Daviron,Stefano Ponte,2013-07-18 Can developing countries trade their way out of poverty International trade has grown dramatically in the last two decades in the global economy and trade is an important source of revenue in developing countries Yet many low income countries have been producing and exporting tropical commodities for a long time They are still poor This book is a major analytical contribution to understanding commodity production and trade as well as putting forward policy relevant suggestions for solving the commodity problem Through the study of the global value chain for coffee the authors recast the development problem for countries relying on commodity exports in entirely new ways They do so by analysing the so called coffee paradox the coexistence of a coffee boom in consuming countries and of a coffee crisis in producing countries New consumption patterns have emerged with the growing importance of specialty fair trade and other sustainable coffees In consuming countries coffee has become a fashionable drink and coffee bar chains have expanded rapidly At the same time international coffee prices have fallen dramatically and producers receive the lowest prices in

decades This book shows that the coffee paradox exists because what farmers sell and what consumers buy are becoming increasingly different coffees It is not material quality that contemporary coffee consumers pay for but mostly symbolic quality and in person services As long as coffee farmers and their organizations do not control at least parts of this immaterial production they will keep receiving low prices The Coffee Paradox seeks ways out from this situation by addressing some key questions What kinds of quality attributes are combined in a coffee cup or coffee package Who is producing these attributes How can part of these attributes be produced by developing country farmers To what extent are specialty and sustainable coffees achieving these objectives *The Coffee Trader* David Liss, 2004-02-03 Amsterdam 1659 On the world's first commodities exchange fortunes are won and lost in an instant Miguel Lienzo a sharp witted trader in the city's close knit community of Portuguese Jews knows this only too well Once among the city's most envied merchants Miguel has suddenly lost everything Now impoverished and humiliated living in his younger brother's canal flooded basement Miguel must find a way to restore his wealth and reputation Miguel enters into a partnership with a seductive Dutchwoman who offers him one last chance at success a daring plot to corner the market of an astonishing new commodity called coffee To succeed Miguel must risk everything he values and face a powerful enemy who will stop at nothing to see him ruined Miguel will learn that among Amsterdam's ruthless businessmen betrayal lurks everywhere and even friends hide secret agendas Filtered Emma Felton, 2018-12-07 Caf culture is flourishing in cities across the world From London to Seoul Melbourne to Shanghai and many cities in between people are flocking to caf's A recent phenomenon caf culture has made its reappearance only since the end of the 20th century What is the appeal of the caf for urban dwellers And why now Having a coffee might be a daily ritual yet it is more than coffee that draws us to the caf Caf's are vital social spaces technically connected workspaces and businesses that are forging design and food trends The caf is the lens through which this book explores major changes occurring in everyday life in cities across the world Urban regeneration has fuelled the growth of urban amenity and social consumer spaces The impact of technology social and workplace transformation and the ascendancy of the design and food industries all find expression in the spaces of the cafe The specialty coffee movement is a thriving global presence uniting caf staff and customers across geographical borders with a shared commitment to the connoisseurship of coffee In the book's global sweep it examines the development of caf culture in China Japan and Australia as significant and interesting departures from traditional European caf culture Australia is a world leader and successful exporter of its unique style of coffee and food Interviews with caf patrons and staff illuminate why the caf has become a meaningful place for many people in the 21st century city Coffee Robert W. Thurston, Jonathan Morris, Shawn Steiman, 2013-10-10 Coffee A Comprehensive Guide to the Bean the Beverage and the Industry offers a definitive guide to the many rich dimensions of the bean and the beverage around the world Leading experts from business and academia consider coffee's history global spread cultivation preparation marketing and the environmental and social issues surrounding it today
