Optimization belongs to the engineer In layman s terms the mathematical science of Optimization is a study of how to make good choices when confronted with conflicting requirements and demands The qualifier Convex means when an optimal solution is found then it is guaranteed to be a best solution there is no better choice As any convex optimization problem has geometric interpretation this book is about convex geometry with particular attention to distance geometry and nonconvex combinatorial and geometrical problems that can be relaxed or transformed into convexity A virtual flood of new applications follows by epiphany that many problems presumed nonconvex can be so transformed This is a BLACK WHITE paperback A hardcover with full color interior as originally conceived is available at lulu com spotlight dattorro **Blockchain**

Technology and Applications Manoj Kumar M V,Annappa B,Likewin Thomas,Sourav Kanti Addya,Niranjana murthy M,2022-12-13 Blockchain is an emerging platform for developing decentralized applications and data storage over and beyond its role as a platform for cryptocurrencies This reference text provides a comprehensive discussion on blockchain technology from research and application perspective Discusses different approaches for building distributed applications DAPPS Provides detailed listing and discussion of blockchain technology applications in solving real life problems Covers proof of work PoW based blockchain consensus and proof of stake PoS based blockchain consensus Discusses blockchain algorithms including practical byzantine fault tolerance PBFT and simplified byzantine fault tolerance SBFT It comprehensively covers important topics including blockchain consensus algorithms Ethereum Hyperledger blockchain scalability smart contracts with solidity ERC20 standards building DApp with Golang building DApp using Hyperledger building PoCs with Hyperledger fabric blockchain as a server blockchain security and privacy The text will serve as a useful text for senior undergraduate and graduate students in interdisciplinary areas including electronics and communications engineering electrical engineering computer science and information technology Prosody and interactional fluency of Italian learners of German Simona Sbranna,2025-07-01 This book explores the development of prosodic and interactional competence in second language acquisition drawing on data from peer interactions by Italian learners of German in both German and their native language Italian as well as from German native speakers Three key aspects of spoken interaction are examined across proficiency levels prosodic marking of information status turn taking and backchannels The analysis of prosodic marking of information status reveals that learners mark givenness using distinct fundamental frequency patterns as in their native language but apply a reduction in prosodic strength typically found postfocally in native German irrespective of its function This suggests that learners perceive deaccentuation as a salient marker of native German which they adopt during their learning This book also presents a novel approach to quantifying interactional competence showing that lower proficiency negatively affects the smoothness of interactional flow resulting in reduced speech time and increased overall silence Finally it provides new insights into backchannel use in second language and cross linguistic contexts Results show a complex non arbitrary mapping between lexical type turn taking function and intonation in both native languages In

second language speech dyad specific behaviour was found to have a stronger effect on backchannel frequency and duration than second language proficiency Furthermore learners tend to transfer preferred lexical backchannel types from their first language into their second language Overall this book offers a multidimensional perspective on second language spoken interaction and lays the groundwork for future applications in language teaching and assessment The doctoral work on which this book is based was awarded the IPA PhD Thesis Award for the Best PhD Thesis in the broad area of Phonetics Speech Sciences and Laboratory Phonology in 2024
