**Traders in Men** Nicholas Radburn, 2023-07-25 A sweeping new history that reveals how British, African, and American merchants developed the transatlantic slave trade. This is a landmark study given its clear status as easily the best researched and most comprehensive book on the British slave trade to date. David Eltis, coauthor of *Atlas of the Transatlantic Slave Trade*. A masterful account of one of the most brutal moments in the history of capitalist modernity, Radburn brilliantly details all aspects of the process of commodification of human beings in the Liverpool slave trade, vividly depicting the long journeys endured by Africans in Africa across the Atlantic and in the Americas. Leonardo Marques, Universidade Federal Fluminense. During the eighteenth century, Britain's slave trade exploded in size. Formerly a small and geographically constricted business, the trade had by the eve of the American Revolution grown into a transatlantic system through which fifty thousand men, women, and children were enslaved every year. In this wide-ranging history, Nicholas Radburn explains how thousands of merchants collectively transformed the slave trade by devising highly efficient but violent new business methods. African brokers developed commercial infrastructure that facilitated the enslavement and sale of millions of people. Britons invented shipping methods that quelled enslaved people's constant resistance on the Middle Passage. And American slave traders formulated brutal techniques through which shiploads of people could be quickly sold to colonial buyers. Truly Atlantic-wide in its vision, this study shows how the slave trade dragged millions of people into its terrible vortex and became one of the most important phenomena in world history.

*Materializing the Middle Passage* Jane Webster, 2023-10-31 An estimated 2.7 million Africans made an enforced crossing of the Atlantic on British slave ships between c. 1680 and 1807 a journey that has become known as the Middle Passage This book focuses on the slave ship itself The slave ship is the largest artefact of the Transatlantic slave trade but because so few examples of wrecked slaving vessels have been located at sea it is rarely studied by archaeologists Materializing the Middle Passage A Historical Archaeology of British Slave Shipping 1680-1807 argues that there are other ways for archaeologists to materialize the slave ship It employs a pioneering interdisciplinary methodology combining primary documentary sources maritime and terrestrial archaeology paintings maritime and ethnographic museum collections and many other sources to rebuild British slaving vessels and to identify changes to them over time The book then goes on to consider the reception of the slave ship and its trade goods in coastal West Africa and details the range and uses of the many African resources including ivory gold and live animals entering Britain on returning slave ships The third

section of the book focuses on the Middle Passage experiences of both captives and crews and argues that greater attention needs to be paid to the coping mechanisms through which Africans survived yet also challenged their captive passage Finally Jane Webster asks why the African Middle Passage experience remains so elusive even after decades of scholarship dedicated to uncovering it She considers when how and why the crossing was remembered by saltwater captives in the Caribbean and North America The marriage of words and things attempted in this richly illustrated book is underpinned throughout by a theoretical perspective combining creolization and postcolonial theory and by a central focus on the materiality of the slave ship and its regimes
