When there is a need for an operator or helper to work on the rig in the working area or danger zone and this involves activation of one or several machine functions such work shall only be done under the following conditions:

- there shall always be two people present, both being fully instructed on the safety issues. One of them shall supervise, from the main operator's position, the safety of the service man doing the work.
- the supervisor shall have immediate access to an emergency stop in all situations.
- the area where the service work is to be carried out shall be properly illuminated.
- communication between the service man and supervisor at the main operator's position shall be established in a reliable manner.
- only when the drill rig is shut down completely and the means of starting are isolated is a person allowed to perform repair and maintenance work alone on the drill rig.

Tamrock Parts Manual

Marcel A. Müller

Tamrock Parts Manual:

Drilling and Blasting of Rocks Francisco Javier Ayala Carcedo, 2017-11-22 Rock breakage with explosives has existed since the seventeenth century when black powder came into use in mining. Since then it has progressed from the invention of dynamite to the use of heavy ANFO. During the past two decades there have been numerous technical contributions which have brought a better understanding of rock fragmentation with explosives, an improvement in drilling equipment and a noticeable evolution in the development of new explosives and blasting accessories. The Geomining Technological Institute of Spain ITCE, aware of this progress and of the importance which the breakage process has acquired in mining and civil engineering projects, has ordered the publication of *Drilling and Blasting of Rocks*. The purpose of this Handbook is to give basic knowledge of the drilling systems, the types of available explosives and the accessories and the parameters that intervene in blast designing, whether controllable or not, at the same time the objectives and contents contribute to improved safety in mining. The Handbook is meant for all professionals who are involved with explosives in mining operations and civil engineering projects as well as for students of technical schools. *Mine Openings: Stability and Support* J. Aldorf, K. Exner, 2013-10-22 In this book the authors present a review of the methods used for the solution of problems of stability and support of mine workings based on the study and analysis of the validity conditions of individual theoretical computing procedures. The classification of these methods based on the analysis of factors determining the behaviour of a system of mine openings should contribute to the greater objectivity of decisions connected with the management and control of mining operations and from the educational point of view enable the intricate problems of stability to be better understood. Chapters dealing with support structures and technologies of support review the present state of the art with special reference to problems prevailing in Europe where mining is carried out under continuously deteriorating and less favourable natural conditions. The authors have assembled the theoretical and practical knowledge necessary for those to whom the book is addressed, namely practising mining engineers and project managers and students and graduates in mining colleges and schools. *A Manual of the Nilagiri District in the Madras Presidency* Henry Bidewell Grigg, 1880 Regional Industrial Buying Guide, 2000 **CIM Bulletin** Canadian Institute of Mining and Metallurgy, 2000 **Randol Buyer's Guide**, 1997 **Canadian Mining Manual**, 1970 **Moody's International Manual**, 1996 **Manual of the Administration of the Madras Presidency, in Illustration of the Records of Government & the Yearly Administration Reports** Madras (India : Presidency), 1885 Canadian Mining Journal's Reference Manual & Buyer's Guide, 1970 *Mergent Moody's Industrial Manual*, 1999 Pit & Quarry Handbook and Buyers Guide for the Nonmetallic Mineral Industries, 1982 Greater Delaware Valley Regional Industrial Purchasing Guide, 1987 **Public Works Manual**, 1985 Moody's Industrial Manual, 1997 Covering New York American regional stock exchanges international companies Maclean's Manual of the Administration of the Madras Presidency: Glossary of the Madras Presidency,

containing a classification of terminology, a gazetteer and economic dictionary of the provinces and other information, the whole arranged alphabetically and indexed C. D. Maclean, 1982 **SME Resource Guide** ,1998 **Contract Record** ,1983 **Directory of Korean trading agents** , *Desire and Craving* Pertti Alasuutari, 1992-10-14 This book is an ethnographic analysis of alcoholism focusing on the importance of cultural explanations of heavy drinking in modern society As a starting point Alasuutari uses a cognitive concept of frames in order to study the social and cultural boundedness of alcohol related problems The ethnographic narratives concentrate on specific cases but stress the theoretical level of analysis and reveal the ways in which the alcoholism frame is linked with Western culture and society Alasuutari also provides an analysis of the role of the temperance movement and ideology in Finland and the rise of the distinction between normal and pathological drinking
