Wellness in Britain from the Enlightenment to Modernity Lesa Scholl,2025-10-16 Focusing questions of the soul and its relationship to the body in the context of Britain from the late eighteenth to the early twentieth century this book explores the ways in which medicine and theology co created modern perceptions of well being It intervenes in the presumed conflict between science and religion in long nineteenth century studies by exposing the way medicine and theology worked together to form ideas of health and wellness Using religious theological and medical history alongside literary scholarship on writers and thinkers from the French Revolution through to the fin de siècle it illuminates how health and illness are socially constructed In doing so it engages with current debates on the nature of health and wellness critiquing and contextualizing these concepts in scientific moral and historical terms **Interrogating Trauma** Mick Broderick, Antonio

Traverso,2013-09-27 Throughout the past century traumatic experiences have been re enacted frequently by evolving media and art forms Now there is a significant body of theory across academic disciplines focused on the representation of cataclysmic European and US historical events However less critical attention has been devoted to the representation of havoc outside the West even though depictions of Third World disasters saturate contemporary media and art around the globe This book considers traumatic histories internationally in a broad range of creative arts and visual media representations Deploying diverse applications of the conventional theories of trauma it examines the theoretical limitations at the same time as considering alternative methodologies Interrogating Trauma is concerned with the examination of the concept of trauma and how it is often unproblematically used to theorise the cultural representation of disaster and atrocity It offers a theorisation of trauma in order to reappraise the relationship between cultural representation and the socio historical processes which are marked by violence conflict and suffering This book was published as a special issue of Continuum Journal of Media and Cultural Studies Picturesque Japan, Or Land of the Mikado Chester R. Stratton,1910

French Surgery of the Eighteenth Century Serge J. Dos,2021-01-25 It is during the eighteenth century that the faltering march of surgery from empiric craft to scientific discipline began French surgeons were prominent leaders of this evolution and those practicing in Paris turned the capital into a surgical mecca attracting surgical students and mature professionals from all over Europe and even from America They also created the Royal Academy of Surgery soon the lodestar of the surgical world During its sixty two years existence the academy published five tomes of memoirs which became the surgical vade mecum for most of Europe *Tense Past* Paul Antze, Michael Lambek,2016-05-06 Tense Past provides a much needed appraisal and contextualization of the upsurge of interest in questions of memory and trauma evident in multiple personality and post traumatic stress disorders child abuse and commemoration of the Holocaust Contributors examine the historical origins of memory in psychiatric discourse and show its connection to broader developments in Western science

and medicine They address the new links between trauma and memory and they explore how memory shapes the way traumatic events are put into narrative form They also consider the social and political contexts in which sufferers speak and remember

Trauma and Memory Paul S. Appelbaum, Lisa A. Uyebara, Mark R. Elin, 1997-05-29 The authenticity of memories of childhood sexual abuse has become one of the major social controversies of the 1990 s As persons who report histories of abuse have sought remedies in civil and criminal proceedings in the courts the accuracy of their memories particularly when they have been recalled after a period of time has been subject to intense scrutiny This volume brings together many of the leading participants in the debate to provide a comprehensive picture of the psychological physiological and legal aspects of trauma Beginning by defining the opposing positions in the debate the contributors then offer a variety of perspectives on the nature of memory including reviews of some of the most exciting recent developments in this fast growing area of investigation Next consideration is given to the impact of trauma on memory both in adults and in children With this framework in place the authors turn to an examination of the variety of treatment approaches available to victims of trauma who are trying to cope with the painful consequences of those events The book argues against a unidimensional approach to trauma calling instead for a multidisciplinary synthesis that includes developmental neurobiological cognitive and psychodynamic perspectives Chapters address the legal dilemmas for patients mental health professionals and society as a whole that have arisen from the trauma and memory controversy Most importantly the editors shift the focus of their discussion from the laboratory to the courtroom and from the research journal to the psychotherapist s office looking at the issues from every relevant angle This is the only book in the field to treat the trauma and memory controversy comprehensively from basic research on memory processes through clinical approaches to legal and policy issues Trauma and Memory is a valuable tool for clinicians treating patients with traumatic memories It is also intended for psychologists physicians social workers and lawyers who need a comprehensive reference on trauma and sexual abuse during childhood
