Pedagogies of the Imagination Timothy Leonard, Peter Willis, 2008-06-11 I have long admired the mythopoetic tradition in curriculum studies That admiration followed from my experience as a high school teacher of English in a wealthy suburb of New York City at the end of the 1960s A dream job I taught four classes of 15-20 students during a nine period day in a dream suburb where I could afford to reside only by taking a room in a retired teacher's house many of these often Ivy League bound students had everything but meaningful lives This middle class Midwestern young teacher was flabbergasted In one sense my academic life has been devoted to understanding that searing experience Matters of meaning seemed paramount in the curriculum field to which Paul Klohr introduced me at Ohio State Klohr assigned me the work of curriculum theorists such as James B Macdonald Like Timothy Leonard who also studied with Klohr at Ohio State and Peter Willis Macdonald 1995 understood that school reform was part of a broader cultural and political crisis in which meaning is but one casualty In the mythopoetic tradition in curriculum studies scholars labor to understand this crisis and the conditions for the reconstruction of meaning in our time in our schools

The Spirit of the Waldorf School Rudolf Steiner, 1995-09 9 lectures September 15-22 1920 and October 15-16 1923 CW 302a Speaking to the teachers at the first Waldorf school in Stuttgart Steiner asserts that the unfortunate presence of dishonesty and alienation in society today cannot be addressed without a completely renewed and holistic education He states fact that successful teaching requires a living synthesis of the spiritual gymnast the ensouled rhetorician and the intellectual professor Of these the formative effect of the rhetorician's cultivation of artistic speech is the most important It's impossible for true teaching to be boring declares Steiner and he offers several examples of how teachers can observe a natural phenomenon so intimately that its creative life can flow into the children through a teacher's own words in the classroom He also describes in spiritual scientific depth how the actions of teachers directly affect the physiological chemistry of their students From this perspective education is really therapy transformed to a higher level and should be seen as closely related to the healing arts Steiner also shows how the perception of hidden relationships between education and the processes of human development can kindle a heartfelt enthusiasm and a sense of responsibility in teachers for the far reaching health effects that educational activities can produce German source Erziehung und Unterricht

Ion Albulescu, Catalano Horațiu Roco, 2018-01-23 This volume brings together a number of papers presented at the international conference on Specific Methodologies in Educational Alternatives held in June 2016 at the Bistrița University Extension of the Educational Sciences Department of Babe Bolyai University Cluj Napoca Romania The event served to promote the most recent theoretical and practical findings related to educational alternatives and attracted the attendance of over 250 theorists and experts in the field The conference represented a significant opportunity to know and develop this field of study based on research and examples of good practice The contributions here specifically explore the six educational alternatives that exist in Romania namely Step by Step Waldorf Freinet Curative Pedagogy Montessori and the Jenaplan Holistic Education and Embodied Learning John P. Miller, Kelli Nigh, 2017-03-01 Learning often begins with an experience in the body Our body can tighten or feel expansive depending on different learning contexts This experience of learning in the body is crucial to holistic education This book explores embodied learning from several perspectives This first section explores how psychology can inform us about embodied learning for example the work of Carl Jung and Wilhelm Reich devoted much of their thinking to how energy manifests itself in the body Meditation and movement are also examined as ways of embodied learning for example Dalcroze a form of movement education is presented within the context of whole person education The book also presents schools where embodied learning is nurtured Waldorf education is discussed as well as a public school in Toronto where the body is central to holistic education The book also presents visions of embodied learning John Miller presents a holistic vision of teacher education and Tobin Hart who has written extensively in this field writes about the embodied mind Embodied learning is an emerging area of inquiry in holistic education and this book presents a variety of perspectives and practices that should be helpful to both scholars and practitioners Philosophy of Education in Action David W. Nicholson, 2022-02-06 Philosophy of Education in Action An Inquiry Based Approach Second Edition is an innovative introductory text that invites readers to explore philosophy of education through the lens of their own observations and experiences Using the Wonder Model of Inquiry readers investigate the purposes of education how schools

are designed to fulfill those purposes and the influence of philosophy on educational practices Grounded in authentic classroom vignettes and supported by examples from actual schools and educational programs readers think critically and creatively about philosophical issues Probing questions analyze the curriculum examine pedagogy conceptualize the role of the teacher and student in the learning process and explore the role of school organization and design Readers are guided to reflect upon their own practices and articulate their own philosophical beliefs Readers also imagine and design a hypothetical school using project based methods to interpret synthesize and evaluate different educational philosophies The Continuum of Educational Philosophy locates practices in relation to philosophical perspectives The Second Edition includes updated sources and examples of schools and programs that represent different philosophical perspectives In addition to applying the 3Cs criteria of evaluation two new chapters highlight voices that respond to and challenge different educational philosophies The final chapter adds guidance on how to construct and compose a personal philosophy of education statement

Leonard Benson, 1987-02-01 How to Keep Your Soul Alive after Twenty Seven This could have been the title of this book The author shows that the natural development of the soul stops at around the age of twenty seven After that

nothing happens for our inner being unless we learn to make it happen Part of the tragic nature of our time is that more and more people allow their soul life to die at twenty seven so that the remainder of their life becomes a kind of mummification Rudolf Steiner explains how by exerting our thinking and feeling we can keep our soul alive and growing This is ultimately the only way we can make this incarnation a satisfactory one Through such effort we can continue to develop inwardly until a very advanced age each year becoming richer and more interesting than the one before Here is a book that gives real meaning to the idea that we live in a state of becoming *Human Values in Education* Rudolf Steiner, 2004 These lectures on education were given well after the founding of several Waldorf schools in Europe and thus Steiner was able to draw on the practical experience of this form of education in action **Waldorf Education and Anthroposophy 2** Rudolf Steiner, 1996 12 lectures various cities November 19 1922 August 30 1924 CW 218 By the time of this second collection of Steiner's public lectures on Waldorf education the Waldorf school movement was gaining increasing recognition In this collection as in the previous volume Steiner is outspoken about the spiritual nature of human beings and the world including the spiritual nature of Waldorf education Topics include Education and Teaching The Art of Teaching from an Understanding of the Human Being Education and Art Education and the Moral Life Introduction to a Eurythmy Performance Why Base Education on Anthroposophy Waldorf Pedagogy Anthroposophy and Education Moral and Physical Education Educational Issues Original book *Geistige Zusammenhänge in der Gestaltung des Menschlichen Organismus* vol 218 of the Complete Works of Rudolf Steiner **Rhythms of Learning** Rudolf Steiner, 1998 Key lectures on children and education have been thoughtfully chosen from the vast amount of material by Steiner and presented in a context that makes them approachable and accessible In his many discussions and lectures Steiner shared his vision of an education that considers the spirit soul and physiology in children as they grow
