Technical Note, 1906 Reconfiguring Global Climate Governance in North America Professor Marcela López-Vallejo, 2014-05-28 Global climate governance has presented problems that have led to failures yet it has also opened the door to new transregional governance schemes especially in North America This book introduces an environmental dimension into the concept of governance Almost fifteen years after the climate global governance concept emerged results worldwide have not been as favorable as expected This book details previous discussions about the concept of global climate governance and its limits It highlights how the Kyoto Protocol has a limited design taking into account a national approach to global regional and transnational problems had no obligatory mechanisms for implementation and explains the emergence of new polluters not committed under it such as China and India Furthermore this book explores other levels of authority such as regional institutions the North American agreement on trade NAFTA and on environment NAAEC as well as the regional energy working group NAEWG The author puts forward a theoretical proposal for re territorialization and coordination of policies for climate change into new forms of articulating interests in what she terms transnational green economic regions TGERs and tests this on two case studies the Regional Greenhouse Gas Initiative RGGI and the Western Climate Initiative WCI This study presents the challenges and opportunities of a transregional approach in North America Experiment Station Record U.S. Office of Experiment Stations, United States.
