time period This transformation is represented through various forms of recollection stories photographs collectibles heirlooms monuments and more Shaped by nostalgia and wishful thinking discarded objects represent what is wasted desired and aestheticized existing at the intersection of individual and collective consciousness While *The Afterlife of Discarded Objects* constitutes a version of revisionist historiography through its engagement with alternative anthropological artifacts its ambition stretches beyond that to consider how seemingly immaterial phenomena such as memory and identity are embedded in and shaped by material networks including ephemera

Guruianu and Andrievskikh create a written visual and virtual playground where transnational narratives fuse into a discourse on the persistent materiality of ephemera especially when magnified through narrative and digital embodiment *The Afterlife of Discarded Objects* is printed in full color and includes references an index and over seventy hi resolution color images *The Afterlife of Discarded Objects* Memory and Forgetting in a Culture of Waste uses contemporary theory literature popular culture and personal narratives to investigate how we assign political socio cultural and aesthetic meaning to objects The book is unique in applying personal narratives and testimonies of contributors from around the world to provide insights and critiques of Western attitudes toward these objects *The Afterlife of Discarded Objects* provides transformative social commentary through scrutiny and stories of discarded found objects in Eastern Europe and in the West encouraging us to reflect more critically on our relationships with things The stories and theories interwoven in Guruianu and Andrievskikh's book turn memory into matter and aspire to teach through their exploration It's a lofty goal and the book succeeds

Second World Postmodernisms Vladimir Kulic, 2019-02-21 If postmodernism is indeed the cultural logic of late capitalism why did typical postmodernist themes like ornament colour history and identity find their application in the architecture of the socialist Second World How do we explain the retreat into paper architecture and theoretical discussion in societies still nominally devoted to socialist modernization Exploring the intersection of two areas of growing scholarly interest postmodernism and the architecture of the former socialist world this edited collection stakes out

new ground in charting architecture's various transformations in the 1970s and 80s. Fourteen essays together explore the question of whether or not architectural postmodernism had a specific Second World variant. The collection demonstrates both the unique nature of Second World architectural phenomena and also assesses connections with western postmodernism. The case studies cover the vast geographical scope from Eastern Europe to China and Cuba. They address a wealth of aesthetic discursive and practical phenomena interpreting them in the broader socio-political context of the last decades of the Cold War. The result provides a greatly expanded map of recent architectural history which redefines postmodernist architecture in a more theoretically comprehensive and global way.

Post-Soviet Nostalgia Otto Boele, Boris Noordenbos, Ksenia Robbe, 2019-07-24 Bringing together scholars from Russia, the United States and Europe, this collection of essays is the first to explore the slippery phenomenon of post-Soviet nostalgia by studying it as a discursive practice serving a wide variety of ideological agendas. The authors demonstrate how feelings of loss and displacement in post-Soviet Russia are turned into effective tools of state building and national mobilization as well as into weapons for local resistance and the assertion of individual autonomy. Drawing on novels, memoirs, documentaries, photographs and Soviet commodities, *Post-Soviet Nostalgia* is an invaluable resource for historians, literary scholars and anthropologists interested in how Russia comes to terms with its Soviet past.

Soviet Metro Stations Owen Hatherley, 2019 Stunning photographs of Soviet Metro Stations from across the former states of the USSR and Russia itself, many of which have never previously been documented.

Beyond Market Dystopia: New Ways of Living Greg Albo, Leo Panitch, 2019-12-23 Essays which aim to create a world of agency and justice. How can we build a future with better health and homes respecting people and the environment? The 2020 edition of the Socialist Register *Beyond Market Dystopia* contains a wealth of incisive essays that entice readers to do just that: to wake up to the cynical, implicitly market-driven concept of human society we have come to accept as everyday reality. Intellectuals and activists such as Michelle Chin, Nancy Fraser, Arun Gupta and Jeremy Brecher connect with and go beyond classical socialist themes to combine an analysis of how we are living now with visions and plans for new strategic programmatic manifesto-oriented alternative ways of living.

Walling, Boundaries and Liminality Agnes Horvath, Marius Ion Bența, Joan Davison, 2018-08-06 Contemporary challenges related to walls borders and encirclement such as migration integration and endemic historical conflicts can only be understood properly from a long term perspective This book seeks to go beyond conventional definitions of the long durée by locating the social practice of walling and encirclement in the broadest context of human history integrating insights from archaeology and anthropology Such an approach far from being simply academic has crucial contemporary relevance as its focus on origins helps to locate the essential dynamics of this practice and provides a rare external position from which to view the phenomenon as a transformative exercise with the area walled serving as an artificial womb or matrix The modern world with its ingrained ideas of borders nation states and other

entities often makes it is very difficult to gain a critical distance and detachment to see beyond conventional perspectives The unique approach of this book offers an antidote to this problem Cases discussed in the book range from Palaeolithic caves the ancient walls of G bekli Tepe Jericho and Babylon to the foundation of Rome the Chinese Empire medieval Europe and the Berlin Wall The book also looks at contemporary developments such as the Palestinian wall Eastern and Southern European examples Trump s proposed Mexican wall the use of Greece as a bulwark containing migration flows and the transformative experience of voluntary work in a Calcutta hospice In doing so the book offers a political anthropology of one of the most fundamental yet perennially problematic human practices the constructing of walls As such it will appeal to scholars of sociology anthropology and political theory
