Reporting Health Research David Moher,Douglas Altman,Kenneth Schulz,Iveta Simera,Elizabeth Wager,2014-08-06 Guidelines for Reporting Health Research is a practical guide to choosing and correctly applying the appropriate guidelines when reporting health research to ensure clear transparent and useful reports This new title begins with an introduction to reporting guidelines and an overview of the importance of transparent reporting the characteristics of good guidelines and how to use reporting guidelines effectively in reporting health research This hands on manual also describes over a dozen internationally recognised published guidelines such as CONSORT STROBE PRISMA and STARD in a clear and easy to understand format It aims to help researchers choose and use the correct guidelines for reporting their research and to produce more completely and transparently reported papers which will help to ensure reports are more useful and are not misleading Written by the authors of health research reporting guidelines in association with the EQUATOR Enhancing the QUALity and Transparency Of health Research Network Guidelines for Reporting Health Research is a helpful guide to producing publishable research It will be a valuable resource for researchers in their role as authors and also an important reference for editors and peer reviewers Practitioner's Guide to Global Investigations Judith Seddon,2018-01-19 There s

never been a greater likelihood a company and its key people will become embroiled in a cross border investigation But emerging unscarred is a challenge Local laws and procedures on corporate offences differ extensively and can be

contradictory To extricate oneself with minimal cost requires a nuanced ability to blend understanding of the local law with the wider dimension and in particular to understand where the different countries showing an interest will differ in approach expectations or conclusions Against this backdrop GIR has published the second edition of The Practitioner's Guide to Global Investigation The book is divided into two parts with chapters written exclusively by leading names in the field Using US and UK practice and procedure Part I tracks the development of a serious allegation whether originating inside or outside a company looking at the key risks that arise and the challenges it poses along with the opportunities for its resolution It offers expert insight into fact gathering including document preservation and collection witness interviews structuring the investigation the complexities of cross border privilege issues and strategising effectively to resolve cross border probes and manage corporate reputation Part II features detailed comparable surveys of the relevant law and practice in jurisdictions that build on many of the vital issues pinpointed in Part I

NBS Special Publication, 1968 *Kidney Disease in the Elderly* Holly Kramer, Edgar V. Lerma, Holly Koncicki, 2024-12-26 The over 65 population in the United States is rapidly growing There are currently about 52 million people over 65 years of age in the United States or 16.5% of the US population This percentage is expected to reach 22% or 70 million by 2050 This means that during the professional lives of current trainees they can expect to see an increasing number of older patients in their practice Average life expectancy in 2004 was 75.2 yr for men and 80.4 yr for women Due to the pandemic average life expectancy has decreased for both men and women with declines differing by race and ethnicity Overall current average life expectancy is 75.1 years for men and 80.5 years for women During the 1990s the over 85 population was the fastest growing group at 38% growth This older age group was the largest consumer of healthcare services By 2060 the number of people age 85 years and older is projected to triple from its current estimate of 6.7 million to 19.0 million A substantial percentage of this population has some level of disability sensory physical mental or self care Once a senior develops disability it greatly impacts their ability to self manage their disease and follow a complex medical regimen Patients with chronic kidney disease CKD usually require complicated medication routines complex dietary restrictions frequent medical visits and receive care from multiple physicians Thus providing nephrology care for older patients with CKD requires specific knowledge and skills that are unique to this population Elderly patients will make up a growing proportion of the practice of nephrologists and other providers physicians and allied health providers involved with their care Clinical practitioners will need to become more comfortable with shouldering the full care of this segment of their patient population and work closely with a geriatrician and internists and family practitioners As we become more willing to offer life prolonging technologies in this vulnerable group we need to be willing to deal with the consequences of this decision Finally with their elderly patients clinicians face challenging ethical problems such as whether to withhold or withdraw dialysis Unless addressed promptly and effectively these ethical issues will greatly increase the stress on both the healthcare provider and family members
