Cleaner Production Francisco José Gomes da Silva, Ronny Miguel Gouveia, 2019-07-18 This book provides an overview of cleaner production including how regulations have evolved and presents a broad perspective on how it is being developed Presenting several practical examples and applications of modern clean production technologies it provides readers with ideas on how to extend these practices to other industry sectors in order to contribute to a better environment in the future The authors start from the initial concepts of how to implement new cleaner production systems before collecting recent developments in the area and demonstrating practical ways in which the latest knowledge can be applied It motivates readers to develop new ideas on how to improve manufacturing systems to save energy and generate less waste and discusses strategies on how to save reuse and adapt materials as well as techniques to reduce the waste and pollution produced This book serves as a reference resource for industrial management engineers and researchers and is also of interest to undergraduate and postgraduate students looking for insights into cleaner production in industry

The Routledge Handbook of Transport Economics Jonathan Cowie, Stephen Ison, 2017-08-07 The Routledge Handbook of Transport Economics offers the first state of the art overview of the discipline of transport economics as it stands today reflective of key research and policy Transport is an important area of study and one which is problem rich stimulating a great deal of debate in areas which impact on everyday lives Much of this focuses on the practicalities of the modern day phenomenon of mass movement and all of the issues which surround it The discipline of economics is central to this debate and consequently the study and application of transport economics has a chief role to play in seeking to address subjects relating to major transport issues It can be argued that at the very heart of any transport issue or problem lies the underlying economics of the situation understand that and you alleviate the problem

Featuring contributions from world leading scholars and practitioners from across the globe all of the chapters within this book are written from a practical perspective theory is applied and developed using real world examples The book examines concepts issues ideas and practicalities of transport provision in five key topic areas public transport public transport reform economic development and transport modelling transport and the environment freight transport A real strength of the book is in linking theory to practice and hence the economics that are examined in this text are not the economics of the abstract but rather the economics of everyday living Practical and insightful this volume is an essential reference for any student or researcher working in all areas of transport provision ranging from planning appraisal regulation and freight and for all practitioners looking to develop their professional knowledge and who are seeking professional accreditation

Proceedings of the Ninth Padang International Conference on Economics Education, Economics, Business and Management, Accounting and Entrepreneurship (PICEEBA 2022) Perengki Susanto,Dian Fitria Handayani,Jean Elikal Marna,Yollit Permata Sari,Rizki Sri Lasmini,Rita Sofyan,Havid Ardi,2023-06-23 This is an open access book This conference is aimed to provide a medium for participants in disseminating their research ideas and results as well as developing their networks Through the participants contribution it is hoped that this conference could provide a deeper understanding of Economics Education Economics Business and Management Accounting and Entrepreneurship issues The theme for The Ninth Padang International Conference on Economics Education Economics Business and Management Accounting and Entrepreneurship PICEEBA is Leap to the imminent future Seizing Opportunities in Education Economics and Business In this conference we invite experts practitioners and observers from all around the globe the to sit together to explore various issues and debates on economics education economics bussines and management accounting and entrepreneurship The conference will be held online on May 21st 2022 via Zoom Meeting and UNP Video Streaming Youtube Channel We welcome empirical or conceptual contributions by any method or approach especially those relevant to the issues of Education in Economics Economics Business and Management Accounting and Entrepreneurship **Human-Technology Interaction** Elena Malakhatka,Mikael Wiberg,2025-04-08 Delves into the evolving landscape of human technology interaction HTI encompassing various facets from design and implementation to psychological impacts and strategic considerations The book begins with foundational theories in HTI and strategic design progressing to practical applications and implications across multiple domains such as human robot interaction augmented and virtual reality and the Internet of Things Subsequent chapters explore the integration of AI and machine learning with human processes the psychological effects of technology and user experience design The authors address specialized areas including assistive technologies game design and the fusion of art science and technology and discuss the role of technology in learning and education and urban sustainability through digital innovations Concluding with a look at future trends like transhumanism Human Technology Interaction Interdisciplinary Approaches and Perspectives offers a comprehensive analysis of how technologies shape human

experiences behaviours and societal development **Africa and the Millennium Development Goals** Charles Mutasa, Mark Paterson, 2015-10-29 This unique work by the Centre for Conflict Resolution CCR Cape Town South Africa tracks the progress Africa has made in achieving the United Nations Millennium Development Goals MDGs since 2000 Thirteen analytical chapters written by scholars and practitioners with expertise in the various areas covered by the eight MDGs are organized around the larger themes of political economy structural issues sustainable goals and human development goals They critically assess the progress that Africa has made towards the achievement of the MDGs discuss how to accelerate that progress and offer alternatives and recommendations in support of institutions in Africa that are engaged in promoting the achievement of sustainable development Throughout they examine the role of various actors including the African Union Africa's regional economic communities the United Nations the European Union etc civil society and other external development partners in light of their contributions shortfalls and viable options in shaping the continent's development agenda Together they provide a unique assessment from experts on the ground of whether the goals were a success and what remains to be done to achieve sustainable economic and human development in Africa Understanding the Human Factor of the Energy Transition: Mechanisms Underlying Energy-Relevant Decisions and Behaviors Tobias Brosch, David Sander, Martin K. Patel, 2016-06-27 An increasing number of countries are shifting toward sustainable energy economies emphasizing the use of renewable energy sources increases in energy efficiency and the abatement of greenhouse gas emissions The success of such an energy transition will depend not only on the development of new energy technologies but also on major changes in the patterns of individual energy related decisions and behaviors resulting in substantial reductions in energy demand Consequently the behavioral sciences can make important contributions to the energy transition by increasing our understanding of the multiple factors and mechanisms that underlie individual as well as group based decisions and behaviors in the energy domain and by creating a basis for systematic interventions that reduce energy usage Many different types of relevant behaviors and decisions need to be considered in this context including decisions to invest in energy efficient household equipment adjustments of energy critical habits related to heating eating or mode of transportation and participation in the political discourse related to questions of energy An integration of the expertise of the different disciplines of the behavioral sciences is thus needed to comprehensively investigate the impact of the different drivers and barriers that may determine energy related decisions and behaviors including economic factors such as price level social factors such as norms communication patterns and social learning processes and individual factors such as values attitudes beliefs heuristics affective biases and emotions The potential impact of these factors on the success of the energy transition is considerable for example a recent projection of the energy demand in Switzerland until 2050 has estimated the reduction potential related to psychological and sociological factors between 0% and 30% depending on which behavioral changes will be implemented in society Increased research efforts from the behavioral sciences are required to ensure that

the full reduction potential can be achieved This Research Topic brings together contributions from different disciplines such as psychology affective science behavioral economics economics sociology consumer behavior business science sociology and political science that improve our understanding of the many factors underlying decision making and behavior in the energy domain and contribute to the development of targeted interventions that aim at reducing energy demand based on these factors

The Oxford Handbook of Deliberative Democracy André Bächtiger, John S. Dryzek, Jane Mansbridge, Mark E. Warren, 2018-08-23 Deliberative democracy has been one of the main games in contemporary political theory for two decades growing enormously in size and importance in political science and many other disciplines The Oxford Handbook of Deliberative Democracy takes stock of deliberative democracy as a research field in philosophy in various research programmes in the social sciences and law and in political practice around the globe It provides a concise history of deliberative ideals in political thought and discusses their philosophical origins The Handbook locates deliberation in political systems with different spaces publics and venues including parliaments courts governance networks protests mini publics old and new media and everyday talk It engages with practical applications mapping deliberation as a reform movement and as a device for conflict resolution documenting the practice and study of deliberative democracy around the world and in global governance

The Ethics of Public Health Paternalism T M Wilkinson, 2024-12-30 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations The Ethics of Public Health Paternalism is about policies that try to stop people damaging their own health From the point of view of public health advocates if people did not smoke or drank less alcohol or kept off junk food and sugary liquids they would tend to be healthier Hence such tactics as taxing tobacco restricting the sale of alcohol and limiting the density of fast food outlets Because these tactics appear to limit freedom of choice they are often pejoratively described as the actions of a nanny state that overvalues health and wrongly infringes on the autonomy of adults But many of us want to be healthy rather than ill and alive rather than dead Does a state really nanny us when it uses its power to make us healthier If it does should it stop Some public health policies might reduce inequities of health or save costs in medical treatment or correct market failures But as this book shows lots would not The best case for many public health interventions is paternalistic aiming to steer people away from making unhealthy choices against their own interests But even though it is the best case it often fails It overvalues health and undervalues autonomy It exaggerates the influence of addiction and the marketing of unhealthy products Except for smoking we do not have the evidence needed to show that unhealthy choices are so mistaken as to justify the interventions Much of what modern public health does when it tries to stop adults damaging their health has not been justified The Ethics of Public Health Paternalism applies political and moral philosophy to the ideas of both supporters and critics of public health interventions It uses philosophical analysis of the values of health and well being to explain what sort of evidence is needed to support public

health interventions thus exposing a major gap in the arguments of public health advocates and it engages in detail with empirical evidence for instance about smokers regrets Governance, Commissioning and Public Health Linda Marks, 2014-07-23 Drawing on in depth case studies across England this book argues that governance and population health are inextricably linked Using original research it shows how these links can be illustrated at a local level through commissioning practice related to health and wellbeing Exploring the impact of governance on decision making Governance commissioning and public health analyses how principles such as social justice and governance arrangements including standards and targets influence local strategies and priorities for public health investment In developing public health governance as a critical concept the study demonstrates the complexity of the governance landscape for public health and the leadership qualities required to negotiate it This book is essential reading for students academics practitioners and policy makers with an interest in governance and decision making for public health **Handbook of Big Data** Peter Bühlmann, Petros Drineas, Michael Kane, Mark van der Laan, 2016-02-22 Handbook of Big Data provides a state of the art overview of the analysis of large scale datasets Featuring contributions from well known experts in statistics and computer science this handbook presents a carefully curated collection of techniques from both industry and academia Thus the text instills a working understanding of key statistical **The Oxford Companion to Wine** Julia Harding MW, Jancis Robinson OBE MW, Tara Q. Thomas, 2023-08-15 Everything you could possibly want to know about wine in one fully up to date A Z volume The Oxford Companion to Wine is a uniquely comprehensive and in depth A Z reference book on every aspect of wine more than 4 000 entries covering topics from history through geography geology soil science viticulture winemaking packaging academia technology and regulations to people and places tasting writing and the language of wine The system of cross references takes the reader from one entry to another showing how all these topics are interconnected in the fascinating story of wine in its most traditional and modern forms This new fifth edition which benefits from the knowledge and experience of over one hundred new contributors all experts in their field or geographical region is expanded by 272 new entries and every existing entry has been reviewed updated and polished The text is more international than ever written for wine lovers of every persuasion including those who love wine but want to know more in order to increase their enjoyment of this endlessly fascinating liquid and those who are intent on studying wine professionally or privately This is a huge treasure trove of knowledge for the first time breaking the barrier of one million words but the alphabetical format and the links between the entries make it easily navigable and the language while not shying away from complex science is intended to open the door to every curious reader looking for answers on every question they have ever wanted to ask about wine *EU Electricity Trade Law* Petri Mäntysaari, 2015-05-06 This book aims to describe the mechanisms of the internal wholesale electricity market in terms of the legal tools and practices used by electricity producers the most important market participants In this regard the focus is on Northwestern Europe Because of the book s functional perspective it is not limited

to the external regulation of electricity markets at the EU level and also describes the business models and practices employed by electricity producers Both the physical and financial marketplaces are examined and topics including electricity supply balancing transmission and derivatives are covered The target for the completion of the EU s internal electricity market was 2014 The internal wholesale electricity market is very important not only for electricity producers suppliers and major end consumers but also for network operators marketplace operators electricity technology firms investment firms and market regulators

Handbook of Research on Sustainable Consumption Lucia A. Reisch, John Th_gersen, 2015-02-27 This Handbook compiles the state of the art of current research on sustainable consumption from the world s leading experts in the field The implementation of sustainable consumption presents one of the greatest challenges and opportunities we are fac

The NHS at 75 Mark Exworthy, Russell Mannion, Martin Powell, 2023-10-30 In its 75th anniversary year this book examines the history evolution and future of the NHS With contributions from leading researchers and experts across a range of fields such as finance health policy primary and secondary care quality and patient safety health inequalities and patient and public involvement it explores the history of the NHS drawing on narrative evaluative and analytical approaches The book frames its analysis around the four key axes from which the NHS has evolved governance centralisation and decentralisation public and private and professional and managerial It addresses the salient factors which shape the direction and pace of change in the NHS As such the book provides a long term critical review of the NHS and key themes in health policy

The Sustainability and Climate Change Curriculum Outdoors: Key Stage 2 Deborah Lambert, Sue Waite, Michelle Roberts, Alun Morgan, 2024-03-14 Provide quality curriculum linked outdoor education in sustainability and climate change for pupils aged 7 11 with the authors of the bestselling National Curriculum Outdoors series Designed to bring contemporary issues to life this book contains everything you need to embed sustainability and climate change into your science curriculum including key subject knowledge case studies and a complete set of progressions for Key Stage 2 The detailed lesson plans are based around outdoor activities and are all in line with the Science National Curriculum The book covers the following essential curriculum concepts how to teach species identification how to encourage pupils to care for the natural world full curriculum aligned lesson plans of outdoor activities crafted to engage children in their local and global environments ways to progress pupil s learning through leadership both in a model science curriculum and through the reformation of their own school grounds Situating this teaching outside the classroom ensures that the developing concepts and knowledge are grounded in the real world and outdoor learning also has proven benefits for children s mental health and wellbeing The guidance and templates for development planning are underpinned by current research while vivid case studies bring these ideas to life

Enterprise Applications, Markets and Services in the Finance Industry Stefan Feuerriegel, Dirk Neumann, 2017-01-19 This book constitutes revised selected papers from the 8th International Workshop on Enterprise Applications Markets and Services in the Finance Industry FinanceCom 2016 held in Frankfurt Germany in
