Divide and Deal Ian Shapiro, Peter A. Swenson, Daniela Donno Panayides, 2010-07-12 Why are democracies so unequal Despite the widespread expectation that democracy via expansion of the franchise would lead to redistribution in favor of the masses in reality majorities regularly lose out in democracies Taking a broad view of inequality as encompassing the distribution of wealth risk status and well being this volume explores how institutions individuals and coalitions contribute to the often surprising twists and turns of distributive politics The contributors hail from a range of disciplines and employ an array of methodologies to illuminate the central questions of democratic distributive politics What explains the variety of welfare state systems and what are their prospects for survival and change How do religious beliefs influence people s demand for redistribution When does redistributive politics reflect public opinion How can different and seemingly opposed groups successfully coalesce to push through policy changes that produce new winners and losers The authors identify a variety of psychological and institutional factors that influence distributive outcomes Taken together the chapters highlight a common theme politics matters In seeking to understand the often puzzling contours of distribution and redistribution we cannot ignore the processes of competition bargaining building and destroying the political alliances that serve as bridges between individual preferences institutions and policy outcomes Taxation History, Theory, Law and Administration
