnographic project among schools and activist groups in India and South Africa Peter Sutoris explores education practices in the context of impoverished marginal communities where environmental crises intersect with colonial and racist histories and unsustainable practices He exposes the depoliticizing effects of schooling and examines cross generational knowledge transfer within and beyond formal education Finally he calls for the bridging of schooling and environmental activism to find answers to the global environmental crisis The onset of the Anthropocene challenges the very definition of education and its fundamental goals says Sutoris Researchers must look outside conventional models and practices of education for inspiration if education is to live up to its responsibilities at this critical time For decades environmental activist movements in some countries have wrestled with questions of responsibility and action in the face of environmental destruction they inhabited the mental world of the Anthropocene before much of the rest of the world Sutoris highlights an innovative research methodology of participatory observational filmmaking describing how films made by children in the Indian and South African communities provide a window into the ways that young people make sense of the future of the Anthropocene It is through their capacity to imagine the world differently Sutoris argues that education can reinvent itself

Microbial Niche Nexus Sustaining Environmental Biological Wastewater and Water-Energy-Environment Nexus Senthilkumar Kandasamy, Maulin P Shah, Kavitha Subbiah, Naveenkumar Manickam, 2025-01-15 In most of the industries industrial effluent treatment plants are

playing vital roles to ensure the efficient management of industrial effluent for supporting sustainable development of our society. Due to the technological development, new concepts about future wastewater management are being incorporated by process industries in the whole world, including recyclable resources and energy nutrient recovery from industrial effluent etc. However, conventional treatment methods, including biotechnological methods used in treatment plants, are facing a lot of difficulties due to the strict discharging norms and coming out of new fangled pollutants. Recently, a novel concept, microbial niche, sustaining biological wastewater treatment was introduced, which can accomplish the significant removal of toxic emerging pollutants by different microbial communities with the concern of other components like integrated and healthy ecosystem. The book focuses on research related to future potential and progress of microbial niche based environmental biotechnology, such as microbial enrichment, microbial function, system design, new technological developments, and its applications. Besides, the book reviews important interconnections between water, energy, and the environment, as security in water and energy and the environment is associated with human beings, natural resources, economic, and environmental sustainability. In addition, the book describes innovative green technologies with the aim of enhancing the present state of the art technologies in the various fields like water, energy, the environment, and the related potential fields of industrial wastewater treatment.

Balancing Mountain Tourism, Cultural Heritage, and Environmental Stability Valeri, Marco, Singh, Amrik, Tyagi, Pankaj Kumar, Haghi, A.K., 2025-05-07. Mountain tourism has grown, attracting adventure tourists, vacationers, and nature enthusiasts. However, this rise in popularity comes with complex challenges, including cultural heritage preservation, environmental integrity of mountain regions, and tourism accommodations. Balancing these three elements requires a delicate approach that considers the long-term sustainability of the region. While tourism brings economic benefits and promotes cultural exchange, unchecked growth can lead to environmental degradation, overcrowding, and the erosion of local traditions. This balance requires thoughtful planning, collaboration, and the implementation of sustainable practices. Balancing Mountain Tourism, Cultural Heritage, and Environmental Stability explores the convergence of mountain tourism and environmental stability. It examines how mountain destinations can thrive without sacrificing the qualities that make them unique and valuable. This book covers topics such as ecology, ecotourism, and sustainability, and is a useful resource for tourism professionals, business owners, ecologists, academicians, researchers, and environmental scientists.

Dimensions of Thinking and Cognitive Instruction Beau Fly Jones, Lorna Idol, 2013-05-13. By establishing a conceptual framework and a common language for educators to work together, this volume attempts to answer the challenge facing all teachers: how can students improve the quality of their thinking? Methods of strengthening the thought process include helping students learn to monitor their attention and commitments, asking questions that require students to organize, analyze, and integrate information, setting tasks that involve complex processes such as problem solving and research, and modeling and reinforcing fair-mindedness. *Harcourt Science*, 2000.
