International Development, 2000-2020 Ian Wash,2024-08-22 Education and International Development 2000 2020 A Constructivist Critique of the One size fits all Liberal Model advances the claim that there exists a liberal theory of international education Ian Wash argues that the assumed harmony of this model is the main source of dispute in the field of education and international development The liberal thinking behind the aspirations for education the political levers necessary for its effective governance and the ideas behind the policies all have contributed towards growing tensions that prevented international education from achieving optimal functionality Through a qualitative discourse analysis of the key policy documents produced between 2000 and 2020 Wash reveals how the liberal model was discursively constructed as a grand narrative of three acts that chronicles the vision process and outcomes of international education Such a rendering brings an understanding of the hidden conflicts essential for finding a resolution to this policy puzzle thereby improving the prosperity and wellbeing of those in poorer countries **Handbook of Research in Education Finance and Policy** Helen

complexity in the approach to and the dissemination of life education the contributors to this volume survey the practice of life education in Greater China so far suggesting that life education is most effective when it is diversified dynamic and developmental across contexts This book will provide the opportunity for engaging in important and serious debates about the future and the values that will underpin it and will prove of special interest to scholars and practitioners working on education policies curriculum development and teacher education in Greater China *Annual Review of Comparative and International Education 2019* Alexander W. the Pacific countries many systems are in the process of construction or reconstruction Can we learn from the experiences of others Given the multiplicity of efforts at reform and the variety of situations for reform there may well be lessons we can learn from each other s efforts and each others failures and successes This book features contributions from experienced researchers who have worked in many different settings and bring their own insights to attack this universal problem *The UN Sustainable Development Goals* Ilias Bantekas,Francesco Seatzu,2023-11-24 In September 2015 the United Nations General Assembly adopted the 17 Sustainable Development Goals SDGs This historic document constituted a transformative plan for action for people planet and prosperity with regards to the sustainable development efforts of all countries The Sustainable Development Goals serves as an expert compendium the most authoritative ready reference tool for anyone interested in the SDGs Each chapter comprises a detailed target by target analysis of one of the SDGs including a methodical analysis of the preparatory proceedings that shaped each goal in its present form an exhaustive examination of their content and a critical assessment from an international law perspective This commentary provides readers with the most up to date information on normative and legal questions arising from the incorporation of the SDGs into the international economic social and environmental legal frameworks and on their implementation status Scholars practitioners and those interested in the fields of law politics development economics environmental studies and global governance will find this book a must read
