The Medieval Antecedents of English Agricultural Progress Bruce M.S. Campbell, 2023-05-31 Until recently historians tended to stress the perceived technological and ecological shortcomings of medieval agriculture The ten essays assembled in this volume offer a contrary view Based upon close documentary analysis of the demesne farms managed for and by lords they show that by 1300 in the most commercialized parts of England production decisions were based upon relative factor costs and commodity prices Moreover when and where economic conditions were ripe and environmental and institutional circumstances favourable medieval cultivators successfully secured high and ecologically sustainable levels of land productivity They achieved this by integrating crop and livestock production into the sort of manure intensive systems of mixed husbandry which later underpinned the more celebrated output growth of the seventeenth and eighteenth centuries If medieval agriculture failed to fulfill the production potential provided by wider adoption of such systems this is more appropriately explained by the want of the kind of market incentives that might have justified investment innovation and specialization on the scale that characterized the so called agricultural revolution than either the lack of appropriate agricultural technology or the innate backwardness of medieval cultivators

Production and Consumption in English

Households 1600-1750 Darron Dean, Andrew Hann, Mark Overton, Jane Whittle, 2004-08-02 This economic social and cultural analysis of the nature and variety of production and consumption activities in households in Kent and Cornwall yields important new insights on the transition to capitalism in England

Policies and Practice in Language Learning and Teaching Sabine Doff, Richard Smith, 2025-10-01 This book brings together studies from Georgia Germany Italy Japan New Zealand Poland South Korea and the UK which explore links between policy and practice in language teaching in the twentieth century The 14 contributions set out to expand the remit of grounded history within the field of History of Language Learning and Teaching HoLLT by focusing on language teaching policies and linking these to practices and to contexts situating policy formulation in particular contexts on the one hand and exploring the relationship between policy and practice on the other In this sense the book shows how the theories policy pronouncements curricula textbooks and overall teaching approaches which tend to feature in most histories of language teaching always emerge from particular researchable contexts and in the other direction are interpreted and responded to in practice again in particular contexts In this way it hopes to contribute a context based perspective that highlights diversity of practices in opposition to received

Campbell,2023-05-31 The later Middle Ages was an overwhelmingly rural world with probably three out of four households reliant upon farming for a living Yet conventional accounts of the period rarely do justice to the variety of ways in which the land was managed and worked The thirteen essays collected in this volume draw upon the abundant documentary evidence of the period to explore that diversity In the process they engage with the issue of classification without which effective generalisation is impossible and offer a series of solutions to that particularly thorny methodological challenge Only through systematic and objective classification is it possible to differentiate between and map different field systems husbandry types and land use categories That in turn makes it possible to consider and evaluate the relative roles of soils and topography institutional structures and commercialised market demand in shaping farm enterprise both during the period of mounting population before the Black Death and the long era of demographic decline that followed it What emerges is an agrarian world more commercialised differentiated and complex than is usually appreciated whose institutional and agronomic contours shaped the course of agricultural development for centuries to come Shakespeare and the Staging of English History Janette Dillon,2012-04-05 OXFORD SHAKESPEARE TOPICS General Editors Peter Holland and Stanley Wells Oxford Shakespeare Topics provide students and teachers with short books on important aspects of Shakespeare criticism and scholarship Each book is written by an authority in its field and combines accessible style with original discussion of its subject This new study of Shakespeare s English history plays looks at the plays through the lens of early modern staging focusing on the recurrence of particular stage pictures and units of action and seeking to show how these units function in particular and characteristic ways within the history plays Through close analysis of stage practice and stage picture the book builds a profile of the kinds of writing and staging that characterise a Shakespearean history play and that differentiate one history play from another The first part of the book concentrates primarily on the stage looking at the single picture or tableau the use of presenters or choric figures and the creation of horizontally and vertically divided stage pictures Later chapters focus more on the body on how bodies move gesture occupy space and handle objects in particular kinds of scenes The book concludes by analysing the highly developed use of one crucial stage property the chair of state in Shakespeare s last history play Henry VIII Students of Shakespeare often express anxiety about how to read a play as a performance text rather than a non dramatic literary text This book aims to dispel that anxiety It offers readers a way of making sense of plays by looking closely at what happens on stage and breaks down scenes into shorter units so that the building blocks of Shakespeare s historical dramaturgy become visible By studying the unit of action how it looks and how that look resembles or differs from the look of other units of action readers will become familiar with a way of reading that

may be applied to other plays both Shakespearean and non Shakespearean Philology James Turner, 2015-09-15 A prehistory of today's humanities from ancient Greece to the early twentieth century Many today do not recognize the word but philology was for centuries nearly synonymous with humanistic intellectual life encompassing not only the study of Greek and Roman literature and the Bible but also all other studies of language and literature as well as history culture art and more In short philology was the queen of the human sciences How did it become little more than an archaic word In Philology the first history of Western humanistic learning as a connected whole ever published in English James Turner tells the fascinating forgotten story of how the study of languages and texts led to the modern humanities and the modern university The humanities today face a crisis of relevance if not of meaning and purpose Understanding their common origins and what they still share has never been more urgent **Bridging Divides** Eve Darian-Smith, 1999-10 This study uses the Channel Tunnel between England and France to explore the shifting geographies of nationalism postcolonialism and legal autonomy in the formation of the European Union It looks at regional differences in feelings about Europe and at vocabulary used in discussing the Tunnel
