The Uganda Gazette Uganda,2018-07-13 **Intra-Africa Student Mobility in Higher Education** Chika Trevor Sehoole,Jenny J. Lee,2022-01-01 This book examines student mobility within Africa International student mobility is among the central activities of higher education internationalization As the number of international students increase so do the destinations in both number and geographic diversity Historically international student mobility has followed South North and North North patterns However recent literature show the growth in North South and South South patterns of student mobility There has also been a rise in regional mobility In what is referred to in the book as intra Africa mobility the books explores and analyzes the patterns of intra Africa mobility based on seven African countries South Africa Kenya Uganda Nigeria Ghana Senegal and Egypt The editors and contributors address three central research questions Why did the students choose the country they are studying in Why did they choose the institution they are studying in What are their academic and social experiences in these countries and their respective institutions This book is the first comprehensive exploration of intra Africa student mobility in a field that traditionally centers on the Global North **Postgraduate Research Engagement in Low Resource Settings** Atibuni, Dennis Zami,2019-09-27 The general academic progression and particularly research engagement of postgraduate students is characterized by various problems such as high dropout rates longer completion times low graduation rates and high repetition or retake rates This means that there are far fewer students pursuing postgraduate studies at tertiary institutions and universities than there are at the lower levels of education Yet there is growing demand for postgraduate education given its strong projected association with socioeconomic transformation at national and international levels among developed and developing countries alike Postgraduate Research Engagement in Low Resource Settings sets out to garner strategies for fostering efficiency of research conduct among the students and faculty so as to enhance high quality output for the envisaged personal societal national and international socioeconomic transformation Covering a range of topics such as intellectual property mental health and quality assurance this book is ideal for research supervisors higher education faculty librarians educators administrators researchers academicians and students Museum Cooperation between Africa and Europe Thomas Laely,Marc Meyer,Raphael Schwere,2018-07-20 At a time of major transformations in the conditions and self conceptions of cultural history and ethnological museums worldwide it has become increasingly important for these museums to engage in cooperative projects This book brings together insights and analyses of a wide variety of approaches to museum cooperation from different expert perspectives Featuring a variety of African and European points of view and providing detailed empirical evidence it establishes a new field of museological study and provides some suggestions for future museum practice *Sovereign Debt and Human Rights* Ilias Bantekas,Cephas Lumina,2018-11-15 Sovereign debt is necessary for the functioning of many modern states yet its impact on human rights is underexplored in academic literature This volume provides the reader with a

step by step analysis of the debt phenomenon and how it affects human rights Beginning by setting out the historical political and economic context of sovereign debt the book goes on to address the human rights dimension of the policies and activities of the three types of sovereign lenders international financial institutions IFIs sovereigns and private lenders Bantekas and Lumina along with a team of global experts establish the link between debt and the manner in which the accumulation of sovereign debt violates human rights examining some of the conditions imposed by structural adjustment programs on debtor states with a view to servicing their debt They outline how such conditions have been shown to exacerbate the debt itself at the expense of economic sovereignty concluding that such measures worsen the borrower s economic situation and are injurious to the entrenched rights of peoples

Authentic University Lawrence Muganga Ph.D.,2022-08-22 Today s universities fail students leaving them stranded in an alien world that differs markedly from the ivory tower institution that ostensibly molded them for the future The Authentic University proposes to overcome the manifold shortcomings of the contemporary postsecondary school by offering an innovative education that corresponds to the realities of the modern era This university blends three distinct concepts of student centered education to provide students with a personalized learning experience that develops distinct skills and competencies required by today s employers Students can save time money and effort while learning the information and applications that they want and need Contained within the covers of this groundbreaking book lies a thorough description of everything that educational stakeholders must know about the Authentic University including supporting literature and practical models alongside strategies for planning and implementation The world has passed the university by and will not wait for education to keep pace with its ever evolving information and communication technology situated in an increasingly entrepreneurial economy We as educational stakeholders must meet the challenge of change in an urgent way The first step toward bringing the university into the modern era begins with this book the manual for a radically new type of education termed the Authentic University

Carceral Afterlives Katherine Bruce-Lockhart,2022-07-05 Drawing upon social history political history and critical prison studies this book analyzes how prisons and other instruments of colonial punishment endured after independence and challenges their continued existence In *Carceral Afterlives* Katherine Bruce Lockhart traces the politics practices and lived experiences of incarceration in postcolonial Uganda focusing on the period between independence in 1962 and the beginning of Yoweri Museveni s presidency in 1986 During these decades Ugandans experienced multiple changes of government widespread state violence and war all of which affected the government s approach to punishment Bruce Lockhart analyzes the relationship between the prison system and other sites of confinement including informal detention spaces known as safe houses and wartime camps and considers other forms of punishment such as public executions and disappearance by state paramilitary organizations Through archival and personal collections interviews with Ugandans who lived through these decades and a range of media sources and memoirs Bruce Lockhart examines how carceral systems were imagined and experienced by

Ugandans held within working for or impacted by them She shows how Uganda's postcolonial leaders especially Milton Obote and Idi Amin attempted to harness the symbolic material and coercive power of prisons in the pursuit of a range of political agendas She also examines the day to day realities of penal spaces and public perceptions of punishment by tracing the experiences of Ugandans who were incarcerated their family members and friends prison officers and other government employees Furthermore she shows how the carceral arena was an important site of dissent examining how those inside and outside of prisons and other spaces of captivity challenged the state's violent punitive tactics Using Uganda as a case study *Carceral Afterlives* emphasizes how prisons and the wider use of confinement both as a punishment and as a vehicle for other modes of punishment remain central to state power in the Global South and North While scholars have closely analyzed the prison's expansion through colonial rule and the rise of mass incarceration in the United States they have largely taken for granted its postcolonial persistence In contrast Bruce Lockhart demonstrates how the prison's transition from a colonial to a postcolonial institution explains its ubiquity and reveals ways to critique and challenge its ongoing existence The book thus explores broader questions about the unfinished work of decolonization the relationship between incarceration and struggles for freedom and the prison's enduring yet increasingly contested place in our global institutional landscape

Technology Driven Curriculum for 21st Century Higher Education Students in Africa Lawrence Meda, H. Makura, 2017-08-16 The book consists of novel and empirical research in broad areas of technology and curriculum in selected African countries The central theme of the book is technology and the higher education curriculum The book consists of case studies from selected African countries namely Lesotho Namibia Kenya South Africa Zimbabwe Tanzania and Nigeria These studies confirm that in this contemporary digital era educational technology is playing an increasingly important role It has become so ubiquitous and fundamental in the teaching and learning Higher education sectors across the continent are increasingly compelled to use educational technology to keep up with needs of 21st century students who want to be afforded opportunities to be able to learn in real time anytime and on their own terms using opportunities for creative innovation made possible by new information and communication technologies

are unique to the engineering and computing professions and promotes a general understanding of what it means to be a member of a profession Explains how ethical and legal considerations play a role in engineering practice Discusses the importance of professional communication and reflective practice to a range of audiences Presents the practices of leadership innovation entrepreneurship safety and sustainability in engineering design Analyzes and discusses the contemporary practices of project management artificial intelligence and professional career development *Inclusive Growth and Development Issues in Eastern and Southern Africa* Musahara, Herman, 2016-06-13 This anthology presents issues challenges and progress in Rwanda Mauritius Ethiopia South Africa and Uganda towards Africa's acknowledgement through Agenda 2063 of the need for inclusive and sustainable development and its commitment to the Sustainable Development Goals Agenda 2030 of the United Nations Dictated by overall ever unfolding realities including economic social political technological issues the growth and development dictums have been reshaped and reframed continually in an effort to accommodate and respond to emerging issues Human development and inclusive growth and development within the overall theme of sustainable development are for example among the recent focuses of the global and national development agenda The background is that as individuals communities and societies get richer the worrying levels of inequalities exclusion and disparities are becoming an area of concern drawing the attention of governments planners civil societies researchers and academia A predominant current issue has been an appreciation of high economic growth in the last 10 years which is nonetheless marred by pervasive levels of poverty and inequality The issues covered include trade rural urban linkages the dynamics of poverty vulnerability and welfare social policies for inclusive and sustainable development productivity and informality and financial direct support systems to the poor The chapters are based on first hand data secondary data from different databases and systematic reviews of academic literature Drawing on the findings and conclusions of the individual chapters the book distills together the key lessons and also puts forward recommendations for policy and practice It is a resource for researchers policy and decision makers academia and graduate students

Co-teaching and co-research in contexts of inequality Phindile Zifikile Shangase, Daniela Gachago, Eunice Ndeti Ivala, 2023-05-09 There has been a recent surge of interest in the concept of co teaching and co research across institutions of HE locally and globally as a response to limited international mobility due to COVID 19 We see co teaching and co research as teaching and research that connects educators and learners across different institutions and different contexts be it across South Africa Africa or the world Co teaching and co research is linked in this book to the term networked learning following the Networked Learning Editorial Collective's emphasis on relationships and collaboration rather than technology and foregrounding our strong commitment to social justice Our collective experiences have shown that co teaching and co research are not easy endeavours especially when they involve differently positioned and differently resourced contexts students and academics While these collaborations are enriching and exciting they need careful support

preparation and time for sustained relationship building topics that we find are not necessarily discussed in the literature around co teaching and co research This book is an attempt towards closing this gap in knowledge by providing a range of chapters documenting personal experiences of academics and practitioners engaging in co teaching and co research across the African continent and beyond facilitated by various networked learning tools and technologies Framed by a spirit of sharing and connection the book provides insights into the benefits and challenges of such collaborations affordances of technologies to bridge unequal divides emerging practices of continental collaboration and beyond Additionally the book provides an unusually honest and nuanced view on co teaching and co research across contexts of inequalities foregrounding relationship and community building rather than technology and emphasising the importance of sustained connection and reflection in these collaborations Applying a wide range of critical theoretical frameworks these evidence based but also reflective and reflexive contributions are a unique and important reminder that behind and through our screens we connect as humans who yearn to learn from each other but also need to learn how to learn from each other when we do not share the same world views

Construction Safety, Health and Well-being in the COVID-19 era Patrick Manu, Clara Cheung, Akilu Yunusa-Kaltungo, Fidelis Emuze, Tarcisio Abreu Saurin, Bonaventura H. W.
