FLYING TIPS

- When launching the drone, look the same direction as the drone. Green light and green LEDs should be in front.

- Direction, hovering, hovering and landing before attempting to learn other moves.
- Flying 2 to 3 feet above the ground will reduce ground turbulence and make flying easier.
- When first attempting to fly in different directions, start by keeping the direction stick until you have a feel for it. When you are comfortable, slowly until you become comfortable operating the drone.
- Once you've mastered flying in directions, practice rotational controls. Twisting and keeping drone facing the same direction as you raise/fly drone will make more intuitive.
- Stay 2 to 3 feet away from walls and ceilings as drone will be drawn towards them if you fly close.
- If you're flying close to a wall, the drone will be drawn towards the wall. (If you fly close to a wall, the drone will be drawn towards the wall.)
