Uncharted Big Data As A Lens On Human Culture:

Uncharted Erez Aiden, Jean-Baptiste Michel, 2013-12-26 One of the most exciting developments from the world of ideas in decades presented with panache by two frighteningly brilliant endearingly unpretentious and endlessly creative young scientists Steven Pinker author of *The Better Angels of Our Nature* Our society has gone from writing snippets of information by hand to generating a vast flood of 1s and 0s that record almost every aspect of our lives who we know what we do where we go what we buy and who we love This year the world will generate 5 zettabytes of data That s a five with twenty one zeros after it Big data is revolutionizing the sciences transforming the humanities and renegotiating the boundary between industry and the ivory tower What is emerging is a new way of understanding our world our past and possibly our future In *Uncharted* Erez Aiden and Jean Baptiste Michel tell the story of how they tapped into this sea of information to create a new kind of telescope a tool that instead of uncovering the motions of distant stars charts trends in human history across the centuries By teaming up with Google they were able to analyze the text of millions of books The result was a new field of research and a scientific tool the Google Ngram Viewer so groundbreaking that its public release made the front page of *The New York Times* *The Wall Street Journal* and *The Boston Globe* and so addictive that Mother Jones called it the greatest timewaster in the history of the internet Using this scope Aiden and Michel and millions of users worldwide are beginning to see answers to a dizzying array of once intractable questions How quickly does technology spread Do we talk less about God today When did people start having sex instead of making love At what age do the most famous people become famous How fast does grammar change Which writers had their works most effectively censored by the Nazis When did the spelling donut start replacing the venerable doughnut Can we predict the future of human history Who is better known Bill Clinton or the rutabaga All over the world new scopes are popping up using big data to quantify the human experience at the grandest scales possible Yet dangers lurk in this ocean of 1s and 0s threats to privacy and the specter of ubiquitous government surveillance Aiden and Michel take readers on a voyage through these uncharted waters

Humanizing Big Data Colin Strong, 2015-03-03 Big data raises more questions than it answers particularly for those organizations struggling to deal with what has become an overwhelming deluge of data It can offer marketers more than simple tactical predictive analytics but organizations need a bigger picture one that generates some real insight into human behaviour to drive consumer strategy rather than just better targeting techniques *Humanizing Big Data* guides marketing managers brand managers strategists and senior executives on how to use big data strategically to redefine customer relationships for better customer engagement and an improved bottom line *Humanizing Big Data* provides a detailed understanding of the way to approach and think about the challenges and opportunities of big data enabling any brand to realize the value of their current and future data assets First it explores the nuts and bolts of data analytics and the way in which the current big data agenda is in danger of losing credibility by paying insufficient attention to what are often fundamental tenets in any form of analysis Next it sets out a

manifesto for a smart data approach drawing on an intelligent and big picture view of data analytics that addresses the strategic business challenges that businesses face Finally it explores the way in which datafication is changing the nature of the relationship between brands and consumers and why this calls for new forms of analytics to support rapidly emerging new business models After reading this book any brand should be in a position to make a step change in the value they derive from their data assets

Competing on Talent in Today's Business World Pradeep Sahay, 2018-07-26 It is currently an exciting time for organizations with regard to the recruitment of talent The business and organizational pressures for finding and hiring the best people could not be greater Recruitment has not changed as a process a vacancy still needs a suitable hire However the landscape tools technologies behaviors and expectations regarding how an organization approaches sourcing and acquiring talent are changing rapidly This book chronicles one organization's journey as it goes about re-orienting the focus of its talent acquisition capability from the current reactive process to a strategic and proactive

program capable of consistently sourcing and recruiting the very best people available Forward looking companies are seizing this opportunity to create a true competitive advantage in talent sourcing and acquisition They are focusing on fine tuning the fundamentals while devoting increased time and planning to the more strategic areas of talent acquisition including workforce planning and strategic sourcing Their best in class approaches elevate recruitment from a transactional short term focused activity to a strategic integrated long term approach that optimizes their investments in people This book articulates both the challenges and the response options that confront organizations as they compete for talent in this fast changing business climate The initial sections here provide a macro view on the changing work landscape and how recent trends and developments around technology and innovation are impacting the discipline of Talent Acquisition The book is designed as a running case study profiling the best practices in recruiting Drawing on both primary and secondary research it adapts and learns from the best practices of high impact business functions such as a lean supply chain analytics process re engineering sales and marketing and discusses the leading academics and practitioners in this regard As such this book will elevate awareness and discourse on the topic and will help concretize a roadmap for organizations looking to revisit and re invent their talent acquisition philosophies and practices as they compete for talent in today s world Trading Zones of

Digital History Max Kemman,2021-10-04 Digital history is commonly argued to be positioned between the traditionally historical and the computational or digital By studying digital history collaborations and the establishment of the Luxembourg Centre for Contemporary and Digital History Kemman examines how digital history will impact historical scholarship His analysis shows that digital history does not occupy a singular position between the digital and the historical Instead historians continuously move across this dimension choosing or finding themselves in different positions as they construct different trading zones through cross disciplinary engagement negotiation of research goals and individual interests **Investigating the Social World** Russell K. Schutt,2022-11-14 The updated Tenth Edition of this bestselling

text provides students with the critical skills necessary to evaluate and carry out research Each chapter integrates instruction in the core research methods with investigation of interesting aspects of the social world including updated examples to reflect the tumultuous world since 2020 As always the book seeks to communicate the excitement of social research and the importance of carefully evaluating the methods used in that research **Technologies of Vision** Steve F Anderson,2017-10-20 An investigation of the computational turn in visual culture centered on the entangled politics and pleasures of data and images If the twentieth century was tyrannized by images then the twenty first is ruled by data In Technologies of Vision Steve Anderson argues that visual culture and the methods developed to study it have much to teach us about today s digital culture but first we must examine the historically entangled relationship between data and images Anderson starts from the supposition that there is no great divide separating pre and post digital culture Rather than creating an insular field of new and inaccessible discourse he argues it is more productive to imagine that studying the

digital is coextensive with critical models especially the politics of seeing and knowing developed for understanding the visual Anderson's investigation takes on an eclectic array of examples ranging from virtual reality culture analytics and software art to technologies for computer vision face recognition and photogrammetry Mixing media archaeology with software studies Anderson mines the history of technology for insight into both the politics of data and the pleasures of algorithms He proposes a taxonomy of modes that describe the functional relationship between data and images in the domains of space surveillance and data visualization At stake in all three are tensions between the totalizing logic of data and the unruly chaos of images

Digital (In)justice in the Smart City Debra Mackinnon, Ryan Burns, Victoria Fast, 2022-12-21 In the contemporary moment smart cities have become the dominant paradigm for urban planning and administration which involves weaving the urban fabric with digital technologies Recently however the promises of smart cities have been gradually supplanted by recognition of their inherent inequalities and scholars are increasingly working to envision alternative smart cities Informed by these pressing challenges *Digital In Justice in the Smart City* foregrounds discussions of how we should think of and work towards urban digital justice in the smart city It provides a deep exploration of the sources of injustice that percolate throughout a range of sociotechnical assemblages and it questions whether working towards more just sustainable liveable and egalitarian cities requires that we look beyond the limitations of smartness altogether The book grapples with how geographies impact smart city visions and roll outs on the one hand and how unjust geographies are produced in smart pursuits on the other Ultimately *Digital In Justice in the Smart City* envisions alternative cities smart or merely digital and outlines the sorts of roles that the commons utopia and the law might take on in our conceptions and realizations of better cities

Quantitative Studies of the Renaissance Florentine Economy and Society Richard T. Lindholm, 2017-01-02 *Quantitative Studies of the Renaissance Florentine Economy and Society* is a collection of nine quantitative studies probing aspects of Renaissance Florentine economy and society The collection organized by topic source material and analysis methods discusses risk and return specifically the population's responses to the plague and also the measurement of interest rates The work analyzes the population's wealth distribution the impact of taxes and subsidies on art and architecture the level of neighborhood segregation and the accumulation of wealth Additionally this study assesses the competitiveness of Florentine markets and the level of monopoly power the nature of women's work and the impact of business risk on the organization of industrial production

A History of Military Morals Brian Smith, 2022-04-25 The history of noncombatant immunity is well established What is less understood is how militaries have rationalized violating this immunity This book traces the development of how militaries have rationalized the killing of the innocent from the thirteenth century onward In the process this historiography shows how we have arrived at the ascendant convention that assumes militaries should not intentionally kill the innocent Furthermore it shows how moral arguments about the permissibility of killing the innocent are largely adaptations to material changes in how wars are fought whether through

technological innovations or changes in institutional structures The Politics of Knowledge Richard K. Laird, 2019-05-03
Whether or not the U S is in decline can be debated but there is evidence that its political system is becoming less able to solve major problems This is in part because loyalty to a belief or an ideology may be taking priority over learning how to understand the problems This work attempts to revitalize the importance of learnability by reviewing some fundamentals of who we are how the system works and why learning is difficult Humans driven by opinions and perceptions tend to discount politics similar to the way they might discount science yet it was the study of science and politics that brought much of mankind to remarkably higher standards of living Government and the economic system it implemented was initially designed for the purpose of channeling self interests into public benefits Understanding what an inclusive political culture is or why there is a Constitution for example could be useful toward restoring the credibility of our central political organization the core of society's stability and development We are losing respect for our government's decision making ability but in a democracy citizens must be held more accountable for who their government is The hypothesis is that if more humans are more learnable we will increase the possibilities for finding the best solutions to big problems *Information Design* Alison Black, Paul Luna, Ole Lund, Sue Walker, 2017-01-12 Information Design provides citizens business and government with a means of presenting and interacting with complex information It embraces applications from wayfinding and map reading to forms design from website and screen layout to instruction Done well it can communicate across languages and cultures convey complicated instructions even change behaviours Information Design offers an authoritative guide to this important multidisciplinary subject The book weaves design theory and methods with case studies of professional practice from leading information designers across the world The heavily illustrated text is rigorous yet readable and offers a single must have reference to anyone interested in information design or any of its related disciplines such as interaction design and information architecture information graphics document design universal design service design map making and wayfinding
