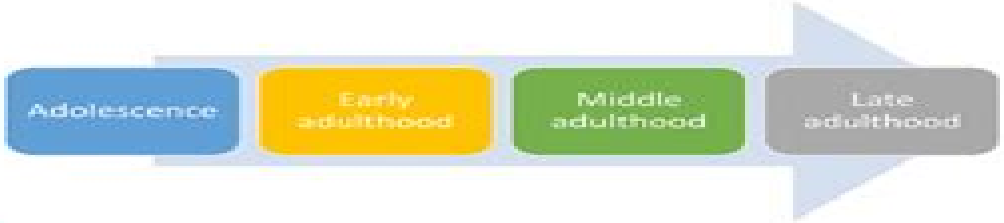
Chapter 4

.opmental Psychology: P
2

Overview of the stages:



Introduction

- Adolescence refers to the stage of human development that follows middle childhood (12–19 years).
- Traditionally, adolescence is seen as an emotionally turbulent and difficult stage of development. Hall coined the term **storm and stress** to describe it.
- There is a growing argument that adolescence is not necessarily a traumatic process, but rather differs between cultures, within families and for individuals.
- Early adulthood is considered the longest stage in the human life span (20–39 years).
- This is followed by middle adulthood (40–59 years) and
- late adulthood (60 years and older).

Physical development during adolescence

- Physical development in adolescence starts with the **hormonal and bodily changes** of puberty.
- Puberty leads to the development of **primary and secondary sexual characteristics,** and includes a growth spurt.
- **Pubescence** is the term used to describe the two-year span preceding puberty during which the changes leading to physical and sexual maturity take place.
- During this period, children grow taller and heavier and develop secondary sex characteristics, **physical features that distinguish one sex from the other but that are not essential for reproduction.**

Understing Psychology 9th Edition Chapter 4

Rachel S Tattersall

Understing Psychology 9th Edition Chapter 4:

Getting the books **Understing Psychology 9th Edition Chapter 4** now is not type of challenging means.
