Skills For Care Common Induction Standards Answer:

Working with Children, Young People and Families Billie Oliver, Bob Pitt, 2011-05-16 This book is essential reading for anyone studying and working in the new integrated children's services. The Children's Workforce Development Strategy sets out the basic skills and knowledge needed by people whose work brings them into regular contact with children, young people and their families. Built around this Common Core of Skills and Knowledge and packed with case studies and reflective exercises, this book helps students and practitioners understand the theory behind these issues and develop strategies for embedding them within their own practice. *Healthcare Support Workers* Richard Griffin, 2022-08-26 NHS support workers such as nursing Healthcare Assistants, Maternity Support Workers and Therapy Assistants often provide the majority of face-to-face care to patients, clients and their families. This accessible guide explores the issues underpinning their recruitment, training, management, development and progression. NHS support workers comprise four out of ten of the clinical workforce, yet despite their importance they have long faced barriers that mean they are not able to fully realise their potential. This is the first book to take a comprehensive look at this workforce: its history, the policy that shapes its recruitment, management and deployment, and explains clearly how their capacity and capability can be safely and effectively enhanced. Structured around the employment cycle, this text covers the introduction of Technical Levels, career changes, apprenticeships, recruitment and selection, informal learning, learning cultures, widening participation, supervision and functional skills. Providing practical, evidence-based guidance and including illustrative case studies, it suggests a range of interventions to overcome the long-standing barriers to the effective development and deployment of healthcare support workers. Drawing on the latest research and practice, including the author's own experience, this book is an important resource for all those educating, managing or recruiting unregistered healthcare practitioners. It will also provide invaluable guidance to healthcare support workers interested in progressing their careers. *The Parliamentary Debates (Hansard)*. Great Britain: Parliament. House of Lords, 2013. **Active Ageing and Demographic Change** Siniša Zrinščak, Susan Lawrence, 2017-10-02 Although demographic change has been a widely discussed topic for decades, its scope, social impact and related policy responses leave us with many unresolved social issues. Demographic change is a reality for all European societies, but the ways in which it is taking place differ from country to country. Active ageing, both as a concept and policy response to the demographic ageing of populations, has been widely debated, researched and utilised, informing both policy and practice and providing a common narrative framework to ageing. However, there continues to be a lack of clarity around the precise meaning of active ageing. This book explores the way in which social work is critically engaging with the theme of active ageing in light of, or maybe as a reaction to, the policy responses witnessed within the context of large-scale and rapid demographic change. This book was originally published as a special issue of the *European Journal of Social Work*. *Parliamentary Debates (Hansard)*. Great Britain: Parliament. House of Commons, 2010.
