No Reprieve Gail Z. Martin, 2025-04-08 Explore the origins of Blaine McFadden and his allies in this short story prequel to the epic Ascendant Kingdoms Saga from Gail Z. Martin

Condemned to exile in an arctic prison colony for murdering his sister's attacker, Blaine McFadden has lost everything: his title, his family, and his fiancé. Velant Prison holds the worst of the kingdom's convicts, overseen by brutal guards who exile themselves. When a sadistic guard takes things too far, Blaine's insubordination makes him a target of the prison's notorious commander. To survive, Blaine needs to rely on his wits and his fists, and a few good friends to watch his back.

Praise for the Ascendant Kingdoms Saga: Epic fantasy as it was meant to be read: gripping, action-packed, and larger than life. A delight for any fan of the genre.

Rachel Aaron: Epic fantasy at its best.

Aaron Rosenberg: A vivid, engrossing tapestry woven from epic heroism, post-apocalypse struggles, perilous magic, and darkest fantasy. A distinct and distinctive achievement.

Juliet McKenna: A book that will take over readers' thoughts until long after the final page.

Porcelain Analysis and Its Role in the Forensic Attribution of Ceramic Specimens Howell G. M. Edwards, 2021-11-09

The material for this book arose from the author's research into porcelains over many years as a collector in appreciation of their artistic beauty, as an analytical chemist in the scientific interrogation of their body, paste, enamel pigments, and glaze compositions, and as a ceramic historian in the assessment of their manufactory foundations and their correlation with available documentation relating to their recipes and formulations. A discussion of the role of analysis in the framework of a holistic assessment of artworks, and specifically the composition of porcelain (namely hard paste, soft paste, phosphatic bone china, and magnesian) is followed by its growth from its beginnings in China to its importation into Europe in the 16th Century. A survey of European porcelain manufactories in the 17th and 18th Centuries is followed by a description of the raw materials, minerals, and recipes for porcelain manufacture and details of the chemistry of the high temperature firing processes involved therein. The historical backgrounds to several important European factories are considered, highlighting the imperfections in the written record that have been perpetuated through the ages. The analytical chemical information derived from the interrogation of specimens from fragments, shards, or perfect finished items is reviewed, and operational protocols established for the identification of a factory output from the data presented. Several case studies are examined in

detail across several porcelain manufactories to indicate the role adopted by modern analytical science with information provided at the quantitative elemental oxide and qualitative molecular spectroscopic levels where applicable The attribution of a specimen to a particular factory is either supported thereby or in some cases a potential reassessment of an earlier attribution is indicated Overall the information provided by analytical chemical data is seen to be extremely useful for porcelain identification and for its potential attribution in the context of a holistic forensic evaluation of hitherto unknown porcelain exemplars of questionable factory origins
