transition to kindergarten Kindergarten Saint Louis (Mo.). Board of Education,1926 *Development of executive
function during childhood* Yusuke Moriguchi,Philip D Zelazo,Nicolas Chevalier,2016-04-01 Executive function refers to the
goal oriented regulation of one s own thoughts actions and emotions Its importance is attested by its contribution to the
development of other cognitive skills e g theory of mind social abilities e g peer interactions and academic achievement e g
mathematics and by the consequences of deficits in executive function which are observed in wide range of developmental
disorders such as attention deficit hyperactivity disorder and autism Over the last decade there have been growing interest
in the development of executive function and an expanding body of research has shown that executive function develops
rapidly during the preschool years with adult level performance being achieved during adolescence or later This recent work
together with experimental research showing the effects of interventions targeting executive function has yielded important
insights into the neurocognitive processes underlying executive function Given the complexity of the construct of executive
function however and the multiplicity of underlying processes there are often inconsistencies in the way that executive
function is defined and studied This inconsistency has hampered communication among researchers from various fields This
Research Topic is intended to bridge this gap and provide an opportunity for researchers from different perspectives to
discuss recent advances in understanding childhood executive function Researchers using various methods including
behavioral experiments neuroimaging eye tracking computer simulation observational methods and questionnaires are
encouraged to contribute original empirical research In addition to original empirical articles theoretical reviews and
opinions perspective articles on promising future directions are welcome We hope that researchers from different areas such
as developmental psychology educational psychology experimental psychology neuropsychology neuroscience psychiatry
computational science etc will be represented in the Research Topic The Giant Encyclopedia of Kindergarten Activities
